ACKNOWLEDGEMENTS

At the very outset, I bow my head to the Almighty God who provided me the opportunity to pursue my PhD.

I extend my deep sense of gratitude to my esteemed supervisor, Dr. Dinesh Kumar (Professor, Department of English, Kurukshetra University, Kurukshetra) for his expert guidance, constant encouragement, and willingness to help during the course of my research work. I am also thankful to Madam Madhu Bala, who always offered me a warm welcome at home.

My regards and thanks are also due to Dr. (Mrs.) Rashmi Verma, Chairperson, Department of English, Kurukshetra University, Kurukshetra and all other faculty members for their constant co-operation, moral support and valuable help. I am particularly grateful to Prof. Ram Niwas and Prof. Sushma Sharma, for their kindness and support. I also thank Prof. S.L. Paul (Retd. Professor, Department of English, KUK) for the discussions with him about my research work which helped me shape the argument in my thesis.

I owe a sense of gratitude to the staff members of Jawahar Lal Nehru Library and Department of English Library, KUK, Punjabi University Library, Patiala and Panjab University Library, Chandigarh for providing me ample help in using the library facilities for the completion of this research work.

I also owe my profound thanks to my senior and friend Dr. Parshant Kumar, Assistant Professor, GC Bherian, for his timely help during the course of this work. It would really have been difficult for me to accomplish this task without his kind support.

The support and love of my family has been a constant source of inspiration for me. I cannot put my feelings in words for my parents Sh. Avtar Singh Virk and Smt. Parsin Kaur, for my brothers (Gurjant and Gurdan), for my sister-in-law Nainsi K. Mann and also for my sister (Parvinder), who shared the burden of my despair. I can never forget the love of my family for always being on my side in times of difficulties to boost my spirit.

Finally I would like to thank all, mentioned here or not, who directly or indirectly helped me in completing my work.

ACKNOWLEDGEMENTS

I am glad that I have accomplished the most significant academic challenge of working on my doctoral dissertation. This desired goal could be achieved only because of the inspiration, encouragement and co-operation of many. I wish to express my sincere gratitude to all those who have contributed to my research and supported me in one way or the other during this enriching journey.

First of all, I am deeply indebted to my supervisor Prof. Sunita Siroha for her guidance and encouragement. I have always marveled at her passion and enthusiasm for the subject. For her patience, guidance, and enthusiasm; for pushing me to refine, rework, and rethink; and for helping me to understand my work in ways I have yet to imagine. It would not have been a successful scholarly venture without her support and inspiration.

My regards and thanks are due to Dr. Rashmi Verma, Chairperson, Department of English, KUK and to all other honorable faculty members for their constant co-operation, moral support and valuable help. I am also thankful to all the non-teaching staff members of the Department of English, KUK for their co-operation.

I owe a sense of gratitude to the staff members of Jawahar Lal Nehru Library, Department of English Library, KUK, and Punjab University Library, Chandigarh for providing me ample help in using the library facilities for the completion of this research work.

I also thank my colleagues Mr. Krishan Lal and Dr. Pravinder Dalal for their timely help during the course of this work.

Mere words cannot express my gratitude towards my family, as without their blessings and emotional support I could not have completed this Herculean task. My family has been my backbone in realizing this dream. My special thanks to my father, Mr. Bhim Singh Gahlyan who instilled in me all

the courage and confidence. I can never forget the motivational thoughts he filled me with during this work. My heartfelt thanks to my mother, Mrs. Krishna Gahlyan who always has been my source of inspiration and who wanted me to carry out the research work.

I cannot put my fingers in words for my Badi Maa who has always been on my side in the times of difficulties to boost my spirit. A very special word of thanks goes to my brothers Virander Gahlyan and Harender Gahlyan for taking all the pains in supporting me time and again. I am equally grateful to my mother-in-law (Mrs. Sushila Lamba) for supporting me and for understanding me throughout this journey. Without her blessings, it could not have been this easy a journey.

Last but not the least, I would like to thank my *Humsafar*, Mr. Pravinder Singh (Prince) who kept me triggering for the perusal of my work. For all the moral and emotional support and for trusting me with whatever I do. For his patience and understanding, without which, this would all seem somewhat inconsequential. For all his valuable advises. For always showing how proud he is of me.

I thank Mr. Sanju Chawla and Rinku Chawla, (Website Computers, Kurukshetra), for his neat thesis work.

Above all, I owe everything to and humbly thank the Heavenly Father, the Almighty God for bestowing upon me His countless blessings, wisdom and grace. It was His will that has come true.

With Him, Everything is Possible....

Waves at the imperfect boundary of elastic and bio-thermoelastic diffusive media

R Kumar¹, S Ghangas^{2*} and A K Vashishth¹

¹Department of Mathematics, Kurukshetra University, Kurukshetra, Haryana 136119, India

²Department of Mathematics, M.D.S.D. Girls College, Ambala City, Haryana 134003, India

Received: 23 August 2020 / Accepted: 08 March 2021 / Published online: 27 April 2021

Abstract: The present investigation deals with the reflection and transmission phenomena in isotropic elastic half-space (ES) and bio-thermoelastic diffusive half-space (BDS) for the study of plane harmonic waves. The two half-spaces are separated by an imperfect interface and the governing equations for BDS are modified by introducing phase lag parameters in Fourier's law of heat conduction and Fick's law of mass diffusion. After expressing the equations in two-dimension, the potential functions are used to simplify the equations for further calculation. The plane P or SV wave is incident from ES which results in two reflected waves in ES and four transmitted waves in BDS. The amplitude ratios are obtained for these reflected and transmitted waves concerning the incident P or SV wave for stiffness forces. The obtained amplitude ratios are further used to drive the energy ratios of various reflected and transmitted waves. These ratios are impacted by the characteristics of the wave and material properties of the media. The resulting energy ratios are computed numerically by developing a numerical algorithm and displayed in the form of graphs to show the effects of blood perfusion rate, lagging times, and stiffness parameters.

Keywords: Bio-thermoelasticity; Diffusion; Reflection; Transmission; Amplitude ratios

1. Introduction

The investigation of heat transfer in living biological tissues is a complex process and requires accurate mathematical models. It includes a mixture of many mechanisms such as thermal conduction in tissues, convection and blood perfusion, metabolic heat generation, vascular structure, changing of tissues properties depending on physiological condition, and so on. The soft tissues are very much dependent on the behaviour of tissues' mechanical properties and the existence of the appropriate mathematical models. Such models are helpful to identify modes of injury and improve injury prevention techniques. These models are further significant for the understanding of the contribution of various tissue components to the material behaviour of the overall tissue which involves the normal tissues and tissues affected by other conditions. For ultrasound hyperthermia treatments of tumours and for determining the safety limits of diagnostics ultrasound

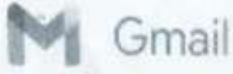

equipment, it is very important to calculate the ultrasound field distribution accurately in tissue Xu and Fu [1].

Shen et al. [2, 3] elaborated the tissue damage model to explore the influence of thermally induced mechanical deformation on thermal damage prediction and showed that thermally induced mechanical deformation decreases the activation energy for protein denaturation, making soft tissues more easily to be damaged. Li et al. [4-6] developed a model by combining the bioheat transfer equation with the theory of linear thermoelasticity to predict thermally induced mechanical deformation and thermal damage of soft tissues. These models used Pennes [7] bio-heat transfer equation which is based on Fourier's law of heat conduction given as follows:

$$q_i = -k\theta_{,i} \quad (1)$$

which assumes that a temperature disturbance in any part of the materials leads to an instantaneous perturbation at each point of the whole. This implies that the propagation speed of thermal perturbation is infinite which seems unrealistic and doesn't precisely predict the temperature distribution within living biological tissues. In reality, the

