7. Session 2010- 2014
8. Present Position- Associate Design Engineer
9. Department/ Organization – (Control System Department) Fluor Daniel India Pvt Ltd.

Comments/Personal observations about the University

Faculty of the department is supportive towards students and efficient whose teachings and guidance is worth appreciation and proved beneficial in the long run.

One to one interaction between a student and professors helped each of the students to identify his/her own potential and excel.

Various career orientated workshops were conducted during our session which helped in initial stage of our career in one or other way.

Comments/Personal observations about the University

Personal Observation:

My time in college has enriched my life in many ways. It has provided me with the necessary tools to enhance my skills more, taught me valuable knowledge about this diverse world and people and concepts in general and eventually will enable me to hopefully become more successful in life when I finally graduate and get my degree. It also has stressed to me the importance of thinking critically and asking questions in many situations. All these aspects of college have also made me better-rounded as a person. It has been easier for me to achieve these opportunities than if I lived in some other countries, especially third-world ones. These experiences are truly irreplaceable and I would not trade them for anything. If I could go back in time and speak to my much younger self when I was first asked the question, "What has been your best experience?" the baby-faced version of me would certainly have been surprised by what my answer is now.

Personal Comments:

Administration need to improve very much because now a day time is more important than money. Every administrative work takes lots of time and make uncomfortable environment.

Comments/Personal observations about the University

Kurukshetra University is a good renowned institution in India, this is what I had in my mind when I was a student there, but after getting into the job and working on different international locations, I came to know that people from other countries as well knows about KUK. In fact, some of my colleagues have read the books written by our own authors from KUK.

Structured instrumentation course content of U.S.I.C is very good and in comparison to other colleges, we received much more exposure related to instrumentation from U.S.I.C. During my session, I have realised that we refer books from several foreign authors for different subjects, even though the better content is available in Indian author books as well, which is much easier to understand and written in-line with the University course requirements. I have had this thing in my mind since from my college days, and I had a goal to write at least one book related to the Instrumentation course, but I couldn't. Finally my wife has taken a step forward in achieving this goal and written a book on "**Artificial Intelligence and Expert Systems by Itisha Gupta & Garima Nagpal**". Recently this book got published and we have received an overwhelming response and reviews from professors from some universities, including **Dr. Srinivas Chamarathi** of U.S.I.C department.

I believe our university and college will adapt such books from Indian authors which are easier for the students to apprehend.

7.	How do you rate the usefulness of curriculum of the programme/degree in fulfilling your expectations?					
8.	How do you rate the overall structure of the curriculum of the programme/degree you have passed?					

Suggestions for further improvement of the curriculum:

_The Syllabus should be more of Industry knowledge, the usage of data should be much more...more emphasis on data analysis..as this is new boom in industry now a days. Statistics is a subject which is used in each and every field and statisticians are hired by very big companies. The knowledge should be more of practical and Industry based.

7.	How do you rate the usefulness of curriculum of the programme/degree in fulfilling your expectations?			√		
8.	How do you rate the overall structure of the curriculum of the programme/degree you have passed?			√		

Suggestions for further improvement of the curriculum:

It's good that few papers along with other optional papers from other department are added. Still lot needs to be adopted keeping in view of present requirements of industry / academia. I think as we approach towards society 5.0, statistics is going to be the pivotal element in industry and academia. It reflects introduction of papers based on on Data Intelligence / Data Analytics, Business Intelligence, Categorical data analysis, Simulation and Modeling upgraded with latest tools, Economic Statistics, Machine Intelligence and Data Science and Business Analytics etc. The focus should be on skill development, Research and Development through introducing more practical papers like MATLAB programming, Graph Theory with Origen Pro etc. To strengthen the practical application of course, teaching of open source statistical packages like JASP, SOFA, GNU PSPP, SCI LABS, Invivostat etc. is need of the hour.

Suggestions for further improvement of the curriculum:

There is increasing demand of professionals in Industry who can develop & use automated systems to collect, process, analyse vast amount of data to solve complex business problems. This demand is going to enhance further with coming of 5G and increase of digitalization in all types of industries. Therefore, it is highly recommended that Data Science subjects should be introduced as Optional/Elective Subjects in addition to Core subjects. Following subjects are recommended :-

1. Machine Learning /Artificial Intelligence

Suggestions for further improvement of the curriculum:

The course on Biomathematics needs to modified. It is more biological. The related statistical concepts should also be written in the course. Further, some courses on Big data / Data Science should also be included in the curriculum since these are demanded in industry. It is also suggested that courses like Epidemiology and Biostatistics should be taught preferably. There is a demand of biostatisticians in market.
