

**KURUKSHETRA UNIVERSITY,
KURUKSHETRA**

Scheme of Examination and Syllabus

for

**B.Sc. Medical
Subject: Zoology**

Under

Choice Based Credit System (CBCS)
**(With effect from 2020-2021 in IIHS and 2021-22 in all affiliated
colleges in Phased Manner)**

Programme Outcomes (POs) for UG courses of Faculty of Life Sciences

1. To develop skills in graduate students to be able to acquire theoretical and practical knowledge in fundamentals of biology in respective disciplines of plants, animals, microbes and environment.
2. To inculcate ability to critically evaluate problems and apply lateral thinking and analytical skills for professional development.
3. To create awareness on ethical issues, good laboratory practices and biosafety.
4. To develop ability in youth for understanding basic scientific learning and effective communication skills.
5. To prepare youth for career in teaching, industry, government organizations and self reliant entrepreneurship.
6. To make students aware of natural resources and environment and its sustainable utilization.
7. To provide learning experience in students that instills deep interest in biological science for the benefit of society.

Programme Specific Outcomes (PSOs) for Zoology subject of B.Sc. Medical

1. Students will gain knowledge to develop acquaintance of animal species around them and variations in their life cycles/biology and their interaction with the environment.
2. Young students will be also be apprised about likeness between the physiological processes at the cellular and organismic levels.
3. Youth will be capable of using knowledge of subject and analytical methods in identifying and solving various complex situations of living forms and environment taking into consideration ethics and responsibilities.
4. Teaching of this subject will also develop ability in youth to have understanding of basic Zoology with effective communication ability.
5. This PG programme will develop youth who is aware of natural resources and their sustainable utilization.
6. This programme will develop personnel who can be capable of doing Masters in the subject and can develop career as teacher, in industry or as entrepreneur in the realms of the subject.

KURUKSHETRA UNIVERSITY, KURUSHETRA

Scheme of Examination for B.Sc. Medical under CBCS pattern w.e.f. session 2020-21 in IIHS, KUK and 2021-22 in all affiliated colleges in phased manner

Subject: Zoology

Semester	Course	Paper(s)	Credits	Internal marks	External Marks	Total	Exam Duration	Contact Hours per week

B.Sc. Zoology Semester-I
SYLLABUS
B-ZOO-101

Animal Diversity of Non-Chordates from Protozoa to Helminthes

Credits: 3

External Marks: 60

Internal Assessment: 15

Time allotted: 3 Hours

Objective: To understand the taxonomic position, general characteristics, body organization and origin and evolutionary relationship of animals belonging to different Phylum of Protozoa to Helminthes.

Course outcomes:

- CO101.1. Student will be able to describe unique characters and recognize life functions of phylum Protozoa, Porifera, Coelenterate and Helminthes
- CO101.2. Will be capable to identify the diversity and ecological role of phylum Protozoa, Porifera, Coelenterate and Helminthes.

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of short answer type 6 parts (2.0 marks each) covering the entire syllabus. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks.

SECTION - A

1. **Phylum Protozoa:**
 - i) General characters and classification up to order level
 - ii) Biodiversity and economic importance
 - iii) Type study of *Plasmodium*
 - iv) Parasitic protozoans: Life history, mode of infection and pathogenecity of *Entamoeba*, *Trypanosoma*, *Leishmania* and *Giardia*.
2. **Phylum Porifera:**
 - i) General characters and classification up to order level
 - ii) Biodiversity and economic importance
 - iii) Type study – *Sycon*
 - iv) Canal system in sponges
 - v) Spicules in sponges

SECTION - B

3. **Phylum – Coelentrata:**
 - i) General characters and classification up to order level
 - ii) Biodiversity and economic importance
 - iii) Type Study - *Obelia*
 - iv) Corals and coral reefs
 - v) Polymorphism in Siphonophores
4. **Phylum – Helminthes:**
 - i) General characters and classification up to order level
 - ii) Biodiversity and economic importance
 - iii) Type study – *Fasciola hepatica*
 - iv) Helminthes parasites: Brief account of life history, mode of infection and pathogenecity of *Schistosoma*, *Ancylostoma*, *Trichinella*, *Wuchereria* and *Oxyuris*.

B.Sc. Zoology Semester-I
SYLLABUS
B-ZOO-102

Animal Diversity of Non-Chordates from Annelida to Hemichordata

Credits: 3

External Marks: 60

Internal Assessment: 15

Time allotted: 3 Hours

Objective: To make students understand the general characteristics of animals Kingdom, body organization, taxonomic position and origin and evolutionary relationship belonging to Phylum Annelida up to Hemichordata.

Course Outcomes:

CO102.1. Student will be able to describe unique characters and recognize life functions of Phylum Annelida up to Hemichordata.

CO102.2. Will be capable to identify the diversity and ecological role of Phylum Annelida up to Hemichordata.

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of short answer type 6 parts (2.0 marks each) covering the entire syllabus. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks.

SECTION - A

1. **Phylum – Annelida:**
 - i) General characters and classification up to order level
 - ii) Biodiversity and economic importance of Annelida
 - iii) Type study – *Pheretima* (Earthworm)
 - vi) Metamerism in Annelida
 - v) Trochophore larva
2. **Phylum – Arthropoda:**
 - i) General characters and classification up to order level
 - ii) Biodiversity and economic importance of insects
 - vi) Type study – *Grasshopper*

SECTION - B

3. **Phylum - Mollusca:**
 - i) General characters and classification up to order level
 - ii) Biodiversity and economic importance
 - iii) Type study - *Pila*
 - iv) Torsion and detorsion in gastropoda
 - v) Respiration and foot
4. **Phylum – Echinodermata:**
 - i) General characters and classification up to order level
 - ii) Biodiversity and economic importance
 - vii) Type study – *Asterias* (Sea Star)
 - viii) Echinoderm larvae
 - ix) Aristotle's Lantern
5. **Phylum Hemichordata:** General Characters; Type Study of *Balanoglossus*

B.Sc. Zoology Semester-I
SYLLABUS
B-ZOO-103
(Zoology Practical Based on B-ZOO-101 & B-ZOO-102)

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours

Objective: To have practical knowledge about identification and understanding of the classification of invertebrates Phylum of Protozoa up to Echinodermata.

Course Outcome:

CO103.1. Students will be capable of identifying the characters and classification of invertebrates species.

CO103.2. Students will be able to realize and explain ecological and economic importance of different invertebrate species

A. Classification up to orders with ecological note and economic importance of the following animals:

1. Protozoa: Lamination of cultures of *Amoeba*, *Euglena* and *Paramecium*; permanent prepared slides: *Amoeba*, *Euglena*, *Trypanosoma*, *Noctiluca*, *Eimeria*, *Paramecium* (binary fission and conjugation), *Opalina*, *Vorticella*, *Balantidium*, *Nyctotherus*, radiolarian and foraminiferan ooze.
2. Parazoa (Porifera): *Sycon*, *Grantia*, *Euplectella*, *Hyalonema*, *Spongilla*, *Euspongia*
3. Coelenterata: *Porpita*, *Varella*, *Physalia*, *Aurelia*, *Rhizostoma*, *Metridium*, *Millipora*, *Alcyonium*, *Tubipora*, *Zoanthus*, *Madrepora*, *Favia*, *Fungia*, and *Astrea*. Permanent prepared slides: *Hydra* (W.M.), *Hydra* with buds, *Obelia* (colony and medusa), *Sertularia*, *Plumularia*, *Tubularia*, *Bougainvillea*, *Aurelia* (sense organs and stages of life history).
4. Platyhelminthes: *Dugesia*, *Fasciola*, *Taenia*, *Echinocoecus*. Permanent prepared slides: *Miracidium*, *Sporocyst*, *Redia*, *Cercaria*, *Scolex* and *Proglottids* of *Taenia* (mature and gravid).
5. Aschelminthes: *Ascaris* (male and female), *Trichinella*, *Ancylostoma*, *Meloidogyne*
6. Annelida: *Pheretima*, *Heteronereis*, *Polynoe*, *Aphrodite*, *Chaetopterus*, *Arenicola*, *Tubifex* and *Pontobdella*
7. Arthropoda: *Peripatus*, *Palaemon* (Prawn), *Lobster*, *Cancer* (crab), *Sacculina*, *Eupagurus* (hermit crab), *Lepas*, *Balanus*, *Cyclops*, *Daphnia*, *Lepisma*, *Periplaneta* (cockroach), *Schistocerca* (locust), *Poeciloceris* (ak-hopper), *Gryllus* (cricket), *Mantis* (praying mantis), *Cicada*, *Forticula* (earwig), Dragon fly, termite queen, bug, moth, beetle, *Polistes* (wasp), *Apis* (honey bee), *Bombyx* (silk moth), *Cimex* (bed bug), *Pediculus* (body louse), *Millipede*, *Scolopendra* (centipede), *Palamnaeus* (scorpion), *Aranea* (spider), *Limulus* (king crab)
8. Mollusca: *Mytilus*, *Ostrea*, *Cardium*, *Pholas*, *Solen* (razor / Fish), *Pecten*, *Holiotis*, *Patella*, *Aplysia*, *Doris*, *Limax*, *Loligo*, *Sepia*, *Octopus*, *Nautilus* (complete and T.S.), *Chiton* and *Dentalium*
9. Echinodermata: *Asterias*, *Echinus*, *Cucumaia*, *Ophiothrix*, *Antedon* and *Asterophyton*
10. Hemichordata: *Balanoglossus*

(B). Study of the following permanent stained preparations:

1. L.S. and T.S. *Sycon*; gemmules, spicules and spongin fibres of *Sycon*, canal system of sponges
2. T.S. *Hydra* (testis and ovary region)
3. T.S. *Fasciola* (different regions)
4. T.S. *Ascaris* (male and female)
5. T.S. *Pheretima* (pharyngeal and typhlosolar regions), Setae, septal nephridia and spermathecae of *Pheretima*.
6. Trachea and mouthparts of cockroach.
7. Statocyst of *Palaemon*.
8. Glochidium larva of *Anodonta*; radula and osphradium of *Pila*.
9. T.S. Star fish (arm).
10. T.S. *Balanoglossus* (through various regions).

(C) Preparation of the following slides:

1. Temporary preparation of *Volvo*, *Paramecium*, Gemmules and spicules of *Sycon*; mouth parts and trachea of *Periplaneta* (cockroach).
2. Preparation of permanent stained whole mounts of *Hydra*, *Obelia*, *Sertularia*, *Plumularia* and *Bougainvillea*.
3. Preparation of mouth parts of Mosquito, House fly and cockroach.

(D) Study of Internal Anatomy

1. Computer, simulated study/ model of:
 - (i) *Earthworm*: Digestive, reproductive and nervous systems
 - (ii) *Pila* : Pallial complex, digestive and nervous system
2. Demonstration of internal anatomy of cockroach: Digestive, reproductive and nervous systems

GUIDELINES/INSTRUCTIONS FOR PRACTICAL EXAMINATION (SEMESTER-I)

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours (One session)

Note : Following exercises will be set in the examination as per marks assigned for each.

	Exercise	Marks allotted
1.	Internal Anatomy – One (Labelled diagram)	03
2.	Permanent Slide Preparation - one (Staining, identification, sketch)	06
3.	Museum specimens – Seven (Identification and classification)	14 (7x2)
4.	Ecological note – One specimen	03
5.	Permanent slides – Two (Identification with reasons)	04 (2x2)
6.	Practical record and slides	05
7.	Viva-voce	05

B.Sc. Zoology Semester-II
SYLLABUS
B-ZOO-201

Animal Diversity of Chordates from Protochordata to Pisces

Credits: 3

External Marks: 60

Internal Assessment: 15

Time allotted: 3 Hours

Objective: To make students understand the basic characters of Chordates, origin and ancestry of chordates from protochordates and about the general characters, scale and fin pattern in class Pisces.

Course Outcomes:

- CO201.1. Through this core course the students will be capable of identifying different protochordate and will be capable of Imparting conceptual knowledge of protochordates, their adaptations and associations in relation to their environment.
- CO201.2. Will be able to understand the basic concepts of evolutionary relationship among protochordates and fishes.

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of short answer type 6 parts (2.0 marks each) covering the entire syllabus. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks.

SECTION - A

Functional morphology of the types included with special emphasis on the adaptations to their modes of life and environment. General characters and classification of all phyla upto orders with examples emphasizing their biodiversity, economic importance and conservation measures where required.

1. **Chordates:** Salient features of chordates; Principles of classification; Origin and Evolutionary tree.
2. **Protochordates:** Systematic position, distribution, ecology, morphology and affinities of protochordates
Urochordata: *Herdmania* – type Study
Cephalochordata: *Amphioxus* – type study

SECTION - B

3. Agnatha: Classification upto orders

Cyclostomata: General characters and classification upto order level. Affinities and ecological significance

Petromyzon: Structural & functional morphology

4. **Pisces:** General characters and classification up to orders with examples emphasizing their biodiversity
Scales & Fins, Parental care in fishes, fish migration.

Type study of Labeo

Note: Type study includes detailed study of various systems of the animal.

B.Sc. Zoology Semester-II
SYLLABUS
B-ZOO-202

Animal Diversity of Chordates from Amphibia to Mammalia

Credits: 3

External Marks: 60

Internal Assessment: 15

Time allotted: 3 Hours

Objective: To make students capable of Identifying (using key features) and differentiate between vertebrate groups including amphibians, reptiles, birds, and mammals.

Course Outcomes:

CO202.1. Students will be able to understand evolutionary lines of vertebrate class including amphibians, reptiles, birds, and mammals.

CO202.2. Students will be able to identify (based on morphological characters) and understand adaptations in vertebrate class including amphibians, reptiles, birds, and mammals.

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of short answer type 6 parts (2.0 marks each) covering the entire syllabus. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks.

SECTION - A

1. **Amphibia:** General Characters and Classification upto orders; Origin, Evolutionary tree. Type study of frog (*Rana tigrina*), Parental Care and Neoteny in Amphibia
2. **Reptilia:** General Characters and Classification upto orders, Type study of Lizard (*Hemidactylus*): Structural & Functional morphology, Origin, Evolutionary tree. Extinct reptiles; Poisonous and non-poisonous snakes; Poison apparatus in snakes.

SECTION - B

3. **Aves:** General Characters and Classifications upto orders. Type study of Pigeon (*Columba livia*); Structural & Functional morphology
Aerial adaptation, Principles of aerodynamics in Bird flight, migration in birds.
4. **Mammals:** General Characters and classification up to orders;
type study of Rat; Adaptive radiations of mammals, dentition.
Affinities of Prototheria, metatheria & eutheria

Note: Type study includes detailed study of various systems of the animal.

B.Sc. Zoology Semester-II
SYLLABUS
B-ZOO-203
(Zoology Practical Based on B-ZOO-201 & B-ZOO-202)

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours

Objective: To make students understand the classification of vertebrates Phylum and ways of identifying respective species

Course Outcomes:

CO203.1. Students will be able to classify and identify vertebrates' species and their skeleton

CO203.2. Learners will also realize and understand economic importance of the vertebrate species and will be aware about their conservation.

1. Classification upto orders, habit, habitats, external characters and economic importance (if any) of the following animals:-

- Protochordata: *Molgula, Hetryllus, Pyrosoma, Doliolum, Olikopleura*, and *Amphioxus*.
- Cyclostomata: *Myxine, Petromyzon* and *Ammocoetus larva*.
- Chondrichthyes: *Zygaena, Pristis, Narcine* (electric ray), *Trygon, Rhinobatus, Raja* and *Chimaera*.
- Osteichthyes: *Acipenser, Lepidosteus, Muraena, Mystus, Catla, Hippocampus, Syngnathus, Exocoetus, Anabas, Diodon, Ostracion, Tetradon, Echinus, Lophius, Solea* and *Polypterus*. Any of the Lung Fishes.
- Amphibia: *Necturus, Proteus, Amphiuma, Salamandra, Amblystoma, Axolotl larva, Alytes, Bufo, Rana*.
- Reptilia: *Hemidactylus, Calotes, Draco, Varanus, Phrynosoma, Chamaeleon, Typhlops, Python, Eryx, Ptyas, Bungarus, Naja, Hydrus, Viper, Crocodilus, Gavialis, Chelone* (Turtle) and *Testudo* (Tortoise).
- Aves: *Casuarus, Arden, Anas, Milvus, Pavo, Eudynamis, Tyto, Alcedo, Halcyon*
- Mammalia: *Ornithorhynchus, Echidna, Didelphis, Macropus, Loris, Macaque, Hystrix, Funambulus, Felix, Panthera, Canis, Herpestes, Capra, Pteropus*.

2. Internal anatomy of the following animals:

(i) Computer simulated model/study of :

(a) *Herdmania*: General anatomy

(b) *Rat*: Digestive, arterial, venous and urinogenital systems.

(c) *Hemidactylus*: Digestive, arterial, venous and urinogenital systems

(ii) Demonstration & Study of Internal Anatomy of locally available fish (*Labeo*). Digestive and reproductive systems, cranial nerves, Ear ossicle

3. Study of the skeleton of *Scoliodon*, *Labeo*, *Rana* (Frog), *Varanus*, Pigeon or Gallus and *Orcyctolagus*/rat, Palates of birds, skulls of dog & rabbit.
4. Study of the following prepared slides:
Tornaria larva, T.S. *Amphioxus* (through different regions). Oikopleura, Histology of rat (compound tissues), different types of scales.
5. Make permanent stained preparations of the following:
Salpa, Spicules, and Pharynx of *Herdmania*, *Amphioxus*, Cycloid scales
6. Field Visit to National Park or Zoo.

GUIDELINES/INSTRUCTIONS FOR PRACTICAL EXAMINATION (SEMESTER-II)

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours (One session)

Note : Following exercises will be set in the examination as per marks assigned for each.

Exercise	Marks allotted
1. Internal Anatomy – One (Labelled diagram)	03
2. Permanent Slide Preparation - one (Staining, identification, sketch)	06
3. Museum specimens – Six (Identification and classification)	12 (6x2)
4. Bone – Two pieces (Identification with reasons)	05
5. Permanent slides – Two (Identification with reasons)	04 (2x2)
6. Practical record, Field report and slides	05
7. Viva-voce	05

SYLLABUS
B-ZOO-301
Animal Biochemistry and Physiology

Credits: 3

External Marks: 60

Internal Assessment: 15

Time allotted: 3 Hours

Objective: To make students understand the structure and classification of bio-molecules, dynamics of enzymes and concept of physiology of bones and muscles.

Course Outcomes:

CO301.1. Students will be able to understand and explain the mechanism that works to keep the human body functioning.

CO301.2. Students will be able to explain the interaction and interdependence of physiological and biochemical processes.

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of short answer type 6 parts (2.0 marks each) covering the entire syllabus. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks.