विषय: गणित की मूलभूत शब्दावली (अंग्रेजी-हिंदी) अद्यतनीकरण हेतु बैठक के संबंध में।

भवदीय,

वैज्ञानिक तथा तकनीकी शब्दावली आयोग विभिन्न रीक्षणिक योजनाओं के माध्यम से हिंदी एवं अन्य भारतीय भाषाओं में पारिभाषिक शब्दकोश, शब्द-संग्रह, विश्वकोश, विश्वविद्यालय स्तरीय सटअप ग्रंथों का निर्माण कार्य कर रहा है। इस कार्य में विभिन्न विश्वविद्यालयों, संस्थानों, अनुसंधान केंद्रों के विद्वानों, आचार्यों एवं वैज्ञानिकों का सक्रिय रूप से सहयोग लिया जाता है।

वर्तमान में गणित की मूलभूत शब्दावली (अंग्रेजी-हिंदी) अद्यतनीकरण का कार्य किया जा रहा है। इसी क्रम में एक बैठक आपके विश्वविद्यालय के गणित विभाग में दिनांक 21-25 सितंबर 2021 (समय 10 am- 5 pm) तक आयोजित करने का प्रस्ताव है।

इस बैठक हेतु 8-10 विशेषज्ञों के बैठने हेतु समिति कक्ष की आवश्यकता होगी, समिति कक्ष के लिए आयोजन द्वारा किसी प्रकार के भूगतान का प्रावधान नहीं है। बैठक के दौरान उपस्थित विशेषज्ञों के प्रायः तारतम्य खर्च के खर्च का भूगतान सत्यापित वाउचर/बिल प्रस्तुत करने पर आयोग द्वारा कार्यालय ECS द्वारा ऑनलाइन बैंक/नेटबैंक/विभागीय या समस्या को उनके बैंक खाते में किया जाएगा। बैठक में उपस्थित विशेषज्ञों को आयोग निवमानुसार मानदेय तथा यात्रा भतादैनिक असाहाय्य विशेषज्ञों को कार्यालय ECS द्वारा ऑनलाइन उनके बैंक खाते में देय होगा। बैठक के दौरान प्राण्य विशेषज्ञों एवं अधिकारियों के लिए विश्वविद्यालय का गैस्ट हाउस उपलब्ध करवाने का अनुरोध है। आशा है की आप राष्ट्रीय महत्त्व की इस योजना हेतु अपनी स्वीकृती उत्तिशोध प्रोबत करेंगे।

Fundamental and plane wave solution in non-local bio-thermoelasticity diffusion theory

DOI: 10.17758/CSM.CJ-2021-1001021

Abstract

This work is an attempt to design a dynamic model for a non-local bio-thermoelastic medium with diffusion. The system of governing equations are formulated in terms of displacement vector field, chemical potential and the tissue temperature in the context of non-local dual phase lag (NL-DPL) theories of heat conduction and mass diffusion. Based on this considered model, we study the fundamental solution and propagation of plane harmonic waves in tissues. In order to analyze the behavior of the NL-DPL model, we construct basic theorem in the terms of elementary function which determine the existence of three longitudinal and one transverse wave. The effects of various parameters on the characteristics of waves (i.e., phase velocity and attenuation coefficients) are elaborated by plotting various figures of physical quantities in the later part of the paper.

On deferred statistical boundedness of order α

Mikail Et^a , Vinod K. Bhardwaj^b, and Sandeep Gupta^c

^aDepartment of Mathematics, Firat University, Elazig, Turkey; ^bDepartment of Mathematics, Kurukshetra University, Kurukshetra, India; ^cDepartment of Mathematics, Arya P.G. College, Panipat, India

ABSTRACT

In this paper, we introduce and examine the concept of deferred statistical boundedness of order α and give the relation between statistical boundedness and deferred statistical boundedness of order α . Apart from studying the Köthe-Toeplitz duals of $S_{p,q}^{\alpha}(b)$, the space of deferred statistically bounded sequences of order α , a decomposition theorem is also established. Finally we give a general description of inclusion between two deferred α -statistical methods of boundedness.

