

Prof. Ranjan Gupta

Prof. Ranjan Gupta possess 20 years of teaching and 21years of research experience. Presently, her research involves identifying “relationship between single nucleotide polymorphisms (SNPs) and susceptibility to thyroid and cardiovascular diseases and diabetes”. She has been awarded with Raman Fellowship for “Postdoctoral research for Indian scholars” in the US by UGC, Delhi, "Certificate of Honour" for academic achievements by Vice Chancellor, KUK and “Indo-pacific Distinguished Professor Award 2021 in Molecular Genetics” by IMRF. As former Chairperson, Department of Biochemistry, KUK, during COVID-19, she organized webinars/lecture series featuring national/international speakers to bolster student development and entrepreneurship. She has 65 research papers to her credit published in esteemed national and international journals. She has successfully conducted three research projects funded by DST and UGC and provided guidance to several Ph.D. students, both in the past and ongoing. She has served as Chairperson of Board of Studies, Ph.D. thesis examiner, convener of college inspection committees and reviewer for Research journals.