SECTION - A

1. Introduction, Classification, Structure, function and general properties of proteins, carbohydrates and lipids.
2. Nomenclature, Classification and mechanisms of enzyme action; **Energy Kinetics of enzymes, factors affecting enzyme activity, inhibition of enzymes**
3. Transport through biomembranes (Active and Passive), **osmotic pressure, hydrogen ion concentration and buffers**

SECTION - B

4. **Nutrition:** Nutritional components: Carbohydrates, fats, lipids, Vitamins and Minerals; Types of nutrition & feeding, Digestion of dietary constituents, viz. lipids, proteins, carbohydrates & nucleic acids; symbiotic digestion, **lactose intolerance, Physico- chemical mechanism of Absorption** of nutrients & assimilation; **control of secretion of digestive juices.**
5. **Muscles:** Types of muscles, ultra-structure of skeletal muscle, **neuromuscular junction.** Bio-chemical and physical events during muscle contraction, single muscle twitch, tetanus, muscle fatigue, muscle tone, oxygen debt., Cori's cycle, single unit smooth muscles, their physical and functional properties.
6. **Bones:** Structure and types, classification, bone growth and resorption, effect of ageing on Skeletal system and bone disorders

B.Sc. Zoology Semester-III

SYLLABUS

B-ZOO-302

Mammalian Physiology and endocrinology

Credits: 3

External Marks: 60

Internal Assessment: 15

Time allotted: 3 Hours

Objective: To impart the fundamental knowledge of physiology and endocrine system of animals

Course Outcomes:

CO302.1. It will make the students understand the appropriate functioning of each body system in animals and mechanism of working.

CO302.2. Students will be able to explain the mechanism of action of hormones and related molecules involved in various physiological processes

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of short answer type 6 parts (2.0 marks each) covering the entire syllabus. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks.

SECTION - A

1. **Circulation:** Origin, conduction and regulation of heart beat; cardiac cycle, electrocardiogram, cardiac output, fluid pressure and flow pressure in closed and open circulatory system; Composition and functions of blood & lymph; Mechanism of coagulation of blood, coagulation factors; anticoagulants, haemopoiesis.
2. **Respiration:** Exchange of respiratory gases, transport of gases, lung air volumes, oxygen dissociation curve of haemoglobin, Bohr's effect, Hamburger's phenomenon (Chloride shift), control / regulation of respiration (**peripheral reflexes, chemical control and Higher centres**), **Myoglobin**.
3. **Excretion:** Patterns of excretory products viz. Amonotelic, ureotlic uricotelic, ornithine cycle (Kreb's – Henseleit cycle) for urea formation in liver; Urine formation, **composition of Urine**, counter-current mechanism of urine formation, osmoregulation, micturition.

SECTION - B

4. **Neural Integration:** Nature, origin and propagation of nerve impulse alongwith medullated & non-medullated nerve fibre, conduction of nerve impulse across synapse, **synaptic delay and synaptic fatigue, Neurotransmitter**.
5. **Chemical integration of Endocrinology:** **Structure, chemical nature** and mechanism of **peptide and steroid hormone** action; physiology of hypothalamus, pituitary, thyroid, parathyroid, adrenal, pancreas and gonads, **Hormonal disorders**.
6. **Reproduction:** Spermatogenesis, Capacitation of spermatozoa, ovulation, formation of corpus luteum, oestrous-anoestrous cycle, Menstrual cycle in human, fertilization, implantation and gestation, **parturition**

B.Sc. Zoology Semester-III
SYLLABUS
B-ZOO-303
(Zoology Practical Based on B-ZOO-301 & B-ZOO-302)

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours

Objective: To develop practical knowledge of various physiological experiments and their role in various biological processes

Course Outcomes:

CO303.1. Students will be able to understand and perform biological and analytical techniques in labs to explain biological activities

CO303.2. Will be able to perform experiments of haematology like DLC, Blood group testing etc.

1. Qualitative tests for identification of simple sugars, disaccharides and polysaccharides.
2. Study of human salivary amylase activity: Effect of temperature, pH, Concentration.
3. Estimation of abnormal constituents of urine (Albumin, sugar, ketone bodies).
4. Use of Kymograph unit & respirometer.
5. Haematin crystal preparation.
6. Estimation of Hb.
7. DLC of Man/RBC count/WBC count.
8. Study of permanent slides of endocrine glands
9. Blood antigens and antibodies: Blood group testing

GUIDELINES/INSTRUCTIONS FOR PRACTICAL EXAMINATION (SEMESTER-III)

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours (One session)

Note : Following exercises will be set in the examination as per marks assigned for each.

	Exercise	Marks allotted
1.	Qualitative tests for (Sugars, disaccharides and polysaccharides)	04
2.	Biochemical exercise	06
3.	Haematin crystal Exercise	08
4.	Blood exercise	08
5.	Permanent slides – Two (Identification with reasons)	04 (2x2)
6.	Practical record and slides	05
7.	Viva-voce	05

B.Sc. Zoology Semester-IV
SYLLABUS
B-ZOO-401
Cell Biology

Credits: 3

External Marks: 60

Internal Assessment: 15

Time allotted: 3 Hours

Objective: To apprise students about the dynamics of cell and biology of cancer

Course Outcomes:

CO401.1. Students will understand the nature and basic concept of cell biology and genetics.

CO401.2. Students will be able to apply the knowledge of internal structure of cell and their role in many metabolic function of organism

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of short answer type 6 parts (2.0 marks each) covering the entire syllabus. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks.

SECTION - A

1. Ultrastructure of different cell organelles of animal cell.
2. **Plasma Membrane:** Fluid mosaic model, various modes of transport across the membrane, mechanism of active and passive transport, endocytosis and exocytosis.
3. **Endoplasmic reticulum (ER):** types, role of ER in protein synthesis and transportation in animal cell.
4. **Golgi complex:** Structure, associated enzymes and role of golgi-complex in animal cell.
5. **Ribosomes:** Types, biogenesis and role in protein synthesis.
6. **Lysosomes:** Structure, enzymes and their role; polymorphism
7. **Mitochondria:** Mitochondrial DNA as semiautonomous body, biogenesis, mitochondrial enzymes (only names), role of mitochondria.

SECTION – B

8. **Cytoskeleton:** Microtubules, microfilaments, centriole and basal body.
9. Cilia and Flagella
10. **Ultrastructure and functions of Nucleus:** Nuclear membrane, nuclear lamina, nucleolus, fine structure of chromosomes, nucleosome concept and role of histones, euchromatin and heterochromatin, lampbrush chromosomes and polytene chromosomes.
11. Mitosis and Meiosis (Cell reproduction)
12. Brief account of causes of cancer.
13. An elementary idea of cellular basis of Immunity.

B.Sc. Zoology Semester-IV
SYLLABUS
B-ZOO-402
Animal Genetics

Credits: 3

External Marks: 60

Internal Assessment: 15

Time allotted: 3 Hours

Objective: To apprise the students about various concepts of genetics and its importance in human health

Course Outcomes:

CO402.1. Students will have acquaintance with the basic causes associated with inborn errors and other genetic disorder and will be able to give counseling to general people

CO402.2. Students will be able to explain the concept of gene interactions, Sex linked inheritance and their role in medical sciences.

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of short answer type 6 parts (2.0 marks each) covering the entire syllabus. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks.

SECTION - A

1. Elements of **Heredity and variations.**
2. The varieties of **gene interactions**
3. **Linkage and recombination:** Coupling and repulsion hypothesis, crossing-over and chiasma formation; gene mapping.
4. **Sex determination and its mechanism:** male and female heterozygous systems, genetic balance system; role of Y-chromosome, male haploidy, cytoplasmic and environmental factors, role of hormones in sex determination.
5. **Sex linked inheritance:** Haemophilia and colour blindness in man, eye colour in Drosophila, Non-disjunction of sex-chromosome in Drosophila, Sex-linked and sex-influenced inheritance
6. **Extra chromosomal and cytoplasmic inheritance:**
 - i) Kappa particles in Paramecium
 - ii) Shell coiling in snails
 - iii) Milk factor in mice

SECTION - B

7. **Multiple allelism:** Eye colour in Drosophila; A, B, O blood group in man.
8. **Human genetics:** Human karyotype, Chromosomal abnormalities involving autosomes and sex chromosomes, monozygotic and dizygotic twins.
9. **Inborn errors of metabolism** (Alcaptonuria, Phenylketonuria, Albinism, sickle-cell anaemia).
10. **Nature and function of genetic material:** Structure and type of nucleic acids; Replication and Protein synthesis.
11. Eugenics, eugenics and euphenics; spontaneous and induced (chemical and radiations) mutations; gene mutations; chemical basis of mutations; transition, transversion, structural chromosomal aberrations (deletion, duplication, inversion and translocation); Numerical aberrations (autopolyploidy, euploidy and polyploidy in animals)
12. **Applied genetics:** genetic counseling, pre-natal diagnosis, DNA-finger printing, transgenic animals.

B.Sc. Zoology Semester-IV
SYLLABUS
B-ZOO-403
(Zoology Practical Based on B-ZOO-401 & B-ZOO-402)

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours

Objective: To develop the laboratory skill of preparing slides of cell divisions and genetic basis of karyotyping

Course Outcomes:

CO403.1. Students will be able to conduct the morphometric analysis of chromosomes and demonstrate cell division

CO403.2. Students will be able to identify variations in human chromosomes

Cell biology and Genetics:

1. Cell division: Prepared slides of stages of mitosis and meiosis.
2. Salivary gland and polytene chromosomes of *Drosophila*/ *Chironomus*.
3. Temporary squash preparations of onion root tip / grasshopper testis for the study of mitosis using acetocarmine stain.
4. Blood antigens and antibodies: Blood group testing
5. Preparation of Human Karyotype and Idiogram
5. Barr Body and Drum stick slide Preparations

GUIDELINES/INSTRUCTIONS FOR PRACTICAL EXAMINATION (SEMESTER-IV)

Credits: 2

External Marks: 40

Internal Assessment : 10

Time allotted: 4 Hours (One session)

Note : Following exercises will be set in the examination as per marks assigned for each.

	Exercise	Marks allotted
1.	Preparation of chromosome slide (root tip / grasshopper testis)	10
2.	Karyotype/Idiogram preparation	05
3.	Barr Body/Drum stick slide preparation	10
4.	Blood antigen/antibody testing	05
5.	Practical record and slides	05
6.	Viva-voce	05

***Students have to opt one option/scheme of DSE Zoology either (i) or (ii)**

B.Sc. Zoology Semester-V
SYLLABUS
B-ZOO-501 (i)
Ecology and Environment

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 3 Hours

Objective: To apprise the students about interaction between organisms and environment and exchange of nutrients within the ecosystem.

Course Outcomes:

CO501(i).1. Students will be able to describe the various biological interactions and relation between abiotic and biotic factors.

CO501(i).2. Students will be able to understand the causes of different types of pollution and their management strategies.

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of 8 parts (1.0 marks each) covering the entire syllabus. Answer to each part should not exceed 20 words. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks.

SECTION - A

1. **Basic concepts of ecology:** Definition, significance. Concepts of habitat and ecological Niche.
2. **Factors affecting environment:** Abiotic factors (light-intensity, quality and duration), temperature, humidity, wind, Rainfall, topography; edaphic factors; Biotic factors.
3. Introduction to major ecosystems of the world.
4. **Ecosystem:** Concept, components, properties and functions; Ecological energetics and energy flow-food chain, food web, trophic structure; ecological pyramids, concept of productivity.
5. **Biogeochemical cycles:** Concept, reservoir pool, gaseous cycles and sedimentary cycles.

SECTION - B

6. **Population:** Growth and regulation.
7. Concept of biodiversity and conservation of natural resources.
8. Migration in fishes and birds.
9. Parental care in animals.
10. **Population interactions:** Competition, predation, parasitism, commensalisms and mutualism.
11. **Environmental Pollution:** Air, water, soil and management strategies.

B.Sc. Zoology Semester-V
SYLLABUS
B-ZOO-502 (i)
Evolution and Developmental Biology

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 3 Hours

Objectives:

1. To make students aware how species evolve and the theory of natural selection, population dynamics.
2. To understand how organisms maintain gametic population and understand fertilization process.

Course Outcomes:

- CO502(i).1. This course will enable the students to understand the evolution of life on earth and theories in evolutionary biology.
- CO502(i).2. Students will be able to describe the events that lead up to fertilization, its stages and cellular mechanisms for gastrulation, and embryonic development.

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of 8 parts (1.0 marks each) covering the entire syllabus. Answer to each part should not exceed 20 words. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks.

SECTION - A

1. Origin of life.
2. Concept and evidences of organic evolution.
3. Theories of organic evolution.
4. Concept of micro, macro-and mega-evolution.
5. Concept of species
6. Phylogeny of horse.
7. Evolution of man.

SECTION - B

8. Historical perspectives, aims and scope of developmental biology.
9. Generalized structure of mammalian ovum & sperm, spermatogenesis and Oogenesis, fertilization, parthenogenesis, different types of eggs and patterns of cleavage.
10. Process of blastulation and fate-map construction in frog and chick.
11. Gastrulation in frog and chick upto the formation of three germinal layers.
12. Elementary knowledge of primary organizers.
13. Elementary knowledge of extra embryonic membranes.
14. Concepts of competence, determination and differentiation.
15. Concept of regeneration.

B.Sc. Zoology Semester-V
SYLLABUS
B-ZOO-503 (i)
(Zoology Practical Based on B-ZOO-501(i) & B-ZOO-502(i))

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours

Objective: To impart practical knowledge to the students to perform experiments to identify stages of chick development, preparation of histological slides and analyse water quality

Course Outcomes:

CO503(i).1. Students will be able to prepare and identify the histological slides of various organs and different stages of developing embryo

CO503(i).2. Learners will be and will able to analyze the level of pollution and quality of water in any aquatic system.

1. Preparation of permanent/temporary slides of developmental stages of frog/mosquito.
2. Study of Life History of Frog.
3. Study of permanent slides of WM of chick embryo (13-18h, 24-36h, 36-48h, 48-72h).
4. Window preparation and identification of stages of development in chick egg.
5. **Histology:** Preparation of permanent histological slides of testis, ovary, kidney, intestine, liver of rat (H & E staining).
6. Chemical analysis of pond water and soil ecosystem for pH, dissolved oxygen, BOD, free CO₂, nitrates, phosphates and chlorides.

GUIDELINES/INSTRUCTIONS FOR PRACTICAL EXAMINATION (SEMESTER-V)

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours (One session)

Note : Following exercises will be set in the examination as per marks assigned for each.

	Exercise	Marks allotted
1.	Preparation of Chick window / W.M. of Chick embryo	10
2.	Permanent preparation of histological slides (Staining, mounting, identification & sketch)	10
3.	Permanent slides – Two (Identification with reasons)	04 (2x2)
4.	Chemical analysis of water/soil	06
5.	Practical record and slides	05
6.	Viva-voce	05

B.Sc. Zoology Semester-V
SYLLABUS
B-ZOO-501 (ii)
Applied Zoology

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 3 Hours

Objective: To identify various methodology and perspectives of applied branches of zoology for the possibilities of self-employment and for the use of knowledge in human welfare and food security.

Course Outcomes:

CO501(ii).1. Students will be able to identify different species and casts of honeybees and species of silkworm.

CO501(ii)2. Students will be able to use the tools and techniques used in apiculture, sericulture, aquaculture, piggery poultry and leather Industry and capabilities to initiate startups will develop

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of 8 parts (1.0 marks each) covering the entire syllabus. Answer to each part should not exceed 20 words. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks.

SECTION - A

1. Apiculture: History and Introduction; Honey bee and kinds; Social organization and colony nests; Lifecycle; Honey composition, quality and importance; Bee keeping, selection, methods, products.
2. Sericulture: Silkworm moth species and their life cycle; Silk composition, kind and uses; Rearing of silkworm, silk reeling, twisting and weaving; Diseases and pests of silkworm
3. Prawn Culture: Introduction to Prawns, species; Prawn Farming methods, processing and preservation of prawns.
4. Pearl Culture: Historical Background, species; Pearl formation, composition, quality and commercial value, Artificial culturing, synthetic pearl types and their manufacturing, methods of harvesting.

SECTION - B

5. Pisciculture: Economically important fresh water and marine fishes; Fish culture, Fish farming technologies, Problems of seed collection from natural resources, Induced breeding methods, Products and by products from pisciculture
6. Poultry: Nomenclature and breeds of poultry birds; Egg structure and quality, nutritive values, factors affecting size and egg processing, Poultry products and by products
7. Fur and Leather Industry: Fur producing animals; Fur farming, dressing, processing and dyeing, Fur industry in India; Animals of leather industry, processing of skin, flaying, curing salting and tanning.
8. Piggery and other Utilities of Animals: Characteristics of swine and important breeds, Products and by products; Pharmaceuticals from animals; Uses of animals in vaccine production

B.Sc. Zoology Semester-V
SYLLABUS
B-ZOO-502 (ii)
Recent techniques in Zoology

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 3 Hours

Objective: To acquaint students about the biological processes at chemical, biochemical and molecular level to perform wide range of analytical techniques to explore biological activities.

Course Outcomes:

CO502(ii).1. Students will be able to use and explain the tools and techniques available for studying biochemical and biophysical nature of life.

CO502(ii).2. Students will be able to carry out small project work and research based on these techniques

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of 8 parts (1.0 marks each) covering the entire syllabus. Answer to each part should not exceed 20 words. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks.

SECTION - A

1. **Centrifugation:** Basic principles, theory and applications of preparative and analytical centrifugation, Rotor types, sedimentation co-efficient and care of rotors.
2. **Chromatography:** Theory, principle and application of column, paper, thin layer, ion-exchange affinity chromatography.
3. **Spectroscopy:** Lambert Beer's law, theory, principles and instrumentation of single and double beam UV/Visible spectroscopy.
4. **Electrophoresis:** Theory and application of SDS-PAGE and Agarose gel electrophoresis.

SECTION - B

5. **Radioisotopic techniques:-** Basic concepts of radioisotopy, Theory and applications of Geiger-Muller tube, solid and liquid scintillation counters, primary and secondary fluors, safety rules for radioisotopic studies, biological applications.
6. **Microscopy-** Principles and techniques of Microscopy, Light Microscopy, Phase contrast, Fluorescence, Stereomicroscope and Electron Microscope (SEM and TEM). Principles and uses of pH Meter, Calorimeter, Microtome.
7. **PCR-**General principle, working and its applications.

B.Sc. Zoology Semester-V
SYLLABUS
B-ZOO-503 (ii)
(Zoology Practical Based on Zoo-501(ii) & Zoo-502(ii))

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours

Objective: To provide the students with the knowledge about the equipments, their working and use for water analysis.

Course Outcomes:

CO503(ii).1. Students will develop skills in basic laboratory techniques and understand the principles in biology.

CO503(ii).2. Students will be capable to apply the scientific method to the process of experimentation.

1. Demonstration of safety rules in laboratory like proper handling of equipments, specimens and disposal of syringes, needles, etc. Use of autoclave, centrifuge and spectrophotometer. Parts of microscope, its functioning and care.
2. Cleaning and sterilization of glasswares using hot air oven, autoclave, etc.
3. Life history stages of honeybee.
4. Morphology of Carp, Cat fish and Perch.
5. Preparation of permanent slides of phytoplankton and zooplanktons which constitute the food of commercial fishes, their identification and study of important characters.
6. Electrophoresis techniques-preparations of gels, media, buffers and demonstration of gel electrophoresis.
7. Perform thin layer chromatography for the separation of compounds.
8. Estimation of following chemical parameters of pond water:- Temperature, pH, Dissolved oxygen, Total dissolved solids, Hardness.
9. Visit to apiary/fish pond and fish market/sericulture unit/Prawn farm and preparation of report.

GUIDELINES/INSTRUCTIONS FOR PRACTICAL EXAMINATION (SEMESTER-V)

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours (One session)

Note : Following exercises will be set in the examination as per marks assigned for each.

	Exercise	Marks allotted
1.	Preparation of permanent mount (Staining, Mounting, identification and sketch)	10
2.	Spots (5) (Fish, Stage of honey bee) (Identification with reasons)	10 (2x5)
3.	Write up for any one experiment (Electrophoresis, TLC)	04
4.	Chemical analysis of water/soil	06
5.	Practical record, Field report and slides	05
6.	Viva-voce	05

B.Sc. Zoology Semester-VI
SYLLABUS
B-ZOO-601 (i)
Aquaculture

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 3 Hours

Objective: To apprise the students with the necessary basic information about fishery and aquaculture and to provide the technical and general knowledge necessary for competent fisheries management.

Course Outcomes:

CO601(i).1. Students will understand concepts of fisheries, fishing tools and site selection for a fishery/aquaculture industry

CO601(i).2. Students will be capable to undertake the small Aqua culture projects and will be able to explain induced breeding and post harvesting techniques.

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of 8 parts (1.0 marks each) covering the entire syllabus. Answer to each part should not exceed 20 words. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks

SECTION - A

1. **Introduction to world fisheries:** Production, utilization and demand.
2. **Fresh Water fishes of India:** River system, reservoir, pond, tank fisheries; captive and culture fisheries, cold water fisheries.
3. Fishing crafts and gears.
4. Fin fishes, Crustaceans, Molluscs and their culture.

SECTION - B

5. **Seed production:** Natural seed resources – its assessment, collection, Hatchery production
6. **Nutrition:** Sources of food (Natural, Artificial) and feed composition (Calorie and Chemical ingredients).
7. **Field Culture:** Culture, Culture in Pond-running waters; recycled water culture, cage culture; poly culture.
8. **Culture technology:** Induced breeding in fishes, techniques and hormones; Fish Biotechnology (Transgenesis and Cryopreservation of gametes).

B.Sc. Zoology Semester-VI
SYLLABUS
B-ZOO-602 (i)
Pest Management

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 3 Hours

Objective: To impart knowledge for the identification of the different species of insect pests and learning of pest management techniques with the understanding of practical application of pesticides and their proper use.

Course Outcomes:

CO602(i).1. Students will be able to understand ecologically important and harmful insects.

CO602(i).2. Will be able to recognize ecology and morphology of insect pest and the nature of damage done by them.

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of 8 parts (1.0 marks each) covering the entire syllabus. Answer to each part should not exceed 20 words. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks

SECTION - A

Study of important insect pests of crops and vegetables:

1. **Sugarcane:** (With their systematic position, habits and nature of damage cause. Life cycle and control of *Pyrilla perpusilla* only).
 - (a) Sugarcane leaf-hopper (*Pyrilla perpusilla*)
 - (b) Sugarcane Whitefly (*Aleurolobus barodensis*)
 - (c) Sugarcane top borer (*Sciropophaga nivella*)
 - (d) Sugarcane root borer (*Emmalocera depresella*)
 - (e) Gurdaspur borer (*Bissetia steniellus*)
2. **Cotton:** (With their systematic position, habits and nature of damage caused. Life cycle and control of *Pectinophora gossypiella*)
 - (a) Pink bollworm (*Pectinophora gossypiella*)
 - (b) Red cotton bug (*Dysdercus cingulatus*)
 - (c) Cotton grey weevil (*Myloccerus undecimpustulatus*)
 - (d) Cotton Jassid (*Amrasca devastans*)
3. **Wheat:** Wheat stem borer (*Sesamia inferens*) with its systematics position, habits, nature of damage caused. Life cycle and control.
4. **Paddy:** (With their systematic position, habits and nature of damage caused. Life cycle and control of *Leptocorisa acuta*)
 - (a) Gundhi bug (*Leptocorisa acuta*)
 - (b) Rice grasshopper (*Hieroglyphus banian*)
 - (c) Rice stem borer (*Scirpophaga incertullus*)
 - (d) Rice Hispa (*Diceladispera armigera*)
5. **Vegetables:** (Their systematics position, habits and nature of damage caused. Life cycle and control of *Aulacophora faveicollis*)
 - (a) *Raphidopalpa faveicollis* – The Red pumpkin beetle.
 - (b) *Dacus cucurbitas* – The pumpkin fruit fly.
 - (c) *Tetranychus tecarius* – The vegetable mite.
 - (d) *Epilachna* – The Hadda beetle

SECTION - B

6. **Stored grains:** (Their systematic position, habits and nature of damage caused. Life cycle and control of *Trogoderma granarium*)
 - (a) Pulse beetle (*Callosobruchus maculatus*)
 - (b) Rice weevil (*Sitophilus oryzae*)
 - (c) Wheat weevil (*Trogoderma granarium*)
 - (d) Rust Red Flour beetles (*Tribolium castaneum*)
 - (e) Lesser grain borer (*Rhizopertha dominica*)
 - (f) Grain & Flour moth (*Sitotroga cerealella*)

7. **Insect control:** Biological control, its history, requirement and precautions and feasibility of biological agents for control.

8. **Chemical control:** History, Categories of pesticides, important pesticides from each category to pests against which they can be used, insect repellants and attractants.

9. Integrated pest management.

10. Important bird and rodent pests of agriculture & their management.

B.Sc. Zoology Semester-VI

SYLLABUS

B-ZOO-603 (i)

(Zoology Practical Based on B-ZOO-601(i) & B-ZOO-602(i))

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours

Objective: To develop observational, analytical and Evaluation skills related to B-ZOO -601 and B-ZOO -602 paper

Course Outcomes:

CO603(i).1. Students will able to identify insect pests and the nature of damage caused by them

CO603(i).2. They will also understand the ecology and life history of these insect pests

- External morphology, identification marks, nature of damage and host of the following pests:-
 - Sugarcane** : Sugarcane leaf-hopper, Sugarcane whitefly, Sugarcane top borer, Sugarcane root borer, Gurdaspur borer (any two).
 - Cotton** : Red Cotton bug
 - Wheat** : Wheat stem borer
 - Paddy** : Gundhi bug, Rice grasshopper, Rice stem borer, Rice hispa (any one).
 - Vegetables:** *Aulocophora faveicollis*, *Dacus cucurbitas*, *Tetranychus tecarius*, *Epilachna* (any three).
 - Pests of stored grains:** Pulse beetle, Rice weevil, Grain & Flour moth, Rust-red flour beetle, lesser grain borer (any three).
- Stages of life history of silk moth and honey bee.
- Identification of *Catla*, *Labeo rohita*, *L. calbasu*, *Cirrhinus*, *mrigala*, *Puntius sarana*, *Channa punctatus*, *C. marulius*, *C. stariatus*, *Trichogaster fasciata*, *Mystus seenghala*, *M. cavasius*, *M. tengra*, *Callichrous pabola*, *C. bimaculatus*, *Wallago attu*, *Prawns*, *Crabs*, *Lobsters*, *Calms*, *Mussels* & *Oysters*.
- A study of the slides of fish parasites.
- A study of the different types of nets, e.g., cast net, gill net, drift net and drag net.
- A visit to lake/reservoir/fish breeding centre.
- Adaptive modifications in feet and beaks of birds.
- Preparation of permanent/temporary slides for identification of mosquitoes

GUIDELINES/INSTRUCTIONS FOR PRACTICAL EXAMINATION (SEMESTER-VI)

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours (One session)

Note : Following exercises will be set in the examination as per marks assigned for each.

Exercise	Marks allotted
1. Preparation of Mosquito Head Slides and identification	10
2. Museum specimens/slides – Eight (Identification and classification)	16 (8x2)
3. Adaptive modification exercise	04
5. Practical record, Field report and slides	05
6. Viva-voce	05

Semester-VI

B.Sc. Zoology Semester-VI
SYLLABUS
B-ZOO-601 (ii)
Animal Taxonomy

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 3 Hours

Objectives: To understand the nomenclature, taxonomy and preservation of organism, and classifying species into larger groups that have biological meaning.

Course Outcomes:

CO601(ii).1. Students will have Knowledge of Taxonomy and be able to recognize the diversity of animals.

CO601(ii).2. Will be able to explain the relationships among the various animals of different phyla, their distribution and interaction with the environment

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of 8 parts (1.0 marks each) covering the entire syllabus. Answer to each part should not exceed 20 words. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks

SECTION-A

1. Fundamental concepts of Taxonomy

Introduction to Taxonomy, Application and Importance of Biosystematics in zoology, Cyto taxonomy, Chemo taxonomy, Molecular taxonomy

2. Zoological Nomenclature

International code of Zoological Nomenclature (ICZN): ICZN, Binomial and trinomial of classification

SECTION-B

3. Taxonomic Procedures

Taxonomic collections, preservation, curating and process of identifying
Taxonomic characters: Morphological, embryologic, cytogenetical,
biochemical numeral components of classification and Linnaean hierarchy,
Taxonomic keys- different kinds, their merits and demerits

4. Species Concept

Concepts of speciation and Subspeciation
Potential mode of speciation

B.Sc. Zoology Semester-VI
SYLLABUS
B-ZOO-602 (ii)

Biodiversity Conservation & Wildlife management

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 3 Hours

Objective: To enable the students for basic understanding of animal diversity, its significance in our life and environment.

Course Outcomes:

CO602(ii).1. Students will have the knowledge for conservation of our rich natural resources and diversified life forms

CO602(ii).2. Will enable the students to have understanding for protected areas in conserving biodiversity ("biodiversity outcomes" such as population increase, or decreased rate of decline), and to establish mechanisms to maintain such analysis into the future for wildlife management.

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of 8 parts (1.0 marks each) covering the entire syllabus. Answer to each part should not exceed 20 words. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks

SECTION-A

1. Introduction to Animal Diversity
2. Wildlife zones of India
3. Techniques of animal counts (Examples of Tiger count)
4. Conservation of biodiversity: in-situ and ex-situ
5. Concept of Protected Area Systems
6. Important Protected Areas of India (Biosphere reserve, National Park & Wildlife sanctuaries)

SECTION-B

7. Red Data Book
8. IUCN Categories of wildlife species
9. Climate change and loss of biodiversity
10. Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts
11. Wildlife Tourism

B.Sc. Zoology Semester-VI
SYLLABUS
B-ZOO-603 (ii)
(Zoology Practical Based on B-ZOO-601(ii) & B-ZOO-602(ii))

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours

Objective: To develop observational, analytical and evaluation skills related to the conservation of diversity and to identify the different animals around us.

Course Outcomes:

CO603(ii).1. Students will be able to identify the diversity of animals and their taxonomic status

CO603(ii).2. Learners will also develop awareness for the conservation of animal species

1. Study of biodiversity among various vertebrates (Listing of all the animals found in and around your house and also try to find out their Zoological names).
2. Identification and photography of various vertebrate species.
3. Visits to a local animal park or zoo to identify and study the captive fauna and preparation of report.
4. Study of adaptive characteristics of various vertebrates in different climate.
5. Taxonomic key formation and conversion.
6. Study of biodiversity in grassland and pond water by using Shannon -Weiner index.
7. Comparison of two species of birds belonging to same genus (Interspecific difference).

GUIDELINES/INSTRUCTIONS FOR PRACTICAL EXAMINATION (SEMESTER-VI)

Credits: 2

External Marks: 40

Internal Assessment: 10

Time allotted: 4 Hours (One session)

Note : Following exercises will be set in the examination as per marks assigned for each.

	Exercise	Marks allotted
1.	Museum specimens– Eight (Identification and classification)	16 (8x2)
2.	Exercise on Calculation of Species Diversity	08
3.	Adaptive modification exercise/Exercise on Comparison of bird species	06
4.	Practical record, Field report and slides	05
5.	Viva-voce	05

Semester IV-VI	SEC- Zoology	B-ZOO-S1	2	10	40	50	3 hrs.
---------------------------	-------------------------	----------	---	----	----	----	--------

**SYLLABUS
B-ZOO-S1
Economic Zoology****Credits: 2****External Marks: 40****Internal Assessment: 10****Time allotted: 3 Hours****Objectives:** The aim of this paper is to impart basic understanding about the role of animals in human life and their economic value *vis-à-vis* animal health and conservation.**Course Outcomes:**

B-ZOO-S1.1. Awareness about the strategies used for the culture of economically important animals and their applications for human as well as animal welfare.

B-ZOO-S1.2. Students will be able to explain the basic concepts of sericulture, apiculture, lac culture and other animal industries along with economics of pest management techniques.

Note: Nine questions are to be set in all and the candidates are required to attempt five questions including compulsory question. Question 1 is compulsory consisting of 8 parts (1.0 marks each) covering the entire syllabus. Answer to each part should not exceed 20 words. Out of remaining eight, four questions are to be set from each section A & B, possibly splitting them in parts. Candidate is required to attempt four questions, two from each section. All five questions carry equal marks

SECTION-A

1. Vertebrate and non vertebrate pest of Sugarcane and Wheat
2. Integrated pest management
3. Cultural control, Physical control, Mechanical control, Chemical control, Biological control, Herbal control and legal control and Pheromones involved in pest management.
4. Insects of Economic Importance : Biology, Control and damage caused by *Helicoverpa armigera*, *Pyrilla perpusilla* and *Papilio demoleus*, *Callosobruchus chinensis*, *Sitophilus oryzae* and *Tribolium castaneum*

SECTION-B

5. Basics of Apiculture and Sericulture
6. Sericulture : Types of silk, species of silk moth (scientific names), Silkworms and their host plants, mulberry silk worm culture, agricultural aspects of mulberry plant cultivation, extraction and reeling of silk, natural enemies and diseases of silkworm and their control.
7. Apiculture : Species of honey bees in India, life history of *Apis cerana indica*, apiculture techniques, bee products and their uses, natural enemies and diseases of honey bee and their control.
8. Principles of poultry breeding, Management of breeding stock and broilers, Processing and Preservation of eggs, Poultry diseases - Viral, Bacterial, Fungal, Protozoan

**MASTER OF ZOOLOGY
IN THE FACULTY OF LIFE SCIENCES**

**SCHEME AND SYLLABUS
(Semester I to IV)
(Based on CBCS-LOCF Pattern)
(Effective from 2020-21 in phased manner)**

**DEPARTMENT OF ZOOLOGY
(August 2020)**

VISSION AND MISSION OF THE DEPARTMENT

Vision

To be recognized as Centre of Excellence in Zoologyin Teaching & Research while ensuring the well being of all species.

Mission

To conserve and propagate animals in consonance with human development imbibing the latest advances in the field of Zoology.

Programme Outcomes (POs) for PG courses of Faculty of Life Sciences

The PG Courses of Faculty of Life Sciences will be able:

- PO1** To acquaint students with recent knowledge and techniques in basic and applied biological sciences.
- PO2** To develop understanding of organismal, cellular, biochemical and environmental basis of life
- PO3** To provide insight into ethical implications of biological research for environmental protection and good laboratory practices and biosafety
- PO4** To develop problem solving innovative thinking with robust communication and writing skills in youth with reference to biological, environmental and nutritional sciences.
- PO5** To understand application of biotic material in health, medicine, food security for human well being and sustainable development.
- PO6** To impart practical and project based vocational training for preparing youth for a career in research and entrepreneurship in fields of life sciences for self reliance.

Programme Specific Outcomes (PSOs) of the M.Sc. Zoology of the Department

- PSO1** Students will have knowledge and skills and in-depth acquaintance of animal species, their life biology, evolution, interaction with the environment at organismal, cellular and molecular level
- PSO2** Young students will understand the challenges of society and the country that falls into the realms of Zoology, such as Aquaculture, Reproductive health, Animal Behaviour, Cancer Biology, Microbiome and their roles in health and diseases, Bioremediation of pollutants and pesticides, etc.
- PSO3** Youth will be trained to Identify, review, and analyse complex situations of living forms and commitment to professional ethics and responsibilities and norms of the work/research practice
- PSO4** Youth will be capable of using research-based knowledge and research methods with problem solving expertise and robust communication skill with reference to animal life processes
- PSO5** This programme will develop personnel who can function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings with deep understanding of Zoology and management principles
- PSO6** This PG programme will develop youth with excellence in Zoology for career in teaching, research, industry and entrepreneurship in the line of self reliant India.

Scheme of Examination for M.Sc. Zoology (Semester system) as per Choice Based Credit System (CBCS) to be implemented w.e.f. session 2020-2021 in Phased Manner

Semester wise distribution of course and credits in Zoology

Department of Zoology, KUK

Syllabus of M.Sc. Zoology

w.e.f. Session 2020-21

SEMESTER – I

Paper: M-Z 101 (Core)
Cell Biology
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives:

1. To make students learn the deeper aspects of cell structure and function at molecular level.
2. To apprise students about likeness between the physiological processes at the cellular and organismic levels.

Outcomes:

- CO1** This core course will make students able to understand how the cell functions as a unit of life.
- CO2** Through this course, students will be able to appreciate the importance of various cell function and structures in the evolution of multicellular organisms.
- CO3** The studies will make the students reveal elegance, dynamics and economy in the living cell and a gratifying unity in the principles by which a cell functions.
- CO4** The students will know about the basic cellular and molecular approaches for cancer development and treatment

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more selecting one questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT- I

1. Biomembranes

- 1.1 Molecular composition and arrangement, functional consequences
- 1.2 Cellular Transport – Recapitulation of the plasma membrane; diffusion, active transport and pumps, uniports, symports and antiports.
- 1.3 Donnan equilibrium; ion movements and cell function: acidification of cell organelles
- 1.4 Maintenance of cellular pH; cell excitation; bulk transport; Receptor mediated endocytosis
- 1.5 Transepithelial transport

2 Cytoskeleton and cell movement

- 2.1 Introduction to cytoskeleton and its role
- 2.2 Molecular structure of Actin, myosin and their organisation
- 2.3 Structure and dynamic organizations of microtubules and microfilaments
- 2.4 Microtubule motors and movement
- 2.5 Intermediate filaments
- 2.6 Role of Centrioles and basal bodies
- 2.7 Structure and functions of Cilia and flagella

UNIT –II

- 3 **The Extra Cellular Matrix and Cell interactions**
 - 3.1 Cell walls
 - 3.2 The ECM and cell-matrix interactions
 - 3.3 Cell-cell interactions: adhesion junctions, tight junctions, gap junctions, plasmodesmata
 - 3.4 Ca^{++} dependent and Ca^{++} independent Homophilic cell-cell adhesion
- 4 **Cell matrix adhesion**
 - 4.1 Integrins
 - 4.2 Collagen
 - 4.3 Non-collagen components
 - 4.4 Auxin and cell expansion
 - 4.5 Cellulose fibril synthesis and orientation
- 5 **Protein sorting and transport**
 - 5.1 Protein uptake into the ER
 - 5.2 Membrane proteins and Golgi sorting
 - 5.3 Mechanism of vesicular transport
 - 5.4 Lysosomes
 - 5.5 Molecular mechanism of secretory pathway

UNIT-III

- 6 **Cell cycle**
 - 6.1 Eukaryotic cell cycle
 - 6.2 Regulators of cell cycle progression
 - 6.3 Role of Meiosis in Genetic Variation
- 7 **Cell – Cell signaling**
 - 7.1 Signaling molecules and their receptors
 - 7.2 Pathways of intracellular signal transduction
- 8 **Biology of Cancer**
 - 8.1 The development and causes of cancer
 - 8.2 Oncogenes
 - 8.3 Tumor suppressor genes
 - 8.4 Molecular approaches to cancer treatment

UNIT-IV

- 9 **Genome organization**
 - 9.1 Chromosomal organization of genes
 - 9.2 Transposons in prokaryotes and eukaryotes
 - 9.3 Morphological and functional elements of eukaryotic chromosomes
- 10 **Cell Death**
 - 10.1 Necrosis and Programmed cell death
 - 10.2 Molecular Mechanism
 - 10.3 Applications and Significance

11 Biology of Ageing

11.1 Morphological, Physiological and Functional changes during Ageing

11.2 Telomeres and Ageing

11.3 Theories of Ageing

Suggested Reading Material:

1. Molecular Cell, Biology, J. Darnell, H. Lodish and D. Baltimore Scientific American Book, Inc., USA.
2. Molecular Biology of the Cell, B. Alberts, D. Bray, J. Lewis, M. Raff, K. Roberts and J.D. Watson. Garland Publishing Inc., New York.
3. Cell and molecular biology Phillip Sheeler, Donald E. Bianchi Wiley, 1987
4. Life: The Science of Biology by David Sadava
5. Cell and Molecular Biology by De Robertis
6. Cell Biology by A.K. Berry, EMKAY Publications
7. Molecular Cell Biology, Lodish et al., W.H. Freeman and Company (8th Ed. 2016)
8. Molecular Biology, Weaver R. F., McGraw-Hill Education (5th Ed. 2011)

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprisetests, quiz & session tests.

