LOCF/CERTIFICATE COURSE IN YOGA/KUK

Attainment of COs:

The attainment of Cos can be measured on the basis of the results of internal assessment and semester examination. The attainment is measured on scale of 3 after setting the target for COs attainment. Table 5 shows the CO attainment levels assuming the set target of 60% marks:

Table 5 : CO Attainment Levels for internal assessment.

Attainment Level	
1 (Low level of attainment)	50% of students score more than 50% of marks in class tests of a course.
2 (Medium level of attainment)	60% of students score more than 50% of marks in class tests of a course.
3 (High Level of attainment)	70% of students score more than 50% of marks in class tests of a course.

Note: In the above table, the set target is assumed as 50%. It may vary in different departments/institutes. The staff Councils of the departments/institutes may finalize the set target

A proper mapping of course outcomes with assessment methods should be defined before measuring the attainment level. The questions in tests for internal assessment are based on COs. Here it is assumed that class test – I is based on first two COs (i.e. CCY 101.1 and CCY 101.2) of a course with equal weightage given to both COs. Similarly class test – II is based on next two COs (i.e. CCY 101.3 and CCY 101.4) of a course with equal weightage given to these two COs. For each internal assessment test, the percentage of students attaining the target level of CO is estimated and average percentage will decide the attainment level of COs. Following steps may be followed for determining the attainment level in internal assessment of course.

- i. Estimate the %age of students scoring set target (say 50%) or more in the questions of test-I based on first CO i.e. CCY 101.1
- ii. Estimate the %age of students scoring set target (50%) or more in the question(s) of test-I based on second CO i.e. CCY 101.2
- iii. Estimate the %age of students scoring set target (50%) or more in the question(s) of test-II based on third CO i.e. CCY 101.3
- iv. Estimate the %age of students scoring set target (50%) or more in the question(s) of test-II based on fourth CO i.e. CCY 101.4
- v. Take average of the percentages obtained above.
- vi. Determine the attainment level i.e. 3, 2 or 1 as per scale defined in table 5.

LOCF/CERTIFICATE COURSE IN YOGA/KUK

Note: In the above steps, it is assumed that internal assessment is based on two tests only. However if internal assessment is based on more than two tests and/or on assignment then same may be incorporated to determine the CO attainment level. There may be more than four COs for a course. The set target may also be different for different Cos. These issues may be resolved by the Staff Councils of the departments/institutes.

For determining the attainment levels for end semester examination, it is assumed that questions in the end term examination are based on all COs of the course. Attainment levels for end semester examination of a course can be determined after the declaration of the results. The CO attainment levels for end semester examination are given in Table 6.

Table 6 : CO Attainment Levels for End Semester Examination (ESE)

Attainment Level	
1 (Low level of attainment)	60% of students obtained letter grade of A or above (for CBCS programs) or score more than 60% of marks (for non-CBCS programs) in ESE of a course.
2 (Medium level of attainment)	70% of students obtained letter grade of A or above (for CBCS programs) or score more than 60% of marks (for non-CBCS programs) in ESE of a course.
3 (High Level of attainment)	80% of students obtained letter grade of A or above (for CBCS programs) or score more than 60% of marks (for non-CBCS programs) in ESE of a course.

Note: In the above table, the set target is assumed as grade A for CBCS courses and 60% for non-CBCS courses. It may vary in different departments/institutes. The staff Councils of the departments/institutes may finalize the set target.

Overall CO Attainment level of a Course:

The overall CO attainment level of a course can be obtained as:

Overall CO attainment level = 50% of CO attainment level in Internal assessment + 50% of Co Attainment level in end semester examination.

The overall COs attainment level can be obtained for all the courses of the program in a similar manner.

LOCF/CERTIFICATE COURSE IN YOGA/KUK

Attainment of POs:

The overall attainment level of POs is based on the values obtained using direct and indirect methods in the ratio of 80:20. The direct attainment of Pos is obtained through the attainment of COs. The overall CO attainment value as estimated above and CO-PO mapping value as shown in Table 4 are used to compute the attainment of POs. PO attainment values obtained using direct method can be written as shown in the Table 7.

Table 7: PO Attainment Values using Direct Method

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9
CCY 101									
CCY 102									
Direct PO attainment	Average of above values	Average of above values	Average of above values	--	--	--	--	--	Average of above values

The PO attainment values to be filled in above table can be obtained as follows:

For CCY 101-PO1 Cell:

PO1 attainment value = (Mapping factor of CCY 101-PO1 from Table 4 x Overall CO attainment value for the course CCY 101)/3

For CCY 104-PO1 Cell:

PO1 attainment value = (Mapping factor of CCY 104-PO1 from Table 4 x Overall CO attainment value for the course CCY 104)/3

Similarly values for each cell of Table 7 can be obtained. The direct attainment of POs is average of individual PO attainment values.

In order to obtain the PO attainment using indirect method, a student exit survey based on the questionnaire of POs may be conducted at end of last semester of the program. The format for the same is given in Table 8. Average of the responses from the outgoing students for each PO is estimated.

The overall PO attainment values are obtained by adding attainment values estimated using direct and indirect methods in the proportion of 80:20 as follows:

Overall attainment value for PO1 =[0.8 x average attainment value for PO1 using direct method (from table 7)] + [0.2 x average response of outgoing students for PO1].

Similarly overall attainment value can be obtained for each PO.

LOCF/CERTIFICATE COURSE IN YOGA/KUK

The overall PO attainment values obtained above are compared with set target. The set target for each PO may be different and can be finalized by the staff councils of the departments/institutes. If overall PO attainment value is less than the set target value then an action plan may be prepared for improvement in the subsequent academic session.

The overall PSO attainment level based on CO-PSO mapping values and overall CO attainment values can be obtained in a similar manner as above.