1. Introduction and preliminaries

The idea of statistical convergence which is, in fact, a generalization of the usual notion of convergence was introduced by Fast (1951) and Steinhaus (1951) independently in the same year 1951 and since then several generalizations and applications of this concept have been investigated by various authors namely Bhardwaj and Bala (2007), Bhardwaj and Dhawan (2015), Bhardwaj, Dhawan, and Gupta (2016), Bhardwaj and Gupta (2014), Bhardwaj et al. (2014), Cinar, Karakaş, and Et (2013), Connor (1988), Et, Çolak, and Altin (2014), Et and Şengül (2014), Et, Altinok, and Altin (2004), Fridy (1985), Fridy and Orhan (1993), Gupta and Bhardwaj (2018), İş İk and Akbas (2016), Mursaleen and Mohiuddine (2012), Mursaleen (2000), Rath and Tripathy (1994), Salat (1980), Sengül and Et (2017), Temizsu, Et, and Çinar (2016).

The idea of statistical convergence depends upon the density of subsets of the set \mathbb{N} of natural numbers. The natural density $\delta(K)$ of a subset K of the set \mathbb{N} of natural numbers is defined by

$$\delta(K) = \lim_{n \rightarrow \infty} \frac{1}{n} |\{k \leq n : k \in K\}|,$$

provided the limit exists, where $|\{k \leq n : k \in K\}|$ denotes the number of elements of K not exceeding n . Obviously, we have $\delta(K) = 0$ provided that K is a finite set.

ELECTROMECHANICAL COUPLING COEFFICIENTS FOR BULK WAVES IN POROUS PIEZOELECTRIC MATERIALS OF TETRAGONAL CLASS 31

Abstract

The porous piezoelectric materials having crystal symmetry of type 4 and 4mm, are selected for study in this paper. The expressions of electromechanical coupling constants and velocities of waves propagating are obtained in closed form for these crystal classes in one and two dimensional cases. It is found that effects of electro-elastic interaction are different in different crystal classes for different planes of propagation. The effects of propagation direction, piezoelectricity and porosity on the phase velocities and electromechanical coupling coefficients are studied numerically. Crystals Barium Titanate is considered for numerical computation purpose.

Keywords: electromechanical, porous piezoelectric materials, tetragonal, wave velocity.

1. Introduction

The electromechanical coupling characteristics of piezoelectric materials, which lead to mechanical deformations under an electric field and electrical polarization under mechanical loads, make them suitable for a variety of electromechanical devices used for data collection, cooling systems, vibration and noise suppression, energy harvesting, telecommunication and sensor networks.

Wave propagation in a piezoelectric medium has been extensively investigated in connection with the generation and transmission of disturbances in electro-acoustic devices such as transducers and resonators. Both, theoretical and experimental studies on wave propagation in piezoelectric materials attract the attention of scientists and engineers. Kyame [1] studied the wave propagation in piezoelectric materials by taking quasi-static electric field approximation into account. A detailed survey of wave propagation in piezoelectric materials belonging to different crystal classes can be found in the texts [2-3]. Three waves viz. quasi P, quasi S_1 and quasi S_2 propagate in anisotropic piezoelectric materials. The effects of direction of propagation, crystal symmetry and poling direction on the phase velocities and slowness of stiffened waves and unstiffened waves have been described therein. The propagation of waves at large distances from a source of disturbance in an infinite piezoelectric medium of hexagonal symmetry was investigated by Rao [4]. Auld [5] and Every [6] presented a short survey related to wave propagation and resonance phenomena in piezoelectric materials.