CO-PO MAPPING for M-Z 101

	PO1	PO2	PO3	PO4	PO5	PO6
CO1	3	3	2	2	2	2
CO2	3	3	2	2	2	2
CO3	2.5	2.5	3	2	3	2
CO4	2.5	2.5	3	2	3	3
Average	2.75	2.75	2.5	2	2.5	2.25

CO-PSO MAPPING for M-Z 101

	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	2	2	3	3	2	2
CO2	3	2	2	2	2	2
CO3	2	2	2	2	1	2
CO4	3	2	2	2	2	2
Average	2.5	2.0	2.25	2.25	1.75	2

SEMESTER – I

Paper: M-Z 102 (Core)
Biochemistry and Bio-techniques
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives:

1. To develop understanding of biological processes at chemical, biochemical and molecular level to perform wide range of analytical techniques to explore biological activities.
2. To provide general overview of different biochemical experimental approaches to understand the structure and functions of cell and its components.

Outcomes:

- CO1** It will provide the students a basic appreciation of the underlying principles and practical strategy of the analytical and preparative techniques that are fundamental to study and understanding of life processes.
- CO2** It will make the students to understand the general reactions of various metabolic pathways.
- CO3** Students will be able to explain the principle, working, materials used and applications of various biological techniques that are used to study the basic biological processes.
- CO4** Students will be able to describe the structure and classification of biomolecules.

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each unit (I to IV). The candidate will be required to attempt question No. 1 and four more selecting one question from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT – I

1.0 General Principles of Biochemistry and chemical composition of life

1.1 General Introduction to Biomolecules

2.0 Protein Biology:

2.1 Primary, Secondary, tertiary and quaternary structure of proteins: i)Domain, ii)Reverse turn of Ramachandran plot and its significance

3.0 Enzyme:

3.1 Classification and nomenclature,

3.2 Co-enzymes and Cofactors

3.3 Induced fit and Molecular Mechanism of Enzyme action,

3.4 Enzyme feedback mechanism, Isozymes.

4.0 Nucleic acids: Structure and Functions

- 4.1 DNA structure and functions
- 4.2 RNA structure and functions,
- 4.3 DNA choreography
- 4.4 Qualitative and quantitative estimation of DNA

UNIT - II

5.0 Metabolism:

- 5.1 Glycolysis, citric acid cycles its regulation and role as metabolic hub.
- 5.2 Hexose monophosphate pathway its regulation and significance.
- 5.3 Cholesterol biosynthesis, its metabolism and steroidogenesis.
- 5.4 Bile acids and their metabolism
- 5.5 Saturated and unsaturated fatty acid and their metabolism.

UNIT - III

6.0 Chemical and Biological assays (*invitro* and *in vivo* assays).

7.0 Principles and uses of analytical instruments:

- 7.1 Microscopes and imaging
- 7.2 Spectrophotometers,
- 7.3 NMR spectrophotometer

8.0 Microbiological and cell culture Techniques

- 8.1 Setting of microbiological laboratory,
- 8.2 Sterilization and Media preparation techniques
- 8.3 Inoculation and growth monitoring (Standard plate count technique),
- 8.4 Isolation of a microbial colony and slant preparation.
- 8.5 Design and functioning of tissue culture laboratory,
- 8.6 Basics of cell/tissue culture, Culture media preparation,
- 8.7 Cell proliferation measurements
- 8.8 Cell viability testing and Cell harvesting methods.
- 8.9 Biosafety and levels

9.0 Cryotechniques :

- 9.1 Cryopreservation for cells, tissue, organisms,
- 9.2 Cryotechniques for microscopy.

UNIT - IV

10.0 Separation techniques in biology.

- 10.1 Molecular separations by chromatography, electrophoresis, precipitation etc.
- 10.2 Organelle separation by centrifugation. Density gradient centrifugation, Ultra Centrifugation, unit gravity centrifugation, affinity adsorption, anchorage based techniques etc.
- 10.3 Cell separation by flow cytometry and FACS

11.0 Radioisotope and mass isotope techniques in biology:

11.1 Sample preparation for radioactive counting

11.2 Autoradiography

11.3 Biosensors

12.0 DNA fingerprinting

Suggested Reading Materials:

1. Animal Cell Culture – A practical approach, Ed. John R.W. Masters, IRL Press.
2. Introduction to Instrumental analysis, Robert Braun, McGraw Hill International editions
3. A Biologists guide to Principles and Techniques of Practical Biochemistry, K. Wilson and K.H. Goulding, ELBS Edn.
4. Lehninger AL, Nelson DL & Cox MM (1993) Principles of Biochemistry, 2nd edn. New York: Worth.
5. Stryer L (1995) Biochemistry, 4th edn. New York: WH Freeman.
6. Voet D, Voet JG & Pratt CW (1999) Fundamentals of Biochemistry. New York: Wiley.

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprisetests, quiz & session tests.

CO-PO MAPPING for M-Z 102

	PO1	PO2	PO3	PO4	PO5	PO6
CO1	2	2	3	2	-	-
CO2	1	3	1	2	3	2
CO3	3	-	3	2	-	3
CO4	1	3	2	1	2	-
Average	1.75	2	2.25	1.75	1.25	1.25

CO-PSO MAPPING for M-Z 102

	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6

Average	2.75	1.5	1.75	2	1.5	2

SEMESTER – I

Paper: M-Z 103 (Core)
Biosystematics and Biostatistics
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives:

1. This paper deals with nomenclature, taxonomy and preservation of organism, assigning names to organisms using nomenclature and classifying species into larger groups that have biological meaning.
2. It imparts understanding about fundamental concepts in statistics and their application in interpretation of biological data also demonstrate appropriate sampling scheme.

Outcomes:

- CO1** Knowledge of Taxonomy helps in classifying and identifying biodiversity and biologist study the well understood relationships by making phylogenetic trees.
- CO2** It will help to understand the overall biodiversity of the world and their application in all the fields of biological sciences.
- CO3** Biostatistics helps to generate a hypothesis from a set of observation and then design experiment to test the hypothesis.
- CO4** Able to acquire, analyse and understand the significance of data.

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more selecting one questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT – I

- 1.0 Biosystematics and taxonomy: Definition and perspectives,
- 2.0 Historical resume, Importance and applications of systematics in biology.
Concepts of newer aspects of biosystematics: Chemotaxonomy, Cytotaxonomy, Molecular taxonomy.
- 3.0 Dimensions of speciation and taxonomic characters:
 - 3.1 Different Species concepts – species category,
 - 3.2 Sub-species and other intra-specific categories.
- 4.0 Theories of biological classification, hierarchy of categories.
- 5.0 Taxonomic characters – different kinds, weighing of characters

UNIT - II

6.0 Methodology:

- 6.1 Taxonomic collections, preservation, curation process and identification.
- 6.2 Taxonomic keys-different kinds of taxonomic keys, their merits and demerits.

7.0 Systematic publications:

- 7.1 Different kinds of publications.
- 7.2 International code of Zoological Nomenclature (ICZN): principles, objectives and rules: Stability, Priority, Concept of availability, formation of names, synonymy, homonymy, the type method, kinds of type specimen, type-designation-

8.0 Principles of Bioethics in Biodiversity

UNIT - III

9.0 Measures of central value:

- 11.1 Arithmetic mean, mode and median, Definition, calculation and its properties.

10.0 Measures of Dispersion: Range,

- 12.1 Interquartile range,
- 12.2 Quartile deviation.
- 12.3 Mean deviation and standard deviation,
- 12.4 Standard error

11.0 Correlation:

- 13.1 Types and Methods studying correlation – Scatter diagram method, Graphic method, Karl Pearson coefficient of correlation, Rank correlation.

12.0 Regression analysis (Regression lines and regression equation)

13.0 Chi-square analysis

UNIT - IV

14.0 Concept of sampling and sampling methods:

- 16.1 Definition and law of sampling,
- 16.2 Judgment sampling, Random sampling, stratified sampling, systematic sampling, multi-stages sampling and quota sampling.

15.0 Test of significance for large samples and small samples (student t-test, F- test; ANOVA).

16.0 Probability and law of probability, Theoretical probability distribution: Binomial distribution, Poisson distribution, Normal distribution.

17.0 Components of computers, Basic functioning of computers, Use of Statistical Software in Biology

Suggested Reading Material:

1. M. Kato. The Biology of Biodiversity, Springer.
2. E.O. Wilson, Biodiversity, Academic Press, Washington.
3. G.G. Simpson, Principle of animal taxonomy, Oxford ISH Publishing Company.
4. E. Mayer, Elements of Taxonomy.
5. E.O. Wilson, The Diversity of Life (The College Edition), W.W. Northern & Co.
6. S.K. Tikadar, Threatened Animals of India, ZSI Publication, Calcutta.

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprisetests, quiz & session tests.

CO-PO MAPPING for M-Z 103

	PO1	PO2	PO3	PO4	PO5	PO6
CO1	3	3	2	3	1	2
CO2	3	3	3	2	3	3
CO3	3	1	3	3	1	1

Average	2.75	3	2.5	2.75	2.5	2.5

SEMESTER – I

Paper: M-Z 104 (Core)
Biology of Invertebrates
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives:

1. Make students to understand how life evolved from simple to complex organization by division of labour & enhancing efficiency in Invertebrates.
2. In depth knowledge of minor phyla and their organization and relationship with other invertebrates phyla

Outcomes:

- CO1** The study of invertebrates reveals progressive evolutionary history and adaptations together which forms the basis of huge complex and diverse life forms.
- CO2** Students will acquire a clear understanding about organization of minor phyla and their relationship with other animal phyla
- CO3** Students will be able to know the structure and significance of various systems of Invertebrates
- CO4** Will have detail understanding of adaptations and significance of Invertebrates

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more selecting one questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT – I

- 1.0 Introduction to invertebrates with their general characters, Basic body plan, Concept of Invertebrata v/s Vertebrata and Non-Chordata v/s Chordata
- 2.0 Organization of coelom
 - 2.1 Concept and structure of Acoelomate, Pseudocoelomates and Coelomates.
 - 2.2 Protostomia and Deuterostomia
 - 2.3 Metamerism in Annelida, Pseudometamerism.
- 3.0 **Minor Phyla:**
 - 3.1 Concept and significance
 - 3.2 Organization and general characters of Acoelomate, Pseudocoelomates and Coelomates minor phyla (with special emphasis on Ctenophora, Rotifera, Endoprocta, Ectoprocta, Phoronida, Sipunculida and Echiuroidea).

UNIT-II

- 4.0 **Locomotion**
 - 4.1 Flagella and ciliary movement in Protozoa
 - 4.2 Hydrostatic movement in Coelenterata, Annelida and Echinodermata
- 5.0 **Nutrition and Digestion**
 - 5.1 Patterns of feeding and digestion in lower metazoa
 - 5.2 Filter-feeding in Polychaeta, Mollusca and Echinodermata
- 6.0 **Respiration**
 - 6.1 Organs of respiration : Gills, lungs, trachea, skin, Cloacal chamber, Buccopharyngeal area etc.
 - 6.2 Respiratory pigments
 - 6.3 Mechanism of respiration

UNIT-III

- 7.0 **Excretion**
 - 7.1 Organs of excretion: Coelom, coelomoducts, Nephridia and Malpighian tubules.
 - 7.2 Mechanism of excretion and osmoregulation
- 8.0 **Nervous system**
 - 8.1 Primitive nervous system: Coelenterata and Echinodermata
 - 8.2 Advanced nervous system: Annelida, Arthropoda (Crustacea and Insecta) and Mollusca (Cephalopoda).
 - 8.3 Trends in neural evolution.
- 9.0 Social life in insects, Social life in Isoptera and Hymenoptera

UNIT-IV

- 10.0 **Invertebrate larvae**
 - 10.1 Larval forms of free living invertebrates
 - 10.2 Strategies and Evolutionary significance of larval forms
 - 10.3 Conservation of invertebrates.
- 11.0 **Introduction to insects**
 - 11.1 Mouthparts of Insects
 - 11.2 Mechanism of insect flight and hovering
 - 11.3 Metamorphosis in insects
 - 11.4 Hormonal control of moulting.
- 12.0 Economic importance of Invertebrates; Various Adaptations in Invertebrates

Suggested Reading Materials:

1. Hyman, L.H. The invertebrates, Vol. I. Protozoa through Ctenophora, McGraw Hill Co., New York.
2. Barrington, E.J.W. Invertebrate structure and function. Thomas Nelson and Sons Ltr J. London.
3. Jagerstein, G. Evolution of Metazoan life cycle, Academic Press, New York & London.
4. Hyman, L.H. The Invertebrates. Vol.2. McGraw Hill Co., New York.

5. Hyman, L.H. The Invertebrates. Vol.8. McGraw Hill. Co., New York.
6. Barnes, R.D. Invertebrate Zoology, IIIrd edition. W.B. Saunders Co., Philadelphia.
7. Russel-Hunter, W.D. A Biology of higher invertebrates, the Macmillan Co. Ltd. London.
8. Hyman, L.H. the Invertebrates smaller coelomate groups, Vol. V. McGraw Hill Co., New York
9. Read, C.P. Animal Parasitism. Prentice Hall Inc., New Jersey.
10. Sedgwick, A.A. Student text book of Zoology. Vol. I, II and III Central Book Depot, Allahabad
11. Parker, T.J., Haswell, W.A. Text book of Zoology, McMillan Co., London.

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprisetests, quiz & session tests.

Average	2.5	2	3	2.5	3	2.5

SEMESTER – I

Paper: M-Z 105 (Core)
Practical (Based on Papers M-Z 101 &M-Z 102)
Credits: 4

Total Marks: 100
External Examination: 80
Internal Assessment: 20
Time: 4 Hours

Objectives: To understand the fundamental chemical principles of biochemistry based techniques and their application in biological science.

Outcomes:

- CO1** Students will develop skills in basic laboratory techniques and understand the principles in Biology.
- CO2** Able to apply the scientific method to the process of experimentation.
- CO3** This course will make students able to understand the regulation of chemical reactions in living cells.
- CO4** Students will be able to conduct the morphometric analysis of chromosomes and demonstrate cell division

Course Contents:

1. Preparation of mitotic chromosomes from onion root tips
2. Preparation of meiotic chromosomes from grasshopper testes.
3. Preparation of karyotypes from micrographs.
4. Calculation of morphometric data and preparations of idiogram.
5. Determination of chiasma frequency and terminalization coefficient.
6. Study of permanent slides of different stages of meiosis and mitosis.
7. Preparation of polytene chromosomes (*Chironomous/mosquito*) and mapping.
8. Preparation of Solutions- Standard solution, Molar, Molal and Normal solution.
9. Proteins: Quantitative estimation of proteins by Biuret method and Lowry's method.
10. Carbohydrates: quantitative estimation of total carbohydrates and glucose
11. **Analysis of Fats/ Oils:** iodine number, saponification value, acid value quantitative estimation of total lipids.
12. Preparation of Standard curve for the estimation and extraction of nucleic acids (DNA and RNA).
13. Paper chromatography: amino acids and carbohydrates.
14. Thin layer chromatography: neutral and phospholipids.
15. Tools: demonstration of parts and working of the following tools: PCR, GLC, Spectrophotometers, various kinds of microscopes, pH meter, Electrophoresis, Centrifuges, Tissue culture unit, Incubators
16. Microbiological media preparation, sterilization, dilution, inoculation and standard plate count.

SEMESTER – I

Paper: M-Z 106 (Core)
Practical (Based on Papers M-Z 103 &M-Z 104)
Credits: 4

Total Marks: 100
External Examination: 80
Internal Assessment: 20
Time: 4 Hours

Objectives: Providing the students with the ability to recognize the major groups of invertebrates and to identify the specimens of invertebrate phyla.

Course Outcomes:

- CO1** Students will able to understand the processes involved in the recognition of key groups of invertebrates
- CO2** Students will be able to prepare permanent mounts of different mouthparts of insects to studythe details of their structure.
- CO3:** Students will able to identify and classify the specimens of available invertebrate phyla.
- CO4:** Able to elaborate the different systems of invertebrates such as Earthworm, Cockroach, Prawn, Starfish etc.

Course Contents:

1. Slides and Museum specimens of following phyla:
 - (a) PROTOZOA
 - (b) PORIFERA
 - (c) CNIDARIA
 - (d) ANNELIDA
 - (e) ARTHROPODA
 - (f) MOLLUSCA
 - (f) ECHINODERMATA
 - (h) HEMICHORDATA
2. Study of mouth parts of Cockroach, Honey Bee, Red cotton bug and House fly
3. Mounting: Obelia, Tubularia, Bougainvillea, Trachea of Cockroach, Crustacean Larva, *Cyclops*, *Nauplius*, *Daphnia*
4. Demonstration of Digestive system, reproductive system and nervous system of Earthworm, Cockroach, Prawn, Loligo and Star fish.
5. Preparation and use of different types of taxonomic keys.
6. Statistical analysis of data using manual and computer software methods
 - a. Mean, mode & Median
 - b. Standard deviation and S.E.
 - c. Coefficient of correlation
 - d. Diversity Indices
 - e. Test of Significance (Student's t - test)

Average	2.81	2.62	2.68	2.62	2.5	2.81

SEMESTER – II

Paper: M-Z 201 (Core)
Population and Community Ecology
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objective:

1. To expose the students in understanding various types of interactions between biotic and abiotic components of environment.
2. To describe how the biogeochemistry, energy flow, or biodiversity of ecosystems responds to climate change or another disturbance.

Outcomes:

- CO1** Students will be able to understand and explain the need for intra- and interdisciplinary cooperation in researching different ecosystems.
- CO2** Students will understand the all biotic and abiotic factors that are related to individual, population, community and ecosystem and defines the relationships between them.
- CO3** Information provided will give an insight about the benefits of ecosystem and can be used in the management of natural resources for sustainable development in ways that leave the environment healthy.
- CO4** Many specialties within ecology such as marine, vegetation and statistical ecology provides students information to better understand the environment around them.

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more selecting one questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT - I

- 1.0 Basic Concepts: Definition, Scope and Significance of Ecology, Concept of biosphere, atmosphere, litho sphere and hydrosphere.
- 2.0 Organizational level of ecological systems, Ecological aspects of abiotic, biotic and edaphic factors, limiting factors
- 3.0 **Ecosystem:** Concept, Kinds and components
- 4.0 **Ecological energetic and energy flow:** Food chains, food webs, trophic structure; concept of productivity: primary, secondary, gross and net, Energy flow models.

