#### COURSE-BSE-105: IDENTIFICATION OF CHILDREN WITH VISUAL IMPAIRMENTAND ASSESSMENT OF NEEDS

# Course: BSE-105 Contact Hours: 60 Time of Examination: 3 Hours

Credits: 04 Marks: 100 (External-80+Internal-20)

**Note:** Paper setter will set 10 questions in all i.e. two from each unit. The students will be required to attempt five questions, selecting one from each unit. All questions will carry equal marks.

## Introduction

We cannot treat a visually impaired child as 'a pair of young eyes'. We need to understand the whole child, including his feelings and needs. Having understood the psychological and sociological implications of visual impairment, the learners should be more empathetic to the needs of the visually impaired and address them appropriately in diverse educational settings. There are many eye conditions each with different educational and social implications. The infant must 'see to learn' and therefore a visually impaired infant must 'learn to see'. Thecourse will enable the trainees to be able to identify children who are at risk for visualimpairment. The trainees will be able to develop the skills of doing functional vision assessment and enhance the residual vision. The course also focuses on needs and assessment of children with multiple disability and visual impairment.

#### Introduction

India has an excellent historical backdrop as well as contemporary talents in the field of art. However, it is debatable whether the same has been translated into our school system effectively. Do most of our students get exposure to a variety of activities involving knowing, exploring and appreciating art? Most probably they do not. It is time that we take a fresh look at what art education is and what role it plays in school education. More than anything, art education is also expected to enhance learning. And do teachers know how to go about it to achieve it? Here is an opportunity to facilitate the art within you which in turn will reflect art in within students. For a student-teacher with disability appropriate learning alternatives are to be given by the college. For example, a candidate with blindness must get alternative learning opportunities and evaluative tasks for visual art or a candidate with deafness for music art – if and when needed.

#### Introduction

Movement with independence in the environment has been stated to be one of the major challenges of vision loss. In order to facilitate their meaningful empowerment, therefore, it is necessary to provide students with visual impairment skills and techniques which enable them to cope with these challenges. Developments, especially during and after World War II, have led to the emergence of a large variety of such strategies, skills and technologies, which are covered under the discipline titled Orientation and Mobility. So, the present course carrying the same title introduces the learners to various crucial aspects of this vital subject. It is hoped that through the study of the course, the student-teachers would be in a better position to understand the implications of vision loss with reference to independent movement. #### Introduction

Communication, language and speech have always been at the centre stage when education of children with deafness is being discussed. Without going into much of judgmental discussions in the direction of 'either – or' options to be the 'best', this syllabus intends to expose the student-teachers to all the dominant options. However, over and above the said exposure offered through compulsory courses, this optional course offers the student-teachers an additional opportunity to sharpen the skills in one of the categories of options. This is expected to emphasize use of appropriate options rather than advocating one among them any. Moreover, learning this optional course is also expected to provide wider career choices for the student teachers.

### COURSE-BSE-402(C): COMMUNICATION OPTIONS: MANUAL (INDIAN SIGN LANGUAGE) (HI)

#### Course: BSE-402(C)

#### **Contact Hours: 30**

#### **Time of Examination: 1.5 Hours**

**Note:** Paper setter will set 10 questions in all i.e. two from each unit. The students will be required to attempt five questions, selecting one from each unit. All questions will carry equal marks.

#### Introduction

Communication, language and speech have always been at the centre stage when education of children with deafness is being discussed. Without going into much of judgmental discussions in the direction of 'either – or' options to be the 'best', this syllabus intends to expose the student-teachers to all the dominant options. However, over and above the said exposure offered through compulsory courses, this optional course offers the student-teachers an additional opportunity to sharpen the skills in one of the categories of options. This is expected to emphasize use of appropriate options rather than advocating one among them any. Moreover, learning this optional course is also expected to provide wider Career Choices for the Student Teachers.

The PO attainment values to be filled in the above table can be obtained as follows:

<u>For BSE-101-PO1 Cell:</u> PO1 attainment value = (Mapping factor of BSE-101-PO1 from Table 4 x Overall CO attainment value for the course BSE-101)/3. Same method can be used to obtain attainment values for the other POs.

In order to obtain the PO attainment using the indirect method, a student exit survey based on questionnaire of POs may be conducted at the end of last semester of the program, as per the following format:

# Table 8: Questionnaire for indirect measurement of PO attainment(For outgoing students)

At the end of my degree program I am able to do:
