A Higher Order Accurate Numerical Method for Singularly Perturbed Two Point Boundary Value Problems

Aditya Kaushik² · Vijayant Kumar¹ · Anil K. Vashishth¹

Published online: 15 February 2016
© Foundation for Scientific Research and Technological Innovation 2016

Abstract In this paper, an extended mixed asymptotic-numerical method is presented for a one dimensional two point singularly perturbed boundary value problem. The original problem is solved separately on outer and inner region. The outer region problem called the reduced problem is solved using the q -stage Runge-Kutta method and the inner region problem is solved asymptotically. A uniform error estimate of $\mathcal{O}(h^p)$, ($p \leq q$) is obtained. Several numerical examples are taken to illustrate the comparative study. The method is also extended to delay and advance problem.

Keywords Singular perturbation · Differential equations with delay as well as advance · Runge-Kutta method · Reduced problem

Introduction

We consider the following one dimensional singularly perturbed boundary value problem:

$$\left. \begin{aligned} Lu = \epsilon u'' + a(x)u' + b(x)u = c(x) \quad \text{in } \Omega, \\ u(0) = \alpha, \quad u(1) = \beta. \end{aligned} \right\} \quad (1.1)$$

where ϵ is the diffusion term containing small perturbation parameter, $\Omega = (0, 1)$ with boundary $\Gamma = \{0, 1\}$, $a(x)$, $b(x)$ and $c(x)$ are the sufficiently smooth functions on Ω representing the convection, reaction and source terms respectively. Moreover, also suppose that

Abstract

The main object of this paper is to introduce and study a new concept of f -Wijsman lacunary statistical convergence of sequences of sets, where f is an unbounded modulus. The definition of Wijsman lacunary strong convergence of sequences of sets is extended to a definition of Wijsman lacunary strong convergence with respect to a modulus for sequences of sets and it is shown that, under certain conditions on a modulus f , the concepts of Wijsman lacunary strong convergence with respect to a modulus f and f -Wijsman lacunary statistical convergence are equivalent on bounded sequences. We further characterize those θ for which $WS_{\theta}^f = WS^f$, where WS_{θ}^f and WS^f denote the sets of all f -Wijsman lacunary statistically convergent sequences and f -Wijsman statistically convergent sequences, respectively.

Keywords: modulus function; density; lacunary sequence; statistical convergence; lacunary strong convergence; Wijsman convergence

1 Introduction

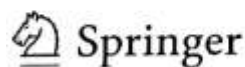

Zygmund [1] was the person behind the introduction of the idea of statistical convergence. The concept of statistical convergence was formally given by Fast [2] and Steinhaus [3]. This concept was studied by Schoenberg [4] as a non-matrix summability method. For a detailed account of statistical convergence one may refer to [5–11], and many others.

Let \mathbb{N} denote the set of all natural numbers. A number sequence $X = (\xi_k)$ is said to be statistically convergent to the number l if for each $\varepsilon > 0$ the set $\{k \in \mathbb{N} : |\xi_k - l| \geq \varepsilon\}$ has natural density zero. The natural density of a subset $E \subset \mathbb{N}$ [12] is defined by

$$d(E) = \lim_{n \rightarrow \infty} \frac{1}{n} |\{k \leq n : k \in E\}|,$$

where the vertical bars indicate the number of elements in the enclosed set. Obviously we have $d(E) = 0$ provided that E is a finite set of positive integers. If a sequence (ξ_k) is statistically convergent to l , then we write it as $S\text{-}\lim \xi_k = l$ or $\xi_k \rightarrow l(S)$.

The concept of convergence of sequences of points has been extended by several authors [13–20] to the convergence of sequences of sets. In this paper we consider one such extension, namely, Wijsman convergence. Nuray and Rhoades [21] extended the notion of Wijsman convergence of sequences of sets to that of Wijsman statistical convergence of sequences of sets, and gave some basic theorems. Also, they introduced the notion of

Common Fixed Point Theorems Without Continuity and Compatible Property of Maps

Vinod K. Bhardwaj, Vishal Gupta and Naveen Mani

ABSTRACT: In this paper, without assuming continuity, commutativity and compatibility of self maps, some common fixed point theorems for weak contraction of integral type in complete metric spaces are proved. An example and some remarks are also given to justify that our contraction is new and weaker than other existing contractions.