UNIT - II

5.0 Restoration Ecology

Ecology of Disturbed Ecosystems: disturbance and its impact on the structure and functioning of terrestrial and aquatic ecosystems.

6.0 Population characteristics

- 6.1 Introduction and concepts of population ecology
- 6.2 Attributes of populations
- 6.3 Population density, methods of population density measurement
- 6.4 Growth rate and growth forms
- 6.5 Natality, mortality, survivorship curves and life tables
- 6.6 Biotic potential – Generation time, net reproductive rate reproductive values
- 6.7 Population and distribution.
- 6.8 Population dispersion

UNIT - III

7.0 Population regulation and Interactions

- 7.1 Extrinsic and intrinsic mechanisms
- 7.2 Concept of density dependent and density independent factors in population regulation.
- 7.3 Concept of intra specific and inter specific population interactions
- 7.4 Protocooperation, mutualism and commensalisms
- 7.5 Host-parasite interactions, Life history strategies – r and k selection.

8.0 Competition and niche theory

- 8.1 Intraspecific and inter specific interactions
- 8.2 History of niche concepts
- 8.3 Gause's theory of niche

UNIT - IV

9.0 Predation

- 9.1 Theory; predator-prey oscillations
- 9.2 Model of prey – predatory dynamics
- 9.3 Role of predation in nature
- 9.4 Parasitism

10.0 Community characteristics

- 10.1 Species diversity; Biodiversity indices: Diversity, dominance, Similarity & dissimilarity Index
- 10.2 Ecological Succession
- 10.3 Ecological dominance
- 10.4 Ecotones and Edge effect

11.0 Ecological Impact Assessment

Suggested Reading Materials:

1. Understanding Evolution by Earl. D. Hanson, Oxford University Press, Oxford, New York.
2. Oxford Surveys in Evolutionary Biology Vol. I – Vol. VI, Oxford University Press, Walton, Street, Oxford.
3. Evolution by Theodose H. Eaton (Jr.) Thomes – Nolson & Sona Limited, London.
4. Evolutionary Theory: (The unfinished synthesis) by Robert G.B. Reid: Croom Helm: London & Sydney.
5. Dobzhansky, Th. Genetics and Origin of species. Columbia University Press.

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprisetests, quiz & session tests.

SEMESTER – II

Paper: M-Z 202 (Core)
Comparative Physiology
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives:

1. The aim of this paper is to impart advanced knowledge about the principles of physiology, of both cells and organisms and also with respect to the principal Phyla and Classes of animals.
2. This core course will make students understand how animal works at all levels and also a comparison of mechanism of working

Outcomes:

- CO1** An appropriate understanding of functioning of each system of different groups of animals with their comparison will be acquainted.
- CO2** The students will be able to explore all reasoning and queries that how animals work
- CO3** The students will be able to learn that how the physiology of different groups of organisms is influenced by the different environments of their niches
- CO4** Since this course also have some important practical component where interesting exercises will be conducted to perform experiment and answer various queries of animal physiology

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more selecting one questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise

UNIT - I

1.0 Digestion

1.1 Feeding mechanisms and regulation,

1.2 Comparative physiology of digestion and absorption in different animal groups

2.0 Respiration

2.1 Respiratory organs, Types of respiration, mechanism of breathing

2.2 Transport of respiratory gases

2.3 Respiratory pigments through different phylogenetic groups.

2.4 Physiological response to oxygen deficient stress.

3.0 Excretion

3.1 Patterns of nitrogen excretion among different animal groups

3.2 Functional anatomy of renal unit; mechanisms of ultrafiltration, Counter Current mechanism, Dialysis

- 4.0 **Osmoregulation** in different animal groups
 - 4.1 Definition and basic classification of organisms on the basis of osmoregulation
 - 4.2 Osmotic challenges of different environments
 - 4.3 Mechanism of Osmoregulation in fresh water, Estuarine and Marine animals
 - 4.4 Osmoregulation in migratory organisms, Control and regulation of osmoregulation

UNIT - II

- 5.0 **Thermoregulation**
 - 5.1 Homeothermic animals, Poikilotherms, Hibernation and Aestivation,
 - 5.2 Physical, chemical, neural regulation,
 - 5.3 Physiological adaptations acclimatization & acclimation in response to high, low ambient temperature
- 6.0 **Circulation** of body fluids and their regulation among different animal groups
 - 6.1 Systems of circulation, heart beat and blood pressure,
 - 6.2 Cardiac cycle, Cardiac output and its regulation,
 - 6.3 Lymphatic system
- 7.0 **Receptor physiology** – a comparative study of Mechanoreception, Photoreception, Chemoreception and Equilibrium reception
- 8.0 **Muscle and Contractile physiology**
 - 8.1 Contractile elements, cells and tissues among different phylogenetic groups; Muscle structure and function-correlation;
 - 8.2 Electric organs and tissues

UNIT- III

- 9.0 **Comparative testicular physiology** in animals
 - 9.1 Morphology, Differentiation, Function and its regulation
- 10.0 **Comparative ovarian physiology** and differentiation in vertebrates
 - 10.1 Morphology, Endocrinology, Oogenesis vitellogenesis
- 11.0 **Neuronal physiology**
 - 11.1 Structure and classification of neurons and glial cells.
 - 11.2 Synaptic action, dendritic properties and functional operation of spinal cord, Brain stem
 - 11.3 Autonomic nervous system.

UNIT - IV

- 12.0 **Principles of synaptic transmission**
 - 12.1. Ca²⁺ and transmitter release; post synaptic transmission mechanism;
 - 12.2. diversity of neurotransmitters: acetylcholine, catecholamine, serotonin, GABA, glycine, histamine, peptides, NO, and opioids.
- 13.0 **Physiological adaptations** to different environments
 - 13.1 Physiological adaptations acclimatization & acclimation in response to high, low ambient temperature,
 - 13.2 physiological adaptation at high altitude and in deep sea environment.
- 14.0 **Stress Physiology** Concept of Stress and Strain, Stress hormones and stress regulatory mechanisms.

Suggested Reading Material

SEMESTER – II

Paper: M-Z 203 (Core)
Population Genetics and Evolution
Credits: 4

Total Marks: 100 Theory Examination: 80 Internal Assessment: 20 Time: 3 Hours
--

Objectives:

1. To understand the origin and progression of life on earth with conventional and novel evidences and techniques.
2. In depth knowledge of process of speciation with concept of ecology & evolution

Outcomes:

- CO1** To provide students the basic insight about the mechanism of evolution and to make them able to relate different forms of life on our planet earth. It will also provide them in-depth knowledge about the changing frequency and distribution of alleles within the population.
- CO2** Acquire a clear understanding about genetic equilibrium in natural populations
- CO3** To know about genetics of quantitative traits in populations
- CO4** Detail understanding of molecular phylogenetics and methods of construction of phylogenetic tree

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more selecting one questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise

UNIT-I

- 1.0 Concepts of evolution and theories of organic evolution with an emphasis on Darwinism.
- 2.0 Emergence of Neo-Darwinism-Neutral Hypothesis
- 3.0 **Neo Darwinism**
 - 3.1 Hardy-Weinberg law of genetic equilibrium
 - 3.2 A detailed account of destabilizing forces:
 - (i) Natural selection
 - (ii) Mutation
 - (iii) Genetic drift
 - (iv) Migration
 - (v) Meiotic drive

UNIT-II

- 4.0 **Quantifying genetic variability**
 - 4.1 Genetic structure of natural populations
 - 4.2 Phenotypic variations
 - 4.3 Models explaining changes in genetic structure of populations
 - 4.4 Factors affecting human disease frequency

- 5.0 **Molecular population genetics**
 - 5.1 Patterns of change in nucleotide and amino acid sequences
 - 5.2 Ecological significance of molecular variations

- 6.0 **Genetics of quantitative traits in populations**
 - 6.1 Analysis of quantitative traits
 - 6.2 Estimation of heritability
 - 6.3 Genotype-environment interactions
 - 6.4 Inbreeding depression and heterosis
 - 6.5 Molecular analysis of quantitative traits
 - 6.6 Phenotypic plasticity

UNIT-III

- 7.0 **Genetics of speciation**
 - 7.1 Concept of species
 - 7.2 Patterns and mechanisms of reproductive isolation
 - 7.3 Modes of speciation (Allopatric, Sympatric, Parapatric, Peripatric)

- 8.0 **Molecular Evolution**
 - 8.1 Gene Evolution
 - 8.2 Evolution of gene families, Molecular drive
 - 8.3 Assessment of molecular variations

- 9.0 **Origin of higher categories**
 - 9.1 Phylogenetic gradualism and punctuated equilibrium
 - 9.2 Major trends in 'the origin of higher categories
 - 9.3 Micro-and Macro-evolution

UNIT-IV

- 10.0 **Molecular phylogenetics**
 - 10.1 Concept of phylogenetic trees.
 - 10.2 Methods of construction of Phylogenetic trees.

- 11.0 **Population genetics and ecology**
 - 11.1 Metapopulations
 - 11.2 Monitoring Natural Populations
 - 11.3 Populations size and extinction
 - 11.4 Loss of genetic variations
 - 11.5 Conservation of genetic resources in diverse taxa

Suggested Reading Material

1. Dobzhansky, Th. Genetics and Origin of Species. Columbia University Press.
Dobzhansky, Th., F.J. Ayala, G.L. Stebbins and J.M. Valentine. Evolution. Surjeet Publication, Delhi.
2. Futuyama, D.J. Evolutinary Biology, Suinuaer Associates, INC Publishers, Dunderland.
3. Hartl, D.L. A Primer of Population Genetics. Sinauer Associates, Inc, Massachusetts.
4. Jha, A.P. Genes and Evolution. John Publication, New Delhi.
5. King, M. Species Evolution-The role of chromosomal change. The Cambridge University Press, Cambridge.

SEMESTER – II

Paper: M-Z 204 (Core)
Biology of Vertebrates
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives:

1. This paper deals with the comparative and evolutionary trends in structure and function of the organ systems of the vertebrate series.
2. To understand what are the general characters and different categories of chordates animal.
3. To understand the level of organization in chordate subphylum.
4. To understand the origin and evolutionary relationship in different subphylum of chordates.

Outcomes:

- CO1** Students will be able to understand various biological functions, the evolution of life from most primitive to most advanced form with respect to their habit and habitat.
- CO2** Students will have acquaintance with the basic concepts, external morphology and sexual dimorphism in chordates and understand the various systems, adaptation and dentition in chordates.
- CO3** Students will also Understand the Classification various classes of phylum Chordate i.e., Pisces, Reptiles, Aves and Mammals.
- CO4** This core course will make students familiarise with the vertebrate diversity around them

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more selecting one questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise

UNIT - I

1.0 Introduction to Chordates with their general characters.

- 1.1 Origin of Chordates
- 1.2 Concept of Protochordata or pre-vertebrates
- 1.3 Classification of Vertebrates upto orders

2.0 Integument and its derivatives

- 2.1 Development, general structure and functions of skin and its derivatives
- 2.2 Glands, scales, horns, claws, nails, hoofs, feathers and hair

UNIT - II

- 3.0 **Skeletal system**
 - 3.1 Form, function, body size and skeletal elements of the body
 - 3.2 Comparative account of jaw suspensorium, Vertebral column
 - 3.3 Limbs and girdles

- 4.1 **Digestive system**
 - 4.1 Dentition, Stomach, Digestive Glands
 - 4.2 Anatomy of gut in relation of to feeding habits- herbivores, carnivores and omnivores.

- 5.0 **Respiratory system**
 - 5.1 Characters of respiratory tissue, Internal and External Respiration
 - 5.2 Comparative account of respiratory organs

UNIT -III

- 6.0 **General plan of circulation in various groups**
 - 6.1 Components of Blood
 - 6.2 General plan of circulation in reptiles, birds and mammals
 - 6.3 Evolution of heart, aortic arches and Portal systems

- 7.0 **Evolution of Urinogenital system in vertebrate series**
 - 7.1 Structure and functions of different types of kidney
 - 7.2 Urino-genital ducts

Flight adaptation in birds, Migration in fish and Birds

UNIT- IV

- 8.0 **Nervous system**
 - 8.1 Comparative anatomy of the brain in relation to its functions
 - 8.2 Comparative anatomy of spinal cord
 - 8.3 Nerves-Cranial, Peripheral and Autonomous nervous systems

- 9.0 **Sense organs**
 - 9.1 Simple receptors
 - 9.2 Organs of Olfaction and taste
 - 9.3 Lateral line system
 - 9.4 Electroreception

Suggested Reading Material

1. Barrington, E.J.W. The Biology of Hemichordata and Protochordata. Oliver and Boyd,Edinburgh.
2. Bourne, G.H. The structure and functions of nervous tissue. Academic Press, New York.
3. Carter, G.S. Structure and habit in vertebrate evolution - Sedgwick and Jackson, London.
4. Kingsley, J.S. Outlines of Comparative Autonomy of Vertebrates. Central Book Depot,Allahabad.

SEMESTER – II
Paper: M-Z 205
Seminar
Credits: 01

Total Marks: 25

Objective:

- 1. To develop speaking skills in the students**
- 2. To have ability to prepare and present on any topic assigned to them**

Course Outcomes:

- CO1.** Students will be able to speak on the topic assigned to them after going through related Literature
- CO2.** Students will be able to prepare power point presentations
- CO3.** Students will have knowledge of different topics of Zoology especially current topics
- CO4.** Students will be able to comprehend vast topic in limited sphere

SEMESTER – II

Paper: M-Z 206 (Open Elective)
Economic Zoology
Credits: 2

Total Marks: 50
Theory Examination: 40
Internal Assessment: 10
Time: 3 Hours

Objectives:

1. It is an open elective paper. It provide zoological knowledge for the benefit of mankind
2. It includes culturing of animals for human use and their economic values and control animals that are injurious to man directly or indirectly.

Outcomes:

- CO1** Students will be aware of applications of applied biology to meet the challenge of food storage during recent times.
- CO2** It increases socio-economic status and self employment with rural development.
- CO3** Will provide awareness about the strategies used for the culture of economically important animals and their applications for human as well as animal welfare.
- CO4** Further studies will help in improving product and by-products of cultured animals both quantitative and qualitatively.

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise two questions from each unit (I- IV). The candidate will be required to attempt question No. 1 and four more selecting two questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT -I

1.0 Integrated pest management: cultural-control, chemical control, biological control, herbal control, legal control.

UNIT-II

2.0 Sericulture : Types of silk, species of silk moth (scientific names), Silkworms and their host plants, mulberry silk worm culture, natural enemies and diseases of silkworm and their control

3.0 Apiculture : Species of honey bees in India, life history of *Apis ceranaindica*, agriculture techniques, bee products and their uses, natural enemies and diseases of honey bee and their control.

4.0 Lac culture: lac insect (Scientific name), composition of lac, strains of lac insect, cultivation of lac host plants (in brief) processing of lac and uses of lac.

UNIT- III

5.0 Vermiculture: species of vermiculture, culture methods, significance of vermicomposting
Economic status of Vermiculture.

6.0 Economic status and products of Poultry keeping and Dairy industry in Haryana.

UNIT- IV

7.0 Aquaculture (Fresh water fishes and Prawn culture).

8.0 leather industry: processing and enemies of skin.

9.0 Economic importance of mammals

Suggested Reading Material:

1. Insect Pest Management by Dent, D.
2. Agricultural Entomology by Hill, D.S., Timber Press.
3. Entomology and Pest Management by Pedigo L. P. Prentice Hall, India
4. Agricultural Pests: Biology and Control Measures by B. M. Deoray and T. B.Nikam, Nirali Publication, Pune.
5. Concepts of Insect Control by Ghosh M. R. Wiley Eastern Ltd. New Delhi.

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprisetests, quiz & session tests.

SEMESTER – II

Paper: M-Z 207 (Core)
Practical (Based on Papers M-Z 201 & M-Z 202)
Credits: 4
Objective:

Total Marks: 100
External Examination: 80
Internal Assessment: 20
Time: 4 Hours

1. To acquire practical knowledge of histological studies and water analysis which will help further in research studies.

Course Outcomes:

- CO1** Provide significant knowledge of biological research with safe lab practices.
CO2 Students will understand application of histological studies in clinical and medical sciences and will be able to prepare these slides
CO3 Students will be able to identify biodiversity around them and spread awareness about biodiversity conservation
CO4 This course will help the students to understand research based knowledge methods for the welfare of human.

Course Contents:

1. Study of various components of pond and grassland ecosystem.
2. Determination of Water quality characteristics viz: Dissolved oxygen, pH, free carbon dioxide, salinity, transparency, alkalinity and hardness.
3. Methods of population density measurements.
4. Estimation of biodiversity indices.
5. Field Visit to Aquatic, Forest and other ecosystems for identification of biota.
6. Preparation of tissues for microtomy and demonstration of cryo techniques
7. Histochemistry: Methods of fixation of different tissues.
8. **Histochemical test:**
 - (a) Haematoxylin-eosin
 - (b) Toluidine Blue
 - (c) Sudan Block-B
 - (d) Mercury bromophenol blue
 - (e) Methyl green-pyronin-Y
 - (f) Periodic acid Schiff's
 - (g) Acid phosphatase
 - (h) Alkaline phosphatase
9. Demonstration of live gametes and their staining procedure.
10. Determination of optimum pH, temperature and concentration for optimum activity of salivary amylase,
11. To demonstrate that the optimum activity of trypsin enzyme is pH temperature dependent.
12. Qualitative test of vitamins and Quantification of vitamin A and C.
13. Total RBC, WBC and Different WBC count
14. Estimation of Blood plasma

SEMESTER – II

Paper:M-Z 208 (Core)
Practical (Based on Papers M-Z 203 & M-Z 204)
Credits: 4

Total Marks: 100
External Examination: 80
Internal Assessment: 20
Time: 4 Hours

Objective: Providing the students with the ability to recognize the major groups of vertebrates and to identify the specimens of different classes.

Course outcomes:

CO1: Students will be able to understand the processes involved in the recognition of key groups of vertebrates

CO2: Students will be able to identify and classify the available specimens of vertebrate classes.

CO3: Students will have ability to prepare permanent mounts of different types of scales and hair to study the details of their structure and their role in the identification of specimens.

CO4: Will be able to elaborate the different systems of vertebrates such as fish, frog rat and pigeon.