A series of papers [7-9] relating to analytical and numerical modelling based on finite element method was presented to study the effects of porosity on the elastic, piezoelectric and dielectric constants of porous piezoelectric materials. Gomez and Montero [10-12] obtained constitutive equations and equations of motion for porous piezoelectric materials with one phase piezoelectric. Vashishth and Gupta [13] established the constitutive equations and equations of motion for porous piezoelectric materials and studied the wave propagation in

(Received August 26, 2020, Revised January 5, 2021, Accepted January 20, 2021)

Abstract. This work throws light on the reflection and transmission phenomenon due to incident plane longitudinal wave at a plane interface between inviscid fluid half-space and a nonlocal bio-thermoelastic diffusive half-space. The governing equations are formulated by adopting nonlocal heat conduction and mass diffusion along with dual phase lag (DPL) model. The amplitude ratios are obtained analytically and these amplitude ratios are used to drive energy ratios. The distribution of energy of incident wave among reflected and transmitted waves are obtained. The obtained ratios are impacted by angle of incidence, frequency and different properties of media involved. Numerically examined energy ratios are displayed in the form of graphs to know the effect of nonlocal parameters, lagging times, stiffness and blood perfusion rate.

Keywords: amplitude ratios; bio-thermoelasticity; diffusion; fluid; non local; reflection; transmission

1. Introduction

In clinical treatment, a lot of modern thermo-therapeutics (microwave, laser, focused ultrasound, and radio-frequency) have been widely used. For example, the laser is focused on tumor by an objective lens for thermal therapy. During thermal therapy, delivering the appropriate heat energy to the infected tissue without affecting the healthy tissue is the biggest challenge. Thus an acute need is to understand how the temperature/stress fields affect the kinetics of a thermal treatment.

In living biological tissues, heat transfer analysis is a complicated physiological process due to the inherent characteristics in tissues, e.g. blood circulation, sweating, metabolic heat generation, and heat dissipation via hair or fur. Pennes (1958) established the bioheat transfer model to describe this complex phenomena which is based on Fourier's law of heat conduction. So far lots of research work is done based on Cattaneo (1958), Vernotte (1958) and Tzou (1995) models of heat conduction to understand the thermal behavior of biological tissues.

Later, Roychoudhuri (2007) extended the idea of Tzou on Green Nagdhi III by introducing the third phase-lag τ_v in correspondence to thermal displacement and developed another generalized

Analysis of Love waves propagation in a functionally graded porous piezoelectric composite structure

Anil K. Vashishth^a and Umang Bareja^b

^aDepartment of Mathematics, Kurukshetra University, Kurukshetra, Haryana, India; ^bDepartment of Mathematics, Mukand Lal National College, Yamunanagar, Haryana, India

ABSTRACT

Propagation of Love waves in a composite structure, containing a functionally graded porous piezoelectric material layer over a dielectric elastic half space, is studied. The material properties gradually vary with the layer thickness. Constitutive equations for a functionally graded porous piezoelectric material layer are laid down and then their analytical solutions are derived by using the Wentzel-Kramers-Brillouin method. Variations in the mechanical properties and electrical properties are considered and dispersion equations are derived for both electrically short and open boundaries. The effects of porosity and grade coefficients on the phase velocity of the Love waves and on electro-mechanical coupling are discussed. Numerical computation of the phase velocity and electromechanical coupling factor is done for different levels of thickness of the layer and results, obtained, are validated by deriving earlier results as a special case of this study. This study finds application in making high-performance surface acoustic wave devices.

1. Introduction

Functionally graded materials are those types of composite materials, in which volume fraction, mechanical and other properties vary continuously from one surface to another, generally, from ceramic-rich surface to metal-rich surface. The functionally graded materials were first discussed in detail in [1]. Different techniques of manufacturing functionally graded materials (FGM) have been developed [2–4]. The dynamic analysis of FGM was examined by [5, 6]. An analytical method [7] was proposed to determine wave reflection and transmission coefficients for functionally graded materials. Liu et al. [8] investigated propagation of elastic waves in FGM plate using Fourier technique by dividing the plate into linearly inhomogeneous elements (LIEs) and Han et al. [9] divided the plate into quadratic layer elements (QLEs). SH waves in the FGM were studied using the computational method by Han and Liu [10] and stress waves propagation in FGM was examined by Berezovski et al. [11]. Zhang and Batra [12] applied modified smoothed particle hydrodynamics method for analysis of elastic wave in FGM. Lamb waves in FGM plates were studied [13–15]. Guided