Key Words: Common fixed point, continuity, compatibility, integral type.

1. Introduction

Fixed-point theory is one of the most fruitful and effective tool in mathematics. It has number of applications within as well as outside the mathematics. The first important result on fixed point for contractive type mappings is the Banach contraction principle [13].

Theorem 1.1. [13] Let (X, d) be a complete metric space, $\alpha \in (0, 1)$, and F be a self-maps of X such that for all $x, y \in X$,

$$d(Fx, Fy) \leq \alpha d(x, y),$$

then F has a unique fixed point $z \in X$.

This principle is a forceful tool in nonlinear analysis. It has many applications in solving nonlinear equations.

In 1975, Dass and Gupta [2] proved an extension of the Banach contraction principle through rational expression.

Density by moduli and Wijsman statistical convergence

Vinod K. Bhardwaj Shweta Dhawan Oleksiy A. Dovgoshey

Abstract

In this paper, we have generalized the Wijsman statistical convergence of closed sets in metric space by introducing the f -Wijsman statistical convergence of these sets, where f is an unbounded modulus. It is shown that the Wijsman convergent sequences are precisely those sequences which are f -Wijsman statistically convergent for every unbounded modulus f . We have also introduced a new concept of Wijsman strong Cesàro summability with respect to a modulus f , and investigate the relationship between the f -Wijsman statistically convergent sequences and the Wijsman strongly Cesàro summable sequences with respect to f .

1 Introduction and background

The idea of statistical convergence was first introduced by Fast [16] and Steinhaus [31] independently in the same year 1951 and since then several generalizations and applications of this concept have been investigated by various authors, namely Šalát [27], Fridy [17], Connor [13], Aizpuru et al. [1], Küçükaslan et al. [20], and many others.

Statistical convergence depends on the natural density of subsets of the set $\mathbb{N} = \{1, 2, 3, \dots\}$. The natural density $d(K)$ of set $K \subseteq \mathbb{N}$ (see [25, Chapter 11]) is defined by

$$d(K) = \lim_{n \rightarrow \infty} \frac{1}{n} |\{k \leq n : k \in K\}|, \quad (1.1)$$

Received by the editors in November 2016 - In revised form in February 2017.

ACKNOWLEDGEMENTS

I feel privileged to acknowledge my gratitude to all those who have contributed directly or indirectly in the completion of this research work. I am grateful to my supervisor Dr. (Mrs.) Rashmi Verma, Professor, Department of English, Kurukshetra University, Kurukshetra for her precious guidance and continuous encouragement during this intellectual journey. She has always been there to help me like a guardian at all junctures. Here, I cannot proceed without expressing my gratitude to Prof. Ram Niwas, Chairman, Department of English, Kurukshetra University, Kurukshetra. I also want to convey my heart-felt gratitude to Prof. Brajesh Sawhney, Prof. Sunita Siroha and Prof. S.S. Rehal for their invaluable suggestions. They have made this research work possible in the present form.

I owe my indebtedness to the members of Jawaharlal Nehru Library at Kurukshetra University, Kurukshetra, The British Library, New Delhi, Jawaharlal Nehru University Library, New Delhi, Delhi University Library, New Delhi, Panjab University Library, Chandigarh, Punjabi University Library, Patiala, Osmania University Library, Hyderabad, for the valuable research material provided by them.

I have no words to express my gratitude to my parents Sh. Gulab Singh and Smt. Chander Kala and mother-in-law Smt. Rajbala who dreamt everything before me and gifted only the sweet dreams to my eyes. I am thankful to my husband Devender Singh, Assistant Professor, Department of English, L.R.D.A.V. College, Jagraon, Ludhiana who has always stood by me unconditionally. His presence has been my driving energy. Words fall short to express my appreciation for my son- Devesh, brother- Shivesh Berwal, sisters- Nisha, Usha and sister-in-law Sunita Devi, whose unconditional love have always cherished me in hard times. Last but not the least, I bow my head in thanks and prayers to Almighty God without whose wish I would not have even dared of taking up this project.

