Appeal

- HEI appeals for a relook on the link between DVV verified data and corresponding score and requests for a score of '4' instead of '3' as awarded for the metric 1.2.1.
- The award of score '3' for metric 1.2.1 on DVV verified data of 48.15% new courses introduced in the assessment period, is puzzling to the HEI.
- The current benchmark of NAAC for this metric pins a score of '4' for 20% or more new courses introduced. We believe that benchmark during assessment period of HEI must have followed similar indices.
- The DVV verified data of 48.15% of new courses introduced for metric 1.2.1 is acceptable to HEI.
- HEI appeals to award a score of '4' on the DVV verified data (48.15%) for the metric 1.2.1 as per benchmark.

Appeal

- HEI appeals for a revised score of ‘4’ on the DVV verified data for metric 2.4.2 in place of ‘3’ awarded to it.
- HEI is of firm opinion that the score of ‘3’ awarded for metric 2.4.2 for DVV verified data of 80.15% is not appropriate and HEI deserves a better consideration. The current NAAC benchmark for this metric places the score of ‘4’ for an average percentage of 80% or more.
- The DVV has verified the average percentage as 80.15% of full time teachers with Ph.D./D.M./M.Ch./D.N.B. Superspeciality/D.Sc./D.Litt. and HEI accepts the same.