Course Contents:

1. Demonstration of cranial nerves and aortic arches of *Scoliodon*, Digestive system, Nervous system, Arterial and venous system of frog, Lizard, Pigeon and rabbit.
2. Museum specimens and slides :
 - (i) Protochordates
 - (ii) Fishes
 - (iii) Amphibians
 - (iv) Reptiles
 - (v) Birds
 - (vi) Mammals
3. Comparative Osteology
 - (i) Skull and lower jaw
 - (ii) Vertebrae
 - (iii) Girdles
 - (iv) Limb bones
4. Temporary/Permanent mounts of Hair & Scales
5. Different types of Feathers, Scales & Hair
6. Construction of Phylogenetic tree

Syllabus of M.Sc. Zoology

w.e.f. Session 2021-22

SEMESTER – III

Paper: M-Z 301 (Core)
Molecular Biology
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives:

1. To make students understand the complex molecular mechanisms occurring in cell and the applications of molecular technologies.
2. In depth knowledge of central dogma processes inside the cell

Outcomes:

- CO1** Learn the necessary information about the chemistry of life to allow the students to understand the basis of molecules of life.
- CO2** Acquire a clear understanding about protein sorting and their mechanisms
- CO3** To know about Recombination and repair mechanism in DNA
- CO4** Detail understanding of molecular techniques of genomes analysis

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more selecting one questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT-I

1.0 DNA Replication

- 1.1 Prokaryotic and Eukaryotic DNA replication
- 1.2 Mechanics of DNA replication
- 1.3 Enzymes and accessory proteins involved in DNA replication

2.0 Transcription

- 2.1 Prokaryotic and Eukaryotic transcription
- 2.2 General and specific transcription factors
- 2.3 Regulatory elements and mechanisms of transcription regulation
- 2.4 Transcriptional and post-transcriptional gene silencing.
- 2.5 Post-transcriptional Modifications in RNA
- 2.6 5'-Cap formation, 3'-end processing and polyadenylation
- 2.7 Splicing, Editing, Nuclear export of mRNA, mRNA stability

UNIT-II

3.0 Translation

- 3.1 Genetic code and deciphering of genetic code
- 3.2 Prokaryotic and Eukaryotic translation
- 3.3 The translational machinery
- 3.4 Adaptor hypothesis, Kozak rule
- 3.5 Mechanisms of initiation, elongation and termination
- 3.6 Regulation of translation

4.0 Transport of Protein

- 4.1 Co- and Post-translational transport of proteins
- 4.2 Co- and Post-translational modifications of proteins
- 4.3 Protein trafficking/sorting

UNIT-III

5.0 Recombination and Repair

- 5.1 Holiday junction, gene targeting, gene disruption
- 5.2 Cre/lox recombination
- 5.3 RecA and other recombinases
- 5.4 DNA repair mechanisms

6.0 Antisense and Ribozyme technology

- 6.1 Molecular mechanisms of antisense molecules
- 6.2 Inhibition of splicing, polyadenylation and translation
- 6.3 Disruption of RNA structure and capping
- 6.4 Biochemistry of ribozyme; hammerhead, hairpin and other ribozymes
- 6.5 Strategies for designing ribozymes
- 6.6 Application of antisense and ribozyme technologies

UNIT-IV

7.0 Molecular mapping of genome

- 7.1 Genetic and physical maps
- 7.2 Physical mapping and map-based cloning
- 7.3 Southern and fluorescence *in situ* hybridization for genome analysis
- 7.4 Chromosome micro-dissection and micro-cloning
- 7.5 Molecular markers in genome analysis RFLP, RAPD and AFLP analysis and their applications
- 7.6 Molecular markers linked to disease resistance genes

8.0 rDNA Technology:

- 8.1 Gene-cloning
- 8.2 Vectors
- 8.3 cDNA and genomic libraries
- 8.4 Blotting techniques
- 8.5 Chromosome walking
- 8.6 Application of rDNA technology

Suggested Reading Materials

1. Molecular Biology of the Gene, J.D. Watson, N.H. Hopkins, J.W. Roberts, J.A Steitz and A.M. Weiner. The Benjamin/Cummings Pub. Co., Inc., California.
2. Molecular Cell Biology, J. Darnell, H. Lodish and D. Baltimore Scientific American Books, Inc., USA
3. Molecular Biology of the Cell, B. Alberts, D. Bray, J. Lewis, M. Raff, K. Roberts and J.D. Watson. Garland Publishing Inc., New York.
4. Gene VI, Benjamin Lewin, Oxford University Press, U.K.
5. Molecular Biology and Biotechnology. A comprehensive desk reference, R.A Meyers (Ed.), VCH Publishers, Inc., New York.
6. Molecular Cloning: a Laboratory Manual, J. Sambrook, E.F. Fritsch and T. Maniatis, Cold Spring Harbor Laboratory Press, New York.
7. Introduction to Practical Molecular Biology, P.D. Dabre, John Wiley & Sons Ltd., New York.
8. Molecular Biology LabFax, T.A Brown (Ed.), Bios Scientific Publishers Ltd., Oxford.

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test**: Knowledge of the students is tested through surprisetests, quiz & session tests.

CO-PO MAPPING for M-Z 301

	PO1	PO2	PO3	PO4	PO5	PO6
CO1	3	3	1	2	3	2
CO2	2	2	1	2	2	2
CO3	2	2	1	2	2	2
CO4	3	2	1	2	2	2
Average	2.5	2.25	1	2	2.25	2

CO-PSO MAPPING for M-Z 301

	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	3	2	2	2	3	3
CO2	2	2	2	2	3	3
CO3	2	2	2	2	3	3
CO4	3	2	2	2	3	3
Average	2.5	2	2	2	3	3

SEMESTER – III

Paper: M-Z 302 (Core)
Molecular Endocrinology
Credits: 4

Total Marks: 100 Theory Examination: 80 Internal Assessment: 20 Time: 3 Hours
--

Objectives: To explore the molecular approaches to study the mechanism of action of hormones and related molecules involved in various physiological processes

Outcomes:

- CO1** It helps in explaining hormonal synergism and antagonism at the molecular level
- CO2** Students will be able to identify the organs involved in the endocrine function and an understanding of appropriate key human endocrine disorder will also be developed
- CO3** Develop an in-depth comprehensive knowledge of endocrinology from a physiological, cellular, and molecular perspective.
- CO4** This course will make students understand the basic structure and chemical organization of hormones and various signaling molecules.

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more selecting one questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT-I

1. Basic concept of endocrinology, its scope and role in molecular biology.
2. **Chemical nature of hormones;**
 - 2.1 Amino-acid derived hormones
 - 2.2 Peptide hormones
 - 2.3 Glyco-protein hormones,
 - 2.4 Steroid hormones and
 - 2.5 Prostaglandin
3. Biosynthesis of peptide hormones, transcriptional and post-transcriptional modifications
4. Biosynthesis and secretion of thyroid hormones. Thyroid hormone disorders.

UNIT-II

5. Prostaglandin structure, type, synthesis and biological activities.
6. Mechanism of action of peptide hormones; concept of second messengers, cAMP, cGMP, Ca⁺⁺, IP₃, DAG, NO, signal transduction mechanisms.
7. Mechanism of action of steroid hormones; Cross talk concept, Heat shock proteins.

UNIT-III

8. Hormonal regulation of Metabolism:

- 8.1 Role of Insulin & Glucagon in regulation of Carbohydrate metabolism
- 8.2 Metabolic regulatory hormones in Lipid & Protein metabolism

- 9. Gastrointestinal hormones and their role in regulation of metabolic activity.
- 10. Endocrine regulation of calcium and phosphate homeostasis in mammals.

UNIT-IV

11. Genetic basis of hormonal disorders.

- 11.1 General principle and classification of hormonal disorders
- 11.2 Genetic basis of growth hormone disorder
- 11.3 Genetic basis of PCOS

12. Sequence-specific DNA binding receptor proteins

- 12.1 Nuclear receptor proteins
- 12.2 Cytosolic receptor proteins
- 12.3 Cell surface receptor proteins
- 12.4 Their role in gene transcription, cell differentiation and cell proliferation.

13.0 Regulatory substances –Eicosanoids, Growth factors, Thymus gland & Kinins.

Suggested Reading Materials

- 1. Benjamin Lewin, Genes VII, Oxford University Press.
- 2. Lodish et al. Molecular Cell Biology.
- 3. Ethan Bier. The Coiled Spring, Cold Spring Harbor Press.
- 4. L.P. Freedman. Molecular Biology of Steroid and Nuclear Hormone Receptors, Birkhauser.
- 5. G. Litwack. Biochemical Actions of Hormones, Academic Press.

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprisetests, quiz & session tests.

CO-PO MAPPING for M-Z 302

	PO1	PO2	PO3	PO4	PO5	PO6
CO1	3	2	3	2	1	2
CO2	3	3	2	2	2	2
CO3	2	3	3	3	3	1
CO4	2	2	1	3	3	3
Average	2.5	2.5	2.25	2.5	2.25	2

CO-PSO MAPPING for M-Z 302

	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	3	3	2	3	2	1
CO2	2	2	3	3	3	3
CO3	2	3	3	2	2	2

Average	2.5	2.25	2.5	2.25	2.5	2.25

SEMESTER – III

Paper: M-Z 303 (Core)
Applied Zoology
Credits: 4

Total Marks: 100 Theory Examination: 80 Internal Assessment: 20 Time: 3 Hours
--

Objectives: To create acquaintance about economic and therapeutic importance of animals for humans *vis-à-vis* animal welfare.

Outcomes:

- CO1** Awareness about use of certain animals and their products for human welfare *vis-à-vis* animal welfare will be created.
- CO2** Information regarding the animals that are responsible for economic losses will also be acquainted.
- CO3** Students will able to explain the basic concepts of sericulture, apiculture, lac culture and other animal industries along with economics of pest management techniques.
- CO4** Students will able to justify the animals in pharmaceutical research.
- CO5** Students will gain knowledge about various disease vectors and their impact on human.

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more selecting one questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT- I

- 1.0 Vertebrate and non vertebrate pests (Wheat, Rice, Sugarcane and cotton) their harmful status and economic importance.
 - 1.1 Integrated pest management. Cultural control, Physical control, Mechanical control, Chemical control, Biological control, Herbal control and legal control and Pheromones involved in pest management.
- 2.0 Insects of medical and veterinary importance.

UNIT- II

3.0 Zoonosis:

- 3.1 Viral- Rabies,
- 3.2 Japanese encephalitis;
- 3.3 Bacterial- Brucellosis, Plague;
- 3.4 Rickettsial- Rickettsial zoonosis, Q fever, Scrub typhus.

- 3.5 Protozoan *Entamoeba histolytica*, *Plasmodium vivax* and *Trypanosoma gambiense*), Helminth and Nematode diseases in humans (Schistosomiasis, Cestodiasis, Termatodasis, Filariasis and Ascariasis).

UNIT - III

Sericulture, Apiculture and Lac culture

- 4.0 Sericulture : Types of silk, species of silk moth (scientific names), Silkworms and their host plants, mulberry silk worm culture, agricultural aspects of mulberry plant cultivation, extraction and reeling of silk, natural enemies and diseases of silkworm and their control.
- 5.0 Apiculture : Species of honey bees in India, life history of *Apis cerana indica*, agriculture techniques, bee products and their uses, natural enemies and diseases of honey bee and their control.
- 6.0 Lac culture: lac insect (Scientific name), composition of lac, strains of lac insect, cultivation of lac host plants (in brief) processing of lac and uses of lac.
- 7.0 Wool and fur industry, leather industry.

UNIT- IV

- 8.0 Vermiculture, Poultry keeping and Dairy industry.
- 9.0 Prawn culture, Pearl culture.
- 10.0 Edible fresh water fishes and their diseases, Snakes (Haryana) and its Economic importance of snake venom
- 11.0 Pharmaceuticals from animals and role of animals in stem cell therapy. How to harvest the technology from animals for human welfare
- 12.0 Animal welfare and ethics, CPCSEA guidelines and maintenance of experimental animals

Suggested Readings:

1. Insect Pest Management by Dent, D.
2. Agricultural Entomology by Hill, D.S., Timber Press.
3. General and Applied Entomology by David, B. V. & Ananthkrishnan, T. N., Tata McGraw-Hill Publishing.
4. Entomology and Pest Management by Pedigo L. P. Prentice Hall, India.
5. General and Applied Entomology by Nayar K. K. and T. N. Ananthkrishnan and B. V. Davis, Tata McGraw Hill Publications. New Delhi.
6. Agricultural Pests: Biology and Control Measures by B. M. Deoray and T. B. Nikam, Nirali Publication, Pune.
7. Concepts of Insect Control by Ghosh M. R. Wiley Eastern Ltd. New Delhi.
8. Economic Zoology. Shukla Upadhyay, Rastogi Publication, Meerut, India, 1998.

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprisetests, quiz & session tests.

CO-PO MAPPING for M-Z 303

	PO1	PO2	PO3	PO4	PO5	PO6
CO1	2	2	2	2	3	3
CO2	2	1	3	3	2	2
CO3	2	2	1	2	3	3
CO4	2	2	2	2	3	3
Average	2	1.75	2	2.25	2.75	2.75

	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	3	2	3	2	3	3
CO2	2	3	2.5	2	1	3
CO3	3	2	2.5	1	3	3
CO4	2	3	3	3	3	3
Average	2.5	2.5	2.75	2	2.5	3

SEMESTER – III

Paper: M-Z 304 (Elective)
Molecular Reproduction-I
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives:

1. To introduce students to the essential and unifying concepts of physiology, reproduction, and development in animals which are central to modern Biology.
2. To address the basic biological mechanisms that underlie male and female reproduction that pertain to reproductive health issues, such as contraception, infertility, sexually transmitted diseases, and reproductive aging.

Outcomes: Students will be able to understand:

- CO1** The cellular, molecular and biochemical changes in reproductive physiology
CO2 The basic and molecular concepts of spermatogenesis folliculogenesis, ovulation, follicular atresia and germ line- soma interaction.
CO3 The importance of diet, exercise, stress and yoga during ageing
CO4 Various problems of male sterility and female infertility.

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more selecting one questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT-I

1. **Male Reproductive system:** Cytology of testis and spermatozoon, physiology of spermatogenesis, molecular bases of testicular steroidogenesis, endocrine regulation of steroidogenesis, role of male accessory sex structures.
2. **Female Reproductive System:** Structural and histochemical aspects of ovary and primordial follicles.
3. **Folliculogenesis:** Dynamics of follicular growth and maturation, intracellular dynamics of cholesterol synthesis-two cell theory, endocrine regulation of folliculogenesis.

UNIT-II

4. **Oocyte Maturation-** Nuclear, epigenetic and cytoplasmic; oocyte granulosa interactions
5. **Ovulation-** Mechanism, Induced and spontaneous ovulators.
6. **Corpus Luteum-**Structure and functions, molecular mechanism and endocrine regulation of luteinization, luteal steroidogenesis, corpus luteum of pregnancy.

UNIT-III

7. **Follicular atresia:** Causes, regulation and significance, factors affecting atresia, role of granulosa cells apoptosis in atresia.
8. **Male sterility-** Azoospermia, Oligozoospermia, Asthenozoospermia, Varicocele, Genetic basis for male infertility.
9. **Female infertility-** genetic and endocrinal factors, PCOD, atresia.

UNIT-IV

10. **Female reproductive aging:** epidemiology, theories, markers, significance, implications, fertility preservation.
11. **Age-Related Reproductive disorders-** perimenopause, premenopause, post menopausal disorders, osteoporosis.
12. Effect of diet, nutrition, stress, disease, exercise and yoga on reproductive ageing.

Suggested Reading Materials:

1. Guraya S.S. (1998). Cellular and Molecular Biology of General development and Maturation in mammals Narosa Publishing House, New Delhi.
2. Hafez E.S.E.(1994). "Reproduction in farm animals". Lea Febighiese.
3. Gurays S.S. (2000). Comparative Cellular and Molecular Biology of Ovary in mammals. I.B.H., New Delhi.
4. The Physiology of Reproduction, second edition, Vol 1 and 2, edited by Ernst Knobil and Jimmy D. Neil. *Raven Press*, 2014.
5. Male Reproductive Function, edited by Christina Wang. *Kluwer Academic Publishers*, 1999.
6. The ovary, edited by Solly Zuckerman Baron Zuckerman, Barbara J. Weir, T. G. Baker. *Academic Press*.
7. The ovary, edited by Peter C.K. Leung and Eli Y. Adashi, Elsevier (Academic Press), 2004.
8. Cell and Molecular Biology of Testis, edited by Claude Desjardins and Larry L. Ewing. *Oxford University Press US*.
9. Reproductive Endocrinology: Physiology, Pathophysiology, and Clinical Management, edited by Samuel S. C. Yen, Robert B. Jaffe, Robert L. Barbieri. *Saunders publisher*.
10. Regulation of Implantation and Establishment of Pregnancy in Mammals, Editors: Rodney D Geisert, Fuller W. Bazer, ISBN 978-3-319-15856-3, Springer International Publishing, 2015.
11. Implantation and early development, Editors: Hilary Critchley, Ian Cameron and Stephan Smith, ISBN 9781107784680, Cambridge University press, 2014.
12. Implantation, Biological and Clinical Aspects, Editors: Michael G. Chapman, J. GeddisGrudzinskas, Tim Chard, ISBN 978-1-4471-3531-9, Springer-Verlag, 1988.

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test**: Knowledge of the students is tested through surprisetests, quiz &session tests.

CO-PO MAPPING for M-Z 304

Average	2.25	2.25	2.25	2.25	2.0	2.25

SEMESTER – III

Paper: M-Z 305 (Elective)
Animal Behaviour and Wildlife Conservation – I
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives:

1. To know the important concept of animal behavior
2. In depth knowledge of Theory and practice of wildlife conservation

Outcomes:

- CO1** It will boost students for betterment of diversified resources and life forms for better conservational measures with keen understanding.
- CO2** Acquire a clear understanding about behavior patterns in animals
- CO3** Students will be aware and understand the concept of protected area system
- CO4** Detail understanding of conservational approaches and organizations

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more selecting one questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT-I

1. Concept of Animal behaviour; Mile-Stones in the history of animal behaviour and scope.
2. Stereotyped and acquired behaviour patterns: Tropisms, Taxes, Reflexes, Instincts, learning & reasoning; Change in major modes of adaptive behaviour in phylogeny.
3. Perception of the environment : Mechanical, Electrical, chemical, olfactory, auditory, visual
4. Biological rhythms and concept of biological clock.

UNIT-II

5. Motivation: Introduction, goal oriented behaviour, biological drives – Primary and Secondary drives.
6. Concept of learning: law of learning, types of learning – Habitation, trial & error learning, latent learning, Insight, Imprinting, Classical conditioning & Instrumental learning.
7. Concept of Migratory behaviour

UNIT-III

8. Wildlife: Definition, significance and Biogeographic/wildlife zones of India, Bio-diversity of the Indian Subcontinent and World.

9. Protected Area Systems: Concept, Historical background, categories and management objectives of protected areas, world growth of protected areas, and Present status of National PA-Systems.
10. Theory and Practice of Biosphere Reserves of the world: Biosphere Reserves of India, Wildlife conservation techniques.

UNIT-IV

11. Natural Heritage Sites of the world, Natural Heritage sites in India. Important National Park and Wildlife Sanctuaries of India
12. Wildlife and livelihood; Wildlife and illegal trade & control;
13. Role of WWF, IUCN, UNEP,
14. Red Data Book; Categories of Endangered Wildlife Species.

Suggested Reading Materials:

1. Techniques for wildlife Census in India by W.A. Rogers (A field manual); Wildlife Institute of India, Dehradun.
2. Wildlife Wealth of India by T.C. Majupuria; Tecpress Services, L.P., 487/42-SOL-Wattenslip, Pratunam Bangkok, 10400, Thailand
3. Ali, S. Ripley S.D. Handbook of Birds of India, Pakistan 10-Vols. Oxford University Press, Bombay.
4. The Book of Indian Animals by S.H. Prater, BNHS-Publication, Bombay.
5. Wildlife in India by V.B. Saharia Natraj Publishers, Dehradun.
6. E.P. Gee, The Wildlife of India.

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprisetests, quiz & session tests.

SEMESTER – III

Paper: M-Z 306 (Elective)
Fish, Fisheries and Aquaculture – I
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives:

1. To acquaint the students about the huge diversity of fishes
2. To acquaint about biology of fish and methods of aquaculture, which are important contributors to food security.

Outcomes:

- CO1** Through this core elective paper student/s will learn identification of fish species using classical morphological methods
- CO2** This core elective paper will generate knowledge about various methods and significance of aquaculture
- CO3** It will create awareness about food security, significance of protein in diet and importance of fish in fighting protein deficiency
- CO4** It will also be helpful in acquainting with methods of conserving fish diversity.