DEPARTMENT OF MICROBIOLOGY,
KURUKSHETRA UNIVERSITY, KURUKSHETRA
 (Established by the State Legislature Act XIII of 1956)
 ("A+" Grade NAAC Accredited)

**3.7.1 Project training for 2 months in various research institutes/industries etc. during Summer
 Vacations during break between 2nd and 3rd semester (July 2021-August 2021)**

Academic session 2021-2022

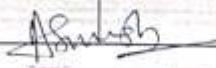

List of students undertaking field projects /research projects / internships	University Roll No.	Centre name
Ruchi	4040801	Ambala college of engineering and Applied research Ambala Cantt.
Isha punia	4040802	Imperial life sciences Gurgaon, Haryana.12201
Preeti Pandey	4040803	Columbia Asia Hospital, GGN
Twinkle bajaj	4040804	Oscar remedies, Yamunanagar
sweety	4040805	Civil hospital, Ambala cantt
Raynish	4040807	Ambala college of engineering, ambala
Manisha	4040808	GAJENDRA YADAV PATHOLOGY LAB.(REWARI)
Pushpa devi	4040809	Ambala college of engineering and applied research
Jasna	4040810	Acculab Sirsa and acentric biotech lab Mohali
Deepika	4040811	Indorama healthcare Pvt.Ltd.Manakpur,yamuna nager
Himanshu	4040812	Oxigen Analytical Laboratories, Baddi, Himachal Pradesh
Sachin kumar	4040813	Kalpna Chawla Government Medical College
Phyanka	4040814	Ambala college of engineering ,mithapur ambala
Mahak	4040815	DNA Labs A Centre For Applied Sciences, Dehradun
Neha	4040816	Kalpna Chawla Govt. Medical College, Karnal
Sahil bodla	4040817	Kalpna chawla medical college
Sandhya Singhania	4040818	Indian biological sciences and research institute,Noida
Anju jeena	4040819	Nectarlifesciences ltd, DeraBassi
Nancy	4040820	DNA labs, dehradun, Uttarakhand
Neha	4040821	Modern pathology lab ,Rewari
Poonam	4040822	Kaddam Multispeciality Hospital,Bhrawari
Nidhi	4040823	Dr.Gajendra Yadav's Pathology lab ,Rewari
Sourabh	4040824	Ambala college of Engineering and Applied research Ambala cantt.
Alisha	4040825	Kalpna Chawla Government Medical College Karnal
Poonam	4040826	Nitin lifesciences private Ltd, kamal
Renu	4040828	Kalpna chawla government medical college kamal
Neeraj Bhumra	4040829	KCGMC
Yamini Sani	4040830	Columbia Asia Hospital, Gurugram
Sargana	4040831	MAMC Agroha (Hisar)
Niharika	4040832	MAMC Agroha
Aayushi Sharma	4040833	Dna labs , Dehradun
Bhawna Singh	4040834	MAMC Agroha, Hisar
Akshay shrawast	4040835	Avon food labs delhi
Divya	4040836	Kalpna chawla govt medical college kamal(har)
Avinashi Duggal	4040837	Narender Prakash Diagnostic centre
pooja	4040838	Ambala college of engineering research and institute
Ramandeep	4040839	Nitin lifescience, kamal
Bhawna	4040840	Rapture Biotech International Private Limited, Noida
Sonam	4040842	Kalpna chawla govt medical College,kamal
Rachna	4040843	Rapture biotech lab noida
Vaishakhi	4040844	Kalpna Chawla Government Medical College and Hospital
Akshita Yadav	4040845	Rapture Biotech Company (NOIDA)
Shivanshi chauhan	4040846	CSIR -IHET PALAMPUR, HP
Tisha Aggarwal	4040847	National dairy research institute, Karnal