ACKNOWLEDGEMENTS

First and foremost I would like to thank my supervisor Prof. Dinesh Kumar who helped me at every stage of the work from the very inception of the idea of the topic onwards. The study owes a lot to his seasoned guidance and superior judgment. The shrewd insights that he offered have gone a long way into an understanding of Cather and the shaping of the present study. But for his constant encouragement and advice, the study would have been impossible. The moment is apt for an expression of sincere gratitude to him.

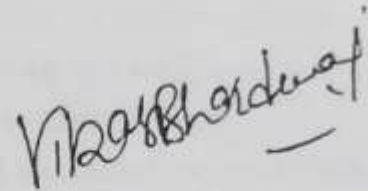

I express my thanks to the members of Faculty, the Department of English, Kurukshetra University, Kurukshetra for their cooperation and encouragement. I particularly thank Prof. Ram Niwas, Chairman, Department of English, Prof. Brajesh Sawhney, Prof. Sunita Siroha and Prof. S. S. Rehal for their support.

I thank the Jawahar Lal Nehru Library and the Departmental Library, Kurukshetra University Kurukshetra, the Central Library, Delhi University and Panjab University Library for allowing me easy access to books and invaluable research material. Thanks are also due to the Willa Cather Archive which is a rich and widely accessible website for the study of Cather's life and writings.

The insights I gained at the 14th International Willa Cather Seminar, "Canyon, Rock & Mesa Country" organized jointly by the Willa Cather Foundation and Northern Arizona University, Flagstaff, AZ (USA) from June 16-22, 2013 where I presented a paper on Cather and had the opportunity to interact with Cather enthusiasts and scholars like Robert Thacker, Guy Reynolds, Andrew Jewell, Ann Moseley, Timothy Bintrim and John J. Murphy have proved invaluable for this study. I must also mention the rich experience I gained at the 2015 biennial international conference of the Association for the Study of Literature and Environment held at the University of Idaho, USA in June 2015 that has gone into the shaping of this study.

I also thank the Principal and the management of R. K. S. D. College, Kaithal for their cooperation.

It would be remiss of me not to thank the members of my family for their constant support. I particularly thank my wife Richa who has been an invaluable source of support and inspiration.

ACKNOWLEDGEMENTS

I feel indebted to my supervisor, Dr. Ram Niwas, Professor and Chairperson, Dept. of English, Kurukshetra University, Kurukshetra for his deep and earnest interest in the work, his mature guidance and exceptional readiness to help. Because of his critical insight and intellectual discipline, it has been an extremely rewarding experience for me to grapple with the problems concerning my research projects. Without his serious involvement and commitment, it would not have been possible for me to complete this project.

I feel a deep sense of pleasure and satisfaction gratefully acknowledging the immense help from Prof. S.L. Paul and Prof. Bhim S. Dahiya for their constant source of inspiration and encouragement.

I owe a debt of gratitude to Prof. Brajesh Sawhney, Prof. Sunita Siroha, Prof. S.S. Rehal, Prof. Rashmi Verma and Dr. Vikram Kharab for their constant source of inspiration and encouragement.

I wish to record my indebtedness to Prof. Shushma Sharma and Dr. Deepti Sharma for their support. I record my sincere thanks to various libraries, particularly Jawaharlal Nehru Library Kurukshetra University, Department Library, M.D.U. Library Rohtak, and American centre Library, New Delhi for making the relevant material available to me.

I especially thank Dr. Jiwan Bakhshi, Dr. Kamlesh Yadav and my son Shubham who have cooperated for so long in permitting me long hours in my study for years.

In the last but not the least, I am thankful to Mr. Sanju Chawla and Rink Chawla (Website Computers, 11rd Gate, Kurukshetra) who typed this thesis with keen interest and meticulous care.