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more selecting one questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT - I

- 1.0 Definition of Fish, Fisheries and aquaculture; Types of Aquaculture
- 2.0 Classification of fishes with distinguishing characters and examples of each group.
- 3.0 Estuarine, Marine, Riverine and wetland fisheries: characteristic species and their exploitation.

4.0 Culture fisheries

- 4.1 Cultivable organisms for aquaculture.
- 4.2 Criteria of selection of cultivable fishes

UNIT - II

- 5.0 Design, construction and maintenance of fish culture ponds.
- 6.0 **Ecology of fish pond ecosystem**
 - 6.1 Physico chemical conditions of ponds water and soil

- 6.2 Biological conditions of waters
 - 6.3 Weeds and their control
 - 6.4 Productivity of fish pond
 - 6.5 Classification of water bodies on the basis of productivity.
- 7.0 **Aquatic pollution:** Sources of water Pollution, Impact of pollution on aquatic organisms, Impact of exotic fish species on aquatic biodiversity, Fishes and their relationships with abiotic and biotic factors.
- 8.0 Aquaculture Ranching and Rational fishery.

UNIT -III

- 9.0 Fish integument: Exoskeleton and colouration
- 10.0 Fins: origin, types and functions
- 11.0 Food and feeding habits of fishes, Digestion in fishes
- 12.0 Respiratory system Gill structure and functions, Accessory respiratory organs swim bladder and webberian ossicles
- 13.0 Osmoregulation in fishes

UNIT - IV

- 14.0 Receptors in fishes
 - 14.1 Chemoreceptors
 - 14.2 Lateral line organs
 - 14.3 Eye Ear
 - 14.4 Pineal organ
- 15.0 Hormones and reproduction: Induced breeding in carps and catfishes.
- 16.0 Identification of different maturity stages of fishes.
- 17.0 Migration in fishes
- 18.0 Age and growth studies

Average	2.5	2.5	2	2	2.5	2.75

SEMESTER – III

Paper: M-Z 307 (Core)

Seminar

Credits: 1

Total Marks: 25

Objective:

- 1. To develop speaking skills in the students**
- 2. To have ability to prepare and present on any topic assigned to them**

Course Outcomes:

- CO1.** Students will be able to speak on the topic assigned to them after going through related Literature
- CO2.** Students will be able to prepare power point presentations
- CO3.** Students will have knowledge of different topics of Zoology especially current topics
- CO4.** Students will be able to comprehend vast topic in limited sphere

CO-PO MAPPING for M-Z 307

SEMESTER – III

Paper: M-Z 308 (Open Elective)
Animal Diversity & Conservation
Credits: 2

Total Marks: 50 Theory Examination: 40 Internal Assessment: 10 Time: 3 Hours

Objectives:

1. Aim of conservation of biodiversity is to protect, preserve and manage natural resources
2. To expose students to the basic understanding of animal diversity, its significance in our life and environment.

Outcomes:

- CO1** Biological diversity provides immediate benefits to society such as recreation and tourism
- CO2** It will generate initiative among students for conservation of our rich natural resources and diversified life forms.
- CO3** It gives jobs opportunities for people by establish training research programmes that have been launched for conservation and sustainable use of bio diversity.
- CO4** Expand the knowledge of researchers to explore diversity of animal, its protection from extinction and their habitat from destruction

Note:

1. Nine questions will be set in all. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise two questions from each unit (I- IV). The candidate will be required to attempt question No. 1 and four more selecting two questions from each unit.
2. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT-I

- 1.0 Wildlife: Definition, significance
- 2.0 Techniques of animal counts (Examples of Tiger count)

UNIT- II

- 3.0 Wildlife zones of the India
- 4.0 Wildlife Tourism

UNIT- III

- 5.0 Biodiversity: Concept, threats to biodiversity, its
- 6.0 Conservation (objectives and strategies), biodiversity indices,

UNIT - IV

7.0 Concept and objectives of Protected areas:

8.0 Important Protected Areas of India (Biosphere reserve, National Park & Wildlife sanctuaries)

9.0 Red Data Book, IUCN Categories of wildlife species

Suggested Reading Materials:

1. Techniques for wildlife Census in India by W.A. Rogers (A field manual); Wildlife Institute of India, Dehradun.
2. Wildlife Wealth of India by T.C. Majupuria; Tecpress Services, L.P., 487/42-SOL-Wattenslip, Pratunam Bangkok, 10400, Thailand
3. The Book of Indian Animals by S.H. Prater, BNHS-Publication, Bombay.
4. Wildlife in India by V.B. Saharia. Natraj Publishers, Dehradun.
5. E.P. Gee, The Wildlife of India.

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprisetests, quiz & session tests.

SEMESTER – III

Paper: M-Z 309 (Core)
Practical (Based on Papers M-Z 301 to M-Z 303)
Credits: 4

Total Marks: 100
External Examination: 80
Internal Assessment: 20
Time: 4 Hours

Objective:

1. To develop understanding of biological and analytical techniques to explain biological activities.

Outcomes:

CO1 Students will be able to explain the basic principle, procedures and applications of various biological techniques that are used to study the basic biological processes.

CO2 Will understand the basic concepts of applied Zoology in human welfare.

CO3 Will be able to perform electrophoresis for scope in research field.

CO4 Study of endocrinology will help the student to identify the organs involved in the endocrine function and which help in understanding human endocrine disorder.

1. Non-protein nitrogenous substances: qualitative estimation of serum Bilirubin serum and urine creatinine.
2. Estimation of Acid and alkaline phosphates.
3. Barr body examination from Buccal smear.
4. Sex chromatin from blood sample.
5. *In-vitro* study of effect of hormones.
6. Study of **histological slides** and endocrine glands of vertebrates.
7. **Blood smear preparation**, Blood groups, hematin crystals, haemoglobin count, DLC, TLC etc.
8. Demonstration of SDS-PAGE
9. Demonstration of Agarose gel electrophoresis and preparation of gel
10. **Collection of different larva of mosquitoes**:-*Culex*; *Anopheles*; *Aedes*, marking out the basic **morphological** differences at larval level.
11. **Preparation of permanent mounts of adult mosquitoes**:*Culex* and *Aedes* and *Anopheles* - highlight differences, if any, between basic these important vectors.
12. Study of life cycle of honey bee, Lac insect, Silk worm, Cabbage butterfly.
13. Study on common household and agriculture pest.

SEMESTER – III

Paper: M-Z 310 (i) (Elective)
Practical (Based on Papers M-Z 304)
Credits: 4

Total Marks: 100
External Examination: 80
Internal Assessment: 20
Time: 4 Hours

OBJECTIVES

1. To provide students the opportunity to gain a first-hand laboratory experience of the structure, function, and development of the reproductive organs.
2. To gain experience in experimental design, cutting-edge research techniques, data analysis, and scientific report writing and will be introduced to the practicalities of reproductive manipulation and assisted reproductive technologies.

OUTCOMES: Students will be able-

- CO1** To develop the scientific attitude that makes the students open minded, critical observations, curiosity thinking etc.
- CO2** To acquire the specialized knowledge relevant to reproductive biology and biochemistry.
- CO3** To understand the basic and molecular laboratory techniques in both physiology and biochemistry.
- CO4** To acquire the knowledge about various male and female infertility problems

Course Contents:

1. Demonstration of male and female reproductive systems of earthworm, grass hopper, and rat.
2. Processing of reproductive tissues for microanatomy and histochemistry.
3. Study of permanent slides on mammalian reproductive tissues.
4. Study of folliculogenesis and atresia in rat ovary.
5. Study of apoptosis in gonads.
6. Extraction and estimation of macromolecules such as proteins, carbohydrates, lipids, and nucleic acids.
7. Isolation of testicular cells and ovarian follicular cells.
8. Oocyte collection; aspiration and slicing method.
9. Sperm morphology, capacitation, sperm count, and sperm motility.
10. Vaginal smear preparation to examine estrous cycle and pregnancy.
11. Oocyte maturation *in vitro*.
12. *In vitro* fertilization

SEMESTER – III

Paper: M-Z 310 (ii) (Elective)
Practical (Based on Papers M-Z 305)
Credits: 4

Total Marks: 100
External Examination: 80
Internal Assessment: 20
Time: 4 Hours

Objectives:

1. Practical knowledge of important concept and types of animal behavior
2. In depth knowledge of Theory and practice of ornithology

Outcomes:

CO1 It will boost students for keen understanding various behavioral activity of animal world

CO2 Students will acquire a clear practical understanding about behavior patterns in animals

CO3 Students will know about the practical approaches of protected area system in India

CO4 Detail understanding of residential and migratory nature of avian fauna

Course Contents (Animal Behaviour and Wildlife Conservation – I)

1. Designing of experiments, observations, techniques of data analysis, presentation of results and writing of laboratory report.
2. To demonstrate locomotive, explorative withdrawal and habituation behaviours in animals.
3. To demonstrate response of animals to light.
4. To demonstrate antennal grooming behaviour in cockroach.
5. Demonstration of food preferences in insects/pests
6. Investigation of habituation of diving response of mosquito larvae.
7. To study the effect of temperature on heartbeat of cockroach/ Gill movements in Fishes.
8. Field study of nesting behaviour of common available avian fauna of the region.
9. Study of Migratory Birds
10. To study mobbing response of birds.
11. Study of animal behavior patterns using repertoire sheets.
12. To prepare charts of wildlife zones of India and the world.
13. Field visits to local areas/Project Report

SEMESTER – III

Paper: Z 310 (iii) (Elective)
Practical (Based on Papers M-Z 306)
Credits: 4

Total Marks: 100
External Examination: 80
Internal Assessment: 20
Time: 4 Hours

Objectives :

1. To develop capability of identifying different species of fishes, their taxonomic status, their anatomy and osteology
2. To train students for analysis of physico-chemical and biological conditions of water

Outcomes:

- CO1** Student/s will be able to identify of fish species using classical morphological methods
- CO2** Students will be able to analyse physico-chemical status of water of lotic and lentic Components
- CO3** Students will be able to conduct qualitative and quantitative analysis of phyto and Zooplanktons
- CO4** This practical course will also be helpful to develop personnel to develop career in organizations where water quality analysis and fish diversity studies are carried out

Course Contents (Fish, Fisheries and Aquaculture – I):

1. Study of Anatomy and Morphology of important group of fishes.
2. Taxonomic study of common families, genera and species of fishes
3. Survey and Collection of fishes of Haryana
4. Examination of skeleton of cartilaginous and bony fishes
5. Study of histological and microscopic structure in fishes
6. Analysis of physical and chemical properties of water: Temperature, pH, turbidity, salinity, total solids, Dissolved oxygen, Free carbon-di-oxide, hardness, chlorides, orthophosphates, nitrates, ammonia
7. Qualitative and quantitative examination of Phyto and zooplanktons in a water body.
8. Determination of percent composition of different groups of phyto and zoo planktons
9. Determination of species diversity of phyto and zooplanktons
10. Study of Aquatic weeds and aquatic insects

Department of Zoology, KUK

Syllabus of M.Sc. Zoology

w.e.f. Session 2021-22

SEMESTER – IV

Paper: M-Z 401 (Core)
Developmental Biology
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objective: To explain how a variety of interacting processes generate an organism's heterogeneous shapes, size and structural features that arise on the trajectory from embryo to adult, or more generally throughout a life cycle.

Outcomes:

- CO1** Based on learning contents of embryology, students can have a systematic and organised learning about the knowledge and concepts of growth and development.
- CO2** Developmental biology displays a rich array of material and conceptual practices that can be analysed to better understand the scientific reasoning exhibited in experimental life sciences
- CO3** To understand biological processes that takes place in and between cells and in and between organisms in nature.
- CO4** This understanding will make the students capable of describing and explaining both biological processes and their importance for living organisms.

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting four questions from each unit (I - IV). The candidate will be required to attempt question No. 1 and four more selecting two questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT - I

1. Introduction to animal development:
 - 1.1 Problems of developmental biology
 - 1.2 Developmental patterns in metazoans
 - 1.3 Development in unicellular eukaryotes
 - 1.4 Development in Dictyostelium
2. Creating multicellularity:
 - 2.1 Cleavage types and significance, Blastula, Fate maps, cell lineages
 - 2.2 Comparative account of gastrulation
3. Early vertebrate development:
 - 3.1 Neurulation and ectoderm
 - 3.2 Mesoderm and endoderm

UNIT - II

4. Cytoplasmic determinants and autonomous cell specification:
 - 4.1 Cell commitment and differentiation
 - 4.2 Germ cell determinants
 - 4.3 Germ cell migration
 - 4.4 Progressive cell - Cell interaction and cell specification fate
 - 4.5 Cell specification in nematodes

5. Body pattern formation:
 - 5.1 Establishment of Body axis in mammals and birds
 - 5.2 Proximate tissue interactions
 - 5.3 Genetics of axis specification in *Drosophila*

UNIT- III

6. Hormones as mediators of development:
 - 6.1 Amphibian metamorphosis
 - 6.2 Insect metamorphosis

7. Biology of sex determination:
 - 7.1 Chromosomal sex determination – Mammals, *Drosophila* and Nematodes
 - 7.2 Testis determining genes
 - 7.3 Secondary sex determination in mammals
- 7.4 Environmental sex determination.

8. Cell death and cell renewal
 - 8.1 Programmed cell death
 - 8.2 Stem cells and the maintenance of adult tissues
 - 8.3 Embryonic stem cells and therapeutic cloning

UNIT - IV

- 9 Environmental evolution and animal development
 - 9.1 Environmental cues and effects
 - 9.2 Malformations and disruptions
 - 9.3 Changing evolution through development modularity
 - 9.4 Developmental constraints

10. Homeobox concept in different phylogenetic groups
 - 10.1 Cell diversification in early animal embryo
 - 10.2 Tetrapod limb development
 - 10.3 Skeletal muscle regeneration
 - 10.4 Connective tissue cell family
- 10.5 Blood cells formation

Suggested Reading Material:

1. S.F. Gilbert. Developmental Biology. Sinauer Associates Inc., Massachusetts. Ethan Bier. 'The Cold Spring'. Cold Spring Harbor Laboratory Press, New York.
2. Essentials of Developmental Biology: JMW Slack [Latest edition] .
3. Principles of Development: Louis Wolpert [Latest edition].
4. An Introduction to Embryology by B.I. Balinsky, Saunders, Philadelphia (1981).
5. Major Problems in Developmental Biology by H. Ursprung, Academic Press, New York, (1972).
6. The Control of Gene Expression in Animal Development by J.B. Gurdon, Harvard University, Press, Oxford (1974).
7. Gene activity in Early Development by Davidson, E.H. Academic Press, London (1977).
8. Development Biology (Vol.II) by Browder, L.W, Saunders (1984).

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprisetests, quiz & session tests.

SEMESTER – IV

Paper: M-Z 402 (Core)
Vertebrate Immunology
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives: To provide an understanding of fundamental immunology and the immunological basis of treatment of some common diseases.

Outcomes: The students will have understanding about

- CO1** How the immune system can fight infection and other diseases
- CO2** The strategies to improve existing vaccines and how to approach these
- CO3** Cellular and molecular basis of inflammatory response
- CO4** Mechanisms involved in control of immune response

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting four questions from each unit (I - IV). The candidate will be required to attempt question No. 1 and four more selecting two questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT-I

- 1.0 Phylogeny and Ontogeny of immune system
 - 1.1 Innate and Acquired Immunity
 - 1.2 Organization and structure of lymphoid organs
 - 1.3 Cells of the immune system and their differentiation
- 2.0 Nature of antigens and superantigens
 - 2.1 Antigenicity and immunogenicity
 - 2.2 Factors influencing immunogenicity
 - 2.3 Epitopes and haptens
- 3.0 Structure and Functions of Antibodies
 - 3.1 Classes and subclasses
 - 3.2 Gross and Fine structure
 - 3.3 Antibody mediated effector functions
- 4.0 Antigen-Ab interactions: Principles and Applications
 - 4.1 Cross Reactivity, Precipitation reactions, Agglutination reactions
 - 4.2 Radioimmunoassay, ELISA, Immunoprecipitation, Immunofluorescence

UNIT-II

- 5.0 Nature of immune response
 - 5.1 Humoral Immune Response
 - 5.2 Cellular Immune Response

- 6.0 Cytokines
 - 6.1 Cytokine Properties
 - 6.2 Cytokine receptors
 - 6.3 Cytokines and Immune response
 - 6.4 Cytokine Antagonists
 - 6.5 Cytokine Related Diseases

- 7.0 Cell-mediated effector functions
 - 7.1 Cell adhesion molecules
 - 7.2 Effector cells and molecules
 - 7.3 CTLs –Mechanism of action
- 7.4 NK cells-mechanisms of action

- 8.0 Hypersensitivity-Types and Mechanism.

UNIT-III

- 9.0 Complement System
 - 9.1 Components and functions of Complement system
 - 9.2 Pathways of complement system
 - 9.3 Regulation and biological consequences.

- 10.0 Major Histocompatibility Complex in mouse and HLA system in human
 - 10.1 Class I and class II molecules
 - 10.2 Expression and diversity
 - 10.3 Disease susceptibility and MHC/HLA

- 11.0 Organization and expression of Ig genes
 - 11.1 Multigene organization of Ig genes
 - 11.2 DNA rearrangements and mechanisms
 - 11.3 Generation of antibody diversity
 - 11.4 Differential expression of Ig genes.

UNIT-IV

- 12.0 T-Cell Maturation, Activation and Differentiation
 - 12.1 T-Cell Receptors- Organization and rearrangement of TCR genes, TCR-CD3 complex
 - 12.2 T-cell maturation and thymus
 - 12.3 T -cell activation and differentiation
 - 12.4 Cell death and T-cell population

- 13.0 B-cell generation, activation and differentiation
 - 13.1 B-cell receptors
 - 13.2 B-cell maturation, activation and proliferation
 - 13.3 T H-B-Cell interactions
- 14.0 Auto-immunity and Vaccines- Types – subunit, conjugate and recombinant vector vaccines.

Suggested Reading Material:

1. Kuby. Immunology, W.H. Freeman, USA.
2. W. Paul. Fundamentals of Immunology.
3. I.M. Roitt. Essential of Immunology, ELBS Edition.
4. Immuno Biology- The immune system in health and disease, Janeway, Travers, Walport and Shlomchik, Garland Science Publishing [Latest edition].
5. Fundamentals of Immunology by William E. Paul, Lippincott Williams & Wilkins Publishing [Latest edition].
6. Cellular and Molecular Immunology by Abul K. Abbas, Andrew H. Lichtman, Shiv Pillai, Elsevier Publishing [Latest edition].

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprisetests, quiz &session tests.

SEMESTER – IV

Paper: M-Z 403 (Core)
Environmental Toxicology
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives:

1. To apprise the students about the toxicants and their effects on human health
2. To identify relationships between chemical exposure and effects on physiological systems

Outcomes:

- CO1** The awareness about toxic agents, their different routes of exposure and their effects on humans and their livestock will be appraised.
- CO2** The students will have the knowledge about mode of transformation of toxicants
- CO3** It will help in creating skilled personnel in the field of environment protection and research.
- CO4** Students will have an understanding of ill-health and diseases that are related to exposure to chemicals in human everyday life

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting four questions from each unit (I - IV). The candidate will be required to attempt question No. 1 and four more selecting two questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT - I

1.0 Introduction to Environmental Toxicology:

- 1.1 Emergence of toxicity in the environment
- 1.2 Classical toxicology, ecotoxicology and environmental toxicology.
- 1.3 Classification of toxicants.

2.0 Toxic agents: Pesticides, metals, solvents radiation, carcinogens, poisons, bio-toxins, petrochemicals.

UNIT - II

3.0 Toxicant uptake:

- 3.1 Route of toxicant uptake/Absorption of toxicant at tissue and cellular level
- 3.2 Distribution and storage of toxicant.
- 3.3 Biotransformation and elimination of toxicant.

4.0 Xenobiotics: Definition, types and significance Target organ toxicity:

- 4.1 Hematotoxicity
- 4.2 Hepatotoxicity
- 4.3 Nephrotoxicity
- 4.4 Neurotoxicity

UNIT - III

- 5.0 Environmental Toxicology: Food additives, air, water and soil pollutants and Bioindicators.
- 6.0 Effect of pollutant on ecosystem with case study of important Organo-phosphorous and Organo-chlorine pesticides and Nitrates
- 7.0 Solid waste management: Primary waste products-Solid waste, toxic biological and hospital landfills, incineration, source reduction and recycling.

UNIT - IV

- 8.0 Bioremediation, its role and significance.
- 9.0 Toxicological risk assessment and management with reference to relevant case study.
- 10.0 Principles and significance of systematic toxicology.
- 11.0 Genotoxicology: Definition, Effects, molecular mechanisms and prevention.
- 12.0 Applications of toxicology anthropogenic activities and environment.
- 13.0 Human toxicology and medicinal ethics.

Suggested Reading Material:

- 1. Handbook of Solid Waste Management by Wilson, Van Nostrand, Reinhold.
- 2. Environmental Studies by D.B. Botkin, & E.A. Keller, Martill Publishing Co., Columbs, Toronto, London.
- 3. Bioremediation Technology by Fulekar, M.H.
- 4. Biotranformation: Bioremediation Technology for Health & Environmental Protection by R. D. Stapleton Jr. and V.P. Singh (Ed), Elsevier.
- 5. Casarett & Doull's Toxicology: The Basic Science of Poisons by Curtis Klaassen.
- 6. Ecotoxicology: The study of pollutants in ecosystems. 3rd Ed. Elsevier by Moriarty, F.
- 7. Environment concerns and strategies. Ashish Pub. House, NDL by T.N. Khushoo.
- 8. Environmental biology. Akashdeep Pub. House by R.R. Trevedi Gurdeep Raj.
- 9. Textbook: A Textbook of Modern Toxicology. Third Edition by E. Hodgson (Ed.). John Wiley & Sons, Inc. (Posted on the D2L content page.)
- 10. Environmental Health by Monroe T. Morgan

Average	2.5	1.75	2	1.75	2.25	2.75

SEMESTER – IV

Paper: M-Z 404 (Elective)
Molecular Reproduction-II
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives:

1. To introduce students to the essential and unifying concepts of physiology, reproduction, and development in animals which are central to modern biology to specify the targets for fertility regulation.
2. To address the basic biological mechanisms that underlies male and female reproduction that pertains to reproductive health issues, such as contraception, congenital malformations and infertility,

Outcomes: The students will have knowledge about the:

CO1 Basic and molecular concepts of reproductive physiology.

CO2 Cellular and molecular mechanisms of fertilization, implantation, pregnancy and lactation

CO3 The biological principles underlying contraceptive technology, and compare and contrast the various options for control of fertility, methods for assisted reproductive technologies to circumvent infertility.

CO4 The origin and characteristics of common congenital malformations, the maternal responses and complications of pregnancy.

Note

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting four questions from each unit (I - IV). The candidate will be required to attempt question No. 1 and four more selecting two questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT-I

1. **Sex Determination:** Chromosomal sex determination in mammals, Autosomal testis determining genes, Hormonal regulation of sex determination. Androgen insensitivity syndrome
2. **Reproductive cycles:** Menstrual cycle and its regulation in humans, Estrous cycle in rat, Estrous behaviour in cycling animals.
3. **Molecular bases of Fertilization in mammals:** Gamete transport, fertilization competence by gametes, capacitation, acrosome reaction, oocyte-sperm interaction, oocyte activation, gamete fusion.

UNIT – II

4. **Hormonal regulation:** Implantation, pregnancy, parturition, oxytocin- synthesis, secretion and its role in parturition, placenta and its hormones.
5. **Mammary glands-** Structure, development and physiology of lactation, milk synthesis and secretion; regulation and ejection of milk.

UNIT-III

6. **Apoptosis:** Molecular mechanism, regulation, and significance; Apoptosis in reproductive aging.
7. **Assisted reproductive techniques-** IVF, IUI, ICSI, GIFT, ZIFT, Surrogacy, negative aspects and recent trends in ART.
8. **Contraception:** Natural method (Fertility awareness), Surgical, Physical/Barrier methods, Chemical methods, Immunocontraception.

UNIT-IV

9. **Reproductive failure in females-**Ovarian dysfunction, estrus abnormalities, fertilization failure, Pregnancy wastage- embryonic mortality, fetal mortality, infectious and non-infectious causes, prenatal and neonatal mortality.
10. **Reproductive failure in males-**Congenital malformations-cryptorchidism, testicular hypoplasia, ejaculatory disturbances, sperm defects, fertilization failure.

Suggested Reading Materials:

1. Guraya S.S. (1998). Cellular and Molecular Biology of General development and Maturation in mammals Narosa Publishing House, New Delhi.
2. Hafez E.S.E.(1994).”Reproduction in farm animals”. Lea Febighiese.
3. Gurays S.S. (2000). Comparative Cellular and Molecular Biology of Ovary in mammals. I.B.H., New Delhi.
4. The Physiology of Reproduction, second edition, Vol 1 and 2, edited by Ernst Knobil and Jimmy D. Neil. *Raven Press*, 2014.
5. Male Reproductive Function, edited by Christina Wang. *Kluwer Academic Publishers*, 1999.
6. The ovary, edited by Solly Zuckerman Baron Zuckerman, Barbara J. Weir, T. G. Baker. *Academic Press*.
7. The ovary, edited by Peter C.K. Leung and Eli Y. Adashi, Elsevier (Academic Press), 2004.
8. Cell and Molecular Biology of Testis, edited by Claude Desjardins and Larry L. Ewing. *Oxford University Press US*.
9. Reproductive Endocrinology: Physiology, Pathophysiology, and Clinical Management, edited by Samuel S. C. Yen, Robert B. Jaffe, Robert L. Barbieri. *Saunders publisher*.
10. Regulation of Implantation and Establishment of Pregnancy in Mammals, Editors: Rodney D Geisert, Fuller W. Bazer, ISBN 978-3-319-15856-3, Springer International Publishing, 2015.

11. Implantation and early development, Editors: Hilary Critchley, Ian Cameron and Stephan Smith, ISBN 9781107784680, Cambridge University press, 2014.
12. Implantation, Biological and Clinical Aspects, Editors: Michael G. Chapman, J. GeddisGrudzinskas, Tim Chard, ISBN 978-1-4471-3531-9, Springer-Verlag, 1988.

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprisetests, quiz & session tests.

SEMESTER – IV

Paper: M-Z 405 (Elective)

Animal Behaviour and Wildlife Conservation – II

Credits: 4

Total Marks: 100

Theory Examination: 80

Internal Assessment: 20

Time: 3 Hours

Objectives:

1. To know the important concept of animal behavior
2. In depth knowledge of Theory and practice of wildlife conservation

Outcomes:

- CO1** It will boost students for betterment of diversified resources and life forms for better conservational measures with keen understanding and new approaches.
- CO2** Acquire a clear understanding about social behavior patterns in animals
- CO3** To know about the concept of wildlife census techniques
- CO4** Detail understanding of conservational approaches in wild

Note

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting four questions from each unit (I - IV). The candidate will be required to attempt question No. 1 and four more selecting two questions from each unit.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT-I

- 1.0 Social behaviour:
 - 1.1 Aggregations and society;
 - 1.2 Advantages of group living;
 - 1.3 Types of social organization in animals
 - 1.4 Group selection, kin selection, altruism, reciprocal altruism.
 - 1.5 Territoriality and parental care
 - 1.6 Behaviour Ecology: Habitat selection
- 2.0 Social behaviour of termites, ants and primates.
- 3.0 Various means of communication in animals: Chemical, Visual, auditory, touch etc.

UNIT-II

- 4.0 Hormones and animal Behaviour: Hormones important to behavioural regulation; Genetic basis of behaviour
- 5.0 Aggressive behaviour; sexual attraction and sexual behaviour.
- 6.0 Pheromones and animal behaviour: types of pheromones, role of pheromones in animal behaviour; pheromones of social insects, Human Ethology

UNIT-III

- 7.0 Wildlife Census: Planning a wildlife census, understanding sample counts, Block counts, Road side counts, Dung counts, Pugmark census, Water-hole census.

- 8.0 Study of signs and symptoms: A practice of recording field observations, Bio-telemetry, Ageing and Sexing techniques.
- 9.0 Wildlife Tourism: Definition scope and range; Popular Wildlife Tourist Sports of the world, Popular Wildlife spots in India, Sustainable use of wildlife spots.

UNIT-IV

- 10.0 Wildlife Damage, its nature and definition, electric fences for wildlife damage control, Basic electric fence design, Trench design, live trapping, Mist netting, Rocket netting
Chemical capture: Equipment, Drugs, Plan of operation.
- 11.0 Poaching: Its definition and implications, conducting anti-poaching operations, evidence in poaching cases.
- 12.0 National Projects: Project Tiger, Project elephant, Project Rhinoceros, Project Crocodiles, Project Hangul, Manipur Brow Antlered Deer.

Suggested Reading Materials:

1. Techniques for wildlife Census in India by W.A. Rogers (A field manual); Wildlife Institute of India, Dehradun.
2. Wildlife Wealth of India by T.C. Majumuria; Tecpress Services, L.P., 487/42-SOL-Wattenslip, Pratunam Bangkok, 10400, Thailand
3. Ali, S. Ripley S.D. Handbook of Birds of India, Pakistan 10-Vols. Oxford University Press, Bombay.
4. The Book of Indian Animals by S.H. Prater, BNHS-Publication, Bombay.
5. Wildlife in India by V.B. Saharia Natraj Publishers, Dehradun.
6. E.P. Gee, The Wildlife of India.

Teaching-Learning Process

- **Lectures** : Supported by power point presentations and related videos
- **Assignments and exercises**
- **Test:** Knowledge of the students is tested through surprise tests, quiz & session tests.

Average	3	2	2.25	2.25	2.25	3

SEMESTER – IV

Paper: M-Z 406 (Elective)
Fish, Fisheries and Aquaculture – II
Credits: 4

Total Marks: 100
Theory Examination: 80
Internal Assessment: 20
Time: 3 Hours

Objectives:

1. To generate knowledge about the recent methods of fish stock improvement and intensive culture techniques of important fin-fish and shell-fish species.
2. To develop ability for different type of aquaculture practices.

Outcomes:

- CO1** The students will learn the techniques using biotechnological approach to improve fish stock and will also understand ethics involved in it.
- CO2** This core elective paper will help in learning culture techniques of aquatic organisms
- CO3** This will help in developing skilled personnel in techniques of improving the fish Stock and yield of aquaculturally important aquatic organisms.
- CO4** The study of culture techniques of various aquatic organisms helps in the production of healthy food for human consumption in a sustainable manner and also in employment generation.

Note:

1. Nine questions will be set in all.
2. Question No. 1, which will be objective/short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set section wise selecting four questions from each section (I & II). The candidate will be required to attempt question No. 1 and four more selecting two questions from each section.
3. As far as possible the questions should be divided into sub-parts and marks indicated part wise.

UNIT - I

- 1.0 Introduction to fish biotechnology
- 2.0 Selection and hybridization
- 3.0 Androgenesis and Gynogenesis – natural and induced
- 4.0 Polyploidy techniques
- 5.0 Sex reversal and sterility

UNIT - II

- 6.0 Transgenesis, transgenes and application
- 7.0 Cryopreservation of gametes and embryo
- 8.0 Fish-by products
- 9.0 Fish preservation process
- 10.0 Nutritive aspect of fish meat and oil.

UNIT - III

- 11.0 Different systems for aquaculture: pond culture, cage culture, raceway culture.
- 12.0 Culture of important fish species (Major carps, common carps, Chinese carps, cat fish culture and Tilapia culture).
- 13.0 Integrated Aquaculture and waste water aquaculture
- 14.0 Pearl Culture
- 15.0 Frog culture

UNIT - IV

- 16.0 Prawn culture-Fresh and brackish water
- 17.0 Impact of Aquaculture on Environment
- 18.0 Methods of Fishing : Crafts and gear technology
- 19.0 Fish diseases and their control
- 20.0 Nutrition in Aquaculture
 - 20.1 Nutrient and non-nutrient diet components
 - 20.2 Preparation and processing of feed, feed formulae,
 - 20.3 Natural and supplementary feed and their utilization

SEMESTER – IV

Paper: M-Z 407 (Core)
Practical (Based on Papers M-Z 401 to M-Z 403)
Credits: 4

Total Marks: 100
External Examination: 80
Internal Assessment: 20
Time: 4 Hours

Objective: To provide the students with the knowledge about the developmental stages, comparative structures of tissues, analysis of genotoxicity and principles of sediment chemistry.

Outcomes

CO1: Students will know the principle and various techniques of embryology.

CO2: Students will be able to identify the various stages involved in the developing embryo of chick.

CO3: They will be able to demonstrate basic principles in sediment chemistry and qualitative analysis of genotoxicity.

CO4: Students will be able to prepare the histological slides of different tissues for clinical studies and for research purpose.

Course Contents:

1. Permanent preparation of chick embryo developmental stages.
2. Studies of different types of eggs with reference to their yolk contents
3. To study internal morphology of chick egg
4. Study of development in Dictyostelium
5. Determination of various parameters of chick egg
6. To study the permanent slides of frog embryo developmental stages
7. Antigen-antibody interaction *in vitro*.
8. ELISA (Demonstration).
9. Phagocytosis *in vitro*.
10. Immunological diagnosis of pregnancy/infection/cancer.
11. To study permanent slides of Lymphoid and endocrine glands
12. Studies on vaginal smears during different stages of estrous cycle.
13. Bioassay to demonstrate toxicological effect : Micronuclei Assay and demonstration of Single Cell Gel electrophoresis to elucidate toxicological effect
14. Determination of sediment chemistry
 - a. Moisture
 - b. Carbonate
 - c. Nitrate
 - d. pH
 - e. Phosphate
 - f. Texture

SEMESTER – IV

Paper: M-Z 408(i) (Elective)
Practical (Based on Papers M-Z 404)
Credits: 4

Total Marks: 100
External Examination: 80
Internal Assessment: 20
Time: 4 Hours

OBJECTIVES

1. To provide students the opportunity to gain a first-hand laboratory experience of the structure, function, and development of the reproductive organs.
2. To gain experience in experimental design, cutting-edge research techniques, data analysis, and scientific report writing and will be introduced to the practicalities of reproductive manipulation and assisted reproductive technologies.

OUTCOMES: Students will be able-

- CO1** To develop the scientific attitude that makes the students open minded, critical observations, curiosity thinking etc.
- CO2** To acquire the specialized knowledge relevant to reproductive biology and biochemistry.
- CO3** To understand the basic and molecular laboratory techniques in both physiology and biochemistry.
- CO4** To acquire the knowledge about various male and female infertility problems

Course Contents (Molecular Reproduction-II):

1. Effects of pesticides, drugs, and xenobiotics on granulosa cells *in vitro*.
2. Effects of pesticides, oxidants, and free radicals on testicular tissue *in vitro*.
3. Morphological changes during spermatogenesis.
4. Effects of environmental endocrine disruptors on the fertility after exposure *in vitro*.
5. Estimation of catalase from reproductive tissues
6. Determination of Glutathione peroxides, glutathione reductase from reproductive tissues.
7. Lipid peroxidation by MDA method.
8. Impact of Vitamin C & E and other antioxidants on pesticides induced cytotoxicity on reproductive tissues *in vitro*.
9. Isolation of genomic DNA
10. Agarose Gel Electrophoresis: Practical demonstration
11. Age related changes in sperm characteristics.
12. Demonstration of Single Cell Gel electrophoresis/COMET Assay to elucidate toxicological effect.

SEMESTER – IV

Paper: M-Z 408(ii) (Elective)
Practical (Based on Papers M-Z 405)
Credits: 4

Total Marks: 100
External Examination: 80
Internal Assessment: 20
Time: 4 Hours

Objective:

1. Practical knowledge of important concept and types of behavior patterns
2. In depth knowledge of Theory and practice of avian fauna

Outcomes:

- CO1** It will boost students for keen understanding various population estimation methods in animal world.
- CO2** Students will acquire a clear practical understanding about behavior repertoire sheets
- CO3** Students will understand the practical approaches of diversity indices
- CO4** Will have detail understanding of reported avifaunal status in the field

Course Contents (Animal Behaviour and Wildlife Conservation – II):

- 1 To study the effect of temperature on gill movement in fishes.
- 2 To study nesting behaviour of squirrels in different habitats vis., urban environment, grain-market-area, roadside plantations, orchards gardens etc.
- 3 Field study of burrowing behaviour of common available rodent fauna of the region.
- 4 Study of morphological changes in common avian species during breeding season.
- 5 Preparation of charts of endangered amphibians, reptiles and mammals with ecological remarks.
- 6 Animal behaviour patterns using Photostat sheets/ repertoire sheets
- 7 Analysis of standard pug marks of large sized wild mammals.
- 8 Study of Migratory Birds
- 9 Study of Diversity indices : use of software in calculating diversity indices
- 10 Study of beaks and claws of different bird species.
- 11 Field visit to a zoo or wildlife part/sanctuary and preparation of field report
- 12 Preparation of field diary on the basis of observations regarding habitat, habits of common available avian and rodent fauna of the region.

SEMESTER – IV

Paper: M-Z 408 (iii) (Elective)
Practical (Based on Papers M-Z 406)
Credits: 4

Total Marks: 100
External Examination: 80
Internal Assessment: 20
Time: 4 Hours

Objectives:

1. To generate knowledge about the recent methods fish feed formulation and processing
2. To apprise students about induced breeding identification of different stages of fish development and use of craft and gears

Outcomes:

- CO1** The students will be able to formulate and process fish feed using different ingredients for sustainable fish culture
- CO2** This practical paper will make students capable of quantifying proximate composition of fish feed
- CO3** This will develop skilled personnel in techniques of making pituitary extract and estimating primary productivity
- CO4** This will develop students capable of using different fish nets and gears for capturing fishes and also of conducting small projects

Course Contents (Fish, Fisheries and Aquaculture – II):

1. Fish Feed formulation and processing.
2. Proximate analysis of fish feed (Determination of moisture, protein, fat, ash carbohydrate, fiber and energy).
3. Taking out of pituitary gland, preservation and preparation of extract.
4. Estimation of primary productivity
5. Study of benthic macroinvertebrates in natural water bodies.
6. Identification of eggs, spawn, fry and fingerlings of cultivable fishes of India.
7. Determination of length weight relationship.
8. Determination of age of fish using hard parts
9. Analysis of fecundity, Gonado somatic index (GSI), Hepatosomatic index (HIS) in some fishes.
10. Study of crafts and gear and method of operation (Models can also be used)
11. Visit to fish farm and fish market and preparation of report
12. A small experimental project
